**Local Politics and National Policy** Ken Victor Leonard Hijino,2017-04-28 This book is about why and how central and local governments clash over important national policy decisions Its empirical focus is on the local politics of Japan which has significantly shaped and been shaped by larger developments in national politics The book argues that since the 1990s changes in the national political arena fiscal and administrative decentralization as well as broader socio economic developments have led to a decoupling of once closely integrated national and local party systems in Japan Such decoupling has led to a breakdown of symbiotic relations between the centre and regions In its place are increasing strains between national and local governments leading to greater intra party conflict inter governmental conflicts and more chief executives with agendas and resources increasingly autonomous of the national ruling party Although being a book primarily focused on the Japanese case the study seeks to contribute to a broader understanding of how local partisans shape national policy making The book theorizes and investigates how the degree of state centralization vertical integration for party organizations and partisan congruence in different levels of government affect inter governmental relations Japan s experience is compared with Germany Canada and the UK to explore sources of multi level policy conflict Chapter 1 of this book is freely available as a downloadable Open Access PDF at <http://www.taylorfrancis.com> under a Creative Commons Attribution Non Commercial No Derivatives CC BY NC ND 4 0 license

*Management Challenges in Developing Countries* Pariatamby, Agamuthu, Shahul Hamid, Fauziah, Bhatti, Mehran Sanam, 2019-10-18 As global waste generation increases at a rapid rate, there is a dire need for waste management practices such as collection, disposal, and recycling to protect from environmental pollution. However, developing countries generate two to three times more waste, resort to open dumps more often than developed countries, and are slower to integrate waste management standards. There is a need for studies that examine the waste generation and practices of countries that share similar economic backgrounds as they strive to implement successful waste management techniques. *Sustainable Waste Management Challenges in Developing Countries* is an essential reference source that discusses the challenges and

**Contemporary Governance Challenges in the Horn of Africa** Charles Manga Fombad,Assefa Fiseha,Nico Steytler,2022-09-06 This book argues that a leading cause of the political instability in the Horn of Africa is a crisis of governance caused by extreme centralization of power weak institutions and the failure to institutionalise the responsible use of authority In recent years many attempts have been made to resolve the ongoing conflicts in Somalia and South Sudan but problems remain and in 2019 the instability spread to Ethiopia This book critically examines how many of the governance problems in the region can be addressed through institutional design The central argument is that an inclusive system of governance through federalism devolution and inclusive political institutions as well as ensuring the institutionalization of power through strengthening the rule of law has the potential to make governments more accountable inclusive and be able to deliver critical services Such systems ensure relative stability and peace and reduce the risks of state fragmentation a major concern in the region Demonstrating that the threats of further fragmentation and conflict due to the crisis of governance are likely to continue unless serious steps are taken to deal with the situation the book will be an important read for researchers and policy makers with an interest in peacemaking politics constitutional law and federalism in the region
