National Security Through Civilianbased Defense:

National Security Through Civilian-based Defense Gene Sharp,1985 *The Strategy of Nonviolent Defense* Robert J. Burrowes,2015-10-26 Because of the way in which the history of nonviolence has been marginalized relatively few people have a sense of the rich history of nonviolent struggle or realize that it can be systematically planned and applied Nevertheless the historical record illustrates that nonviolent struggle is a powerful form of political action But can it be effective against military aggression The Strategy of Nonviolent Defense answers this question in the affirmative by first defining the notion of social cosmology the four mutually reinforcing features that determine the character of any society It then devotes attention to strategies for dealing with conflict in particular to developing a strategic theory and framework for planning a strategy of nonviolent defense In order to develop this theory Burrowes synthesizes insights drawn from the strategic theory of Carl von Clausewitz the nonviolence of Mahatma Gandhi and recent human needs and conflict theory

Global Warming, Militarism and Nonviolence M. Branagan, 2013-06-28 Militarism is the elephant in the room of global warming Of all government sectors Defence has the highest carbon footprint and expenditure yet has largely been exempt from international scrutiny and regulation Marty Branagan uses Australian and international case studies to show that nonviolence is a viable alternative to militarism for national defence and regime change Active resistance initiated in Australian environmental blockades and now adopted globally makes the song We Shall Not Be Moved much more realistic as activists erect tripod villages bury chain and cement themselves into the ground and lock on to machinery and gates Active resistance artistic activism and use of new information and communication technologies in movements such as the Arab Spring and Occupy demonstrate that nonviolence is an effective evolving praxis

Toward a Living Revolution George Lakey, 2016-03-03 The Arab Awakening and other nonviolent insurrections have often failed to produce lasting democratic change A believer in empowerment Lakey proposes a stage by stage developmental framework to get better more transformational results Still incorporating the nonviolent coercive force that has brought down dictators Lakey uses historical best practices from movements to show how people can grow a revolution that roots itself even while it confronts The five stages begin with consciousness change lifting an intersectional vision that inspires and provides the basis for a critical mass to join the movement as it pushes through each developmental stage Lakey shows how to reconcile pre figurative alternative institutions with confrontive direct action teams making the most of inherent synergistic potentials With actual stories from confrontation with violent authorities he describes what

works best for unifying and building the movement to the point where it can carry out the mass noncooperation that opens a power vacuum Earlier democratic organizing structures growing as the strategy unfolds can then fill the vacuum This stage prevents a relapse into the old oppression and defends the new society against counterrevolutionary forces Although focused on how each society can realize its own revolution this book acknowledges the context of global power and proposes a vision for transformed world institutions that are on the side of peace and justice The principles in the book have particular application in the climate crisis humanity now faces which is why the book describes a living revolution Globalization and the National Security State Norrin M. Ripsman,T.V. Paul,2010-03-18 In the past two decades many have posited a correlation between the spread of globalization and the decline of the nation state In the realm of national security advocates of the globalization thesis have argued that states power has diminished relative to transnational governmental institutions NGOs and transnational capitalism Initially they pointed to declines in both global military spending which has risen dramatically in recent years and interstate war But are these trends really indicative of the decline of nation state s role as a guarantor of national security In Globalization and the National Security State T V Paul and Norrin M Ripsman test the proposition against the available evidence and find that the globalization school has largely gotten it wrong The decline in interstate warfare can largely be attributed to the end of the Cold War not globalization Moreover great powers the US China and Russia continue to pursue traditional nation state strategies Regional security arrangements like the EU and ASEAN have not achieved much and weak states the ones most impacted by the turmoil generated by globalization are far more traditional in their approaches to national security preferring to rely on their own resources rather than those of regional and transnational institutions This is a bold argument and Paul and Ripsman amass a considerable amount of evidence for their claims It cuts against a major movement in international relations scholarship and is sure to generate controversy Eyes Without Country Souad Dajani,2010-06-17 A strategy of nonviolent civilian resistance for Palestinian sovereignty **Nonviolent Action** Ronald M. McCarthy, Gene Sharp, Brad Bennett,2013-07-04 This comprehensive guide to research sources and theories about nonviolent action as a technique of struggle in social and political conflicts discusses the methods and techniques used by groups in various encounters Although violence and its causes have received a great deal of attention nonviolent action has not received its due as an international phenomenon with a long history An introduction that explains the theories and research used in the study provides a practical guide to this essential bibliography of English language sources The first part of the book covers case study materials divided by region and subdivided by country Within each country materials are arranged chronologically and topically The second major part examines the methods and theory of nonviolent action principled nonviolence and several closely related areas in social science such as conflict analysis and social movements The book is indexed by author and subject **On the Eve of the 21st Century** William Gay,T.
