Handover of Power - Education Andreas Seidl, 2022-08-25 *Education rethought*. Do you also sometimes worry that learning gives you more fear than pleasure? And do you also wish for an environment where you can learn everything easily and quickly? How can an education system cater to teachers and learners at the same time? This book tells us how learners can choose suitable teaching methods depending on their learning type and decide for themselves when they want to learn which knowledge from the curriculum. How teachers and learners can democratically administer their educational institution themselves and together become researchers and developers who produce products or realise inventions in an alliance which educational paths everyone can take in order to learn the parts they want from the knowledge available worldwide at any time. After 20 years of work on this book series, Andreas Seidl thus ventures a step towards founding a party. In doing so, he entertains his readers both intellectually and visionarily. If this work can give you hope, inspire you or move you to action, it has fulfilled its purpose. Available in German and English. Political Science Quarterly, 1975. A review devoted to the
