National Culture and the New Global System Frederick Buell,1994-09 The three worlds theory is perhaps still the basis for our dominant assumptions about geopolitical and geocultural order writes Frederick Buell but its hold on our imagination and faith is passing fast In its place a startlingly different model the notion that the world is somehow interconnected into a single system has emerged expressing the perception that global relationships constitute not three separate worlds but a single network In the wake of disillusionment with anticolonial nationalism and in response to a wide variety of economic political demographic and technological changes Buell argues we have come increasingly to view the world as complexly interconnected In *National Culture and the New Global System* he considers how the notion of national culture has been conceived and reconceived in the postwar period For much of the period the three world theory provided economic political and cultural models for mapping a world of nation states More recently new notions of interconnectedness have been developed ones that have had profound and sometimes startling effects on cultural production and theory Surveying recent cultural history and theory Buell shows how our understanding of cultural production relates closely to transformations in models of the world order

National Identity and Global Sports Events Alan Tomlinson,Christopher Young,2012-02-01

National Identity and Global Sports Events looks at the significance of international sporting events and why they generate enormous audiences worldwide. Focusing on the Olympic Games and the men's football soccer World Cup, the contributors examine the political, cultural, economic, and ideological influences that frame these events. Selected case studies include the 1936 Nazi Olympics in Berlin, the 1934 World Cup Finals in Italy, the unique case of the 1972 Munich Games, the transformative 1984 Games in Los Angeles, and the 2002 Asian World Cup Finals, among others. The case studies show how the Olympics and the World Cup Finals provide a basis for the articulation of entrenched and dominant political ideologies, encourage persisting senses of national identity, and act as barometers for the changing ideological climate of the modern and increasingly globalized contemporary world. Through rigorous scholarly analyses, the book's contributors help to illuminate the increasing significance of large-scale sporting events on the international stage.

The Future of Global Competition Robert Hinck, Asya Cooley, Skye C. Cooley, Sara Kitsch, 2021-12-14. With today's social and geopolitical order in significant flux, this project offers vital insight into the future global order by comparatively charting national media perceptions regarding the future of global competition through the lens of Ontological Security (OS). The authors employ a mixed-method approach to analyze 620 news articles from 47 Russian, Chinese, Venezuelan, and Iranian news sources over a five-year period (2014-2019), quantitatively comparing the drivers of their visions while providing in-depth qualitative case studies for each nation. Not only do these narratives reveal how these four nations understand the current global order but also point to their flexibility and agentic capacity for reflection in adapting, even shaping, the future order and their identity roles within it around an economic and diplomatic battleground. The authors argue these narratives create trajectories with inertial effects grounded in their OS needs, providing enduring insights into their behavior and interests moving into the future. *The Future of Global Competition* will help readers understand how influential nations, typically aligned in opposition to the US, envision the drivers of global competition and the make-up of the future international system. Those engaged in the study of media, global politics, international relations, and communication will find this book to be a critical source.

National Capitalisms, Global Competition, and Economic Performance Sigrid Quack, Glenn Morgan, Richard Whitley, 2000. Why are some firms successful on global markets whilst others are not? In this collection of papers, a group of distinguished international researchers examine the inter-relationship between national context, firm performance, and global competitiveness. In a series of empirical studies covering major industries such as banking, telecommunications, construction, automobiles, and airlines in a number of European countries (Great Britain, France, Germany, Holland, Finland, Slovenia), the studies show how distinctive patterns of firm competences and capabilities arise from national contexts. These influence the way in which firms perform in response to changing technologies and competitive pressures. Thus, the impact of the

globalisation of economic activity may be to reinforce existing national differences in firm performance rather than producing a homogenisation and standardisation This book will be of interest to researchers in business and management sociology economics and political science for its comparative organizational approach to problems of economic performance *The Competitive Advantage of Nations: The Case of Turkey* Özlem Öz,2019-05-23 First published in 1999 this volume applies Professor Michael Porter s diamond framework 1990 to the Turkish glass construction leather clothes automobile and flat steel industries zlam z aims primarily to contribute towards an improvement of this framework and thus towards a better understanding of the sources of competitive advantage Her research presents a new approach to evaluate the competitiveness of the Turkish economy given that alternative studies usually focus on factors like exchange rates and the cost of labour and raw materials as the determinants of competitive advantage The author begins her book by providing an evaluation of the diamond framework linked to the debate created by the publication of *The Competitive Advantage of Nations* She then identifies the pattern of advantage in Turkey by specifying the internationally competitive industries and clusters This is followed by a detailed examination of the five Turkish industry case studies glass construction leather clothes automobile and flat steel industries The findings are generally supportive of Porter The results suggest however several major areas in the framework especially domestic rivalry and the role of government where one or more of the Turkish cases question Porter s hypotheses The book ends with the implications of the study for the sources of competitive advantage in general and for the Turkish economy in particular Porter and his diamond framework are both unquestionably influential Improvements upon it forwarded in this book will be of use to academic readers as well as strategic planners and policy makers

Brand China in the Media Qing Cao, Doreen Wu, Keyan G. Tomaselli, 2020-06-29 This book examines China's identity transformations with a focus on self perceptions and their representations and communication in the mass media By considering the internal dynamics of change it explores the emerging multifaceted China brand With its growing economic clout China has taken a proactive stance in shaping global economic and strategic order through ambitious programmes such as the Asian Infrastructure Investment Bank and the Belt and Road initiative However as a developing country China is at pains to manage its own transformations while trying to carve out an international identity Arguably China's unique sense of history and identities may lead to a contested modernity or multiple modernities radically different from the prevalent classical theories of modernisation and convergence of industrial societies To understand China's trajectory of future development has been a major issue in international affairs This book is concerned with how China's hybridised identities are articulated and intertwined with situational institutional and societal dynamics and how they are interwoven with China's

international outlook which converges with or diverges from China's historical assumptions and beliefs. This book will be of interest to those studying China's identity in the media situated at the juncture of past, present and future and between China and the wider world. The chapters in this book were originally published in *Critical Arts*. **Routledge Handbook of East Asian Popular Culture** Koichi Iwabuchi, Eva Tsai, Chris Berry, 2016-12-01. Since the 1990s there has been a dramatic increase in cultural flows and connections between the countries in the East Asian region. Nowhere is this more apparent than when looking at popular culture where uneven but multilateral exchanges of Japanese, Korean, Taiwanese, Hong Kong and Chinese products have led to the construction of an East Asian Popular Culture. This is both influenced by and in turn influences the national cultures and generates transnational co-production and reinvention. As East Asian popular culture becomes a global force it is increasingly important for us to understand the characteristics of contemporary East Asian popular culture and in particular its transnational nature. In this handbook the contributors theorize East Asian experiences and reconsider Western theories on cultural globalization to provide a cutting edge overview of this global phenomenon. The *Routledge Handbook of East Asian Popular Culture* will be of great interest to students and scholars of a wide range of disciplines including Cultural Studies, Media Studies, Communication Studies, Anthropology, Sociology and Asian Studies in general.

Japanese Political Culture Takeshi Ishida, This volume provides a perceptive background to modern Japanese culture. Ishida attempts a balanced evaluation of modern Japan seeking to explain why the basic characteristics of Japanese society permit two almost opposite assessments. He divides the development of modern Japan into two stages: first the period starting from the Meiji Restoration 1868 up to the end of World War II, second from the defeat of Japan in World War II up to the present. Ishida investigates the essential features of the modern Japanese value system and the social structure which comprise both traditional and modern elements. He examines how Japanese society has adapted Western influences to suit its own needs, the real miracle of modern Japan. As the Japanese economy grows and Japan becomes an economic superpower, political self-confidence is also emerging. Ishida however remains critical of Japanese society because he feels that Japan lacked the internal resources to change the political system from within until its defeat by the Allies forced it to introduce various reforms ordered by the occupation authorities. Despite the rapid changes taking place in Japanese society, certain attitudes such as conformity and competition are common to both the prewar and postwar periods. The final section is devoted to the field of peace research. Ishida presents differences of meaning in the concepts of peace in ancient Hebrew, Greek, Roman, Chinese and Indian cultures in order to characterize the Japanese concept of peace which, akin to the Chinese, emphasizes harmony rather than justice. He goes on to discuss Japan's images of Gandhi which, according to the author, were projections of ultranationalist prejudice and missed the significance of his nonviolent direct action. Ishida emphasizes the importance of such nonviolent action as a means to carry out social change toward the realization of justice.
