National Geographic Index 1888 1988:

National geographic--Nov ,1996 *National geographic*--Aug ,1990 *National Geographic Index, 1888-1988 ,1989*
Several essays discussing the past present and future of the National Geographic Society accompany an index covering one hundred years of the Society's magazine **One Hundred Years National Geographic** Wilbur E. Garrett, National Geographic Society, 1989 **National Geographic Index ,1989** *National Geographic Index, 1888-1988; 1989-1993 ,1967* *National Geographic Treasures ,* *Presenting America's World* Tamar Y. Rothenberg, 2016-12-05 National Geographic magazine is probably the most visible and popular expression of geography in the USA *Presenting America's World* presents a critical analysis of the world portrayed by National Geographic from its formative years in the nineteenth century through to 1945 It situates the National Geographic Society's development within the context of a new American overseas expansionism interrogates the magazine as America's ubiquitous source of wholesome exotica and erotica examines the ways in which it framed the world for its millions of readers and questions its participation in the cultural work of US global hegemony The book argues that National Geographic successfully employed strategies of innocence a contradictory stance of representation which simultaneously asserts innocence either the innocence of just watching or the innocence of altruistic behaviour while naturalizing Western hegemony *Presenting America's World* not only considers the world that National Geographic presented to its readers but also examines the magazine's own institutional world of writers photographers and editors Particular attention is paid to Gilbert H Grosvenor the magazine's editor for over 50 years Maynard Owen Williams a writer and photographer who worked on nearly 100 articles from 1919 to 1960 and Harriet Chalmers Adams a freelancer explorer and Pan American activist who contributed 21 articles **Handbook of Reference Sources and Services for Small and Medium-Sized Libraries** Margaret I. Nicholas, 1996-07 Lists over 750 sources focusing on the reference needs of adults The primary objective was to select quality reference tools which cover many different topics Topics include general works biography philosophy religion language literature visual arts applied sciences sports and recreation home life social customs and education **National Geographic ,1996** *Veils and Daggers* Linda Steet, 2000 National Geographic magazine is an American popular culture icon that since its founding in 1888 has been on a nonstop tour classifying and cataloguing the peoples of the world With more than ten million subscribers National Geographic is the third largest magazine in America following only TV Guide and Reader's Digest National Geographic has long been a staple of school and public libraries across the country In *Veils and Daggers* Linda Steet provides a critically insightful and alternative interpretation of National Geographic Through an analysis of the journal's discourses in Orientalism patriarchy and primitivism in the Arab world as well as textual and visual constructions of Arab men and women Islam and Arab culture *Veils and Daggers* unpacks the ideological perspectives that have guided National Geographic throughout its history Drawing on cultural feminist and postcolonial criticism Steet generates alternative readings that

challenge the magazine's claims to objectivity. In this fascinating journey it becomes clear that neither text nor image in the magazine can be regarded as natural or self-evident and she artfully demonstrates that the act of representing others inevitably involves some degree of violence, decontextualization, miniaturization, etc. The subject area known as Orientalism she shows is a man-made concept that as such must be studied as an integral component of the social rather than the natural or divine world. Veils and Daggers repositions and redefines National Geographic as an educational journal. Steet's work is an important and groundbreaking contribution in the area of social construction of knowledge, social foundations of education, educational media and social studies as well as racial identity, ethnicity and gender. Once encountered, readers of National Geographic will never regard it in the same manner again. Author note: Linda Steet is Assistant Professor of Social Foundation of Education and Co-Coordinator of the Women's and Gender Studies Program at the University of Michigan, Flint.

The Costume Technician's Handbook Rosemary Ingham, Liz Covey, 2024-03-11. Since its first publication in 1980, *The Costume Technician's Handbook* has established itself as an indispensable resource in classrooms and costume shops. Ingham and Covey draw on decades of hands-on experience to provide the most complete guide to developing costumes that are personally distinctive and artistically expressive. No other book covers the same breadth of necessary topics for every aspect of costuming, from the basics of setting up a costume shop to managing one and everything in between.

Local Environmental Movements Pradyumna Karan, 2010-09-12. Increasing evidence of the irreparable damage humans have inflicted on the planet has caused many to adopt a defeatist attitude toward the future of the global environment. *Local Environmental Movements: A Comparative Study of the United States and Japan* analyzes how local groups in both Japan and the United States refuse to surrender the Earth to a depleted and polluted fate. Drawing on numerous case studies, scholars from around the world discuss efforts by grassroots organizations and movements to protect the environment and to preserve the landscapes they love and depend upon. The authors examine citizen campaigns protesting nuclear radiation and chemical weapons disposal. Other groups have organized to protect farmlands and urban landscapes; groups that organize to preserve streams, wildlife habitats, tidal flats, coral reefs, National Parks, and biodiversity. These small groups of determined citizens are occasionally successful, demonstrating the power of democracy against seemingly insurmountable odds. In other cases, the groups failed to bring about the desired change. This book explores the distinctive leaders, the relevant laws and regulations, local politics, and the historical and cultural contexts that influenced the goals and successes of the various groups. The contributors conclude that there is no one single environmental movement, but many, and the volume emphasizes grassroots movements and advocacy groups that represent local constituencies. By studying these groups and their respective challenges, *Local Environmental Movements* highlights the common themes as well as the distinctive features of environmental advocates in the United States and Japan. Over decades, these groups have nurtured environmental awareness and promoted the concept of sustainable development that respects the need for both environmental protection and cultural
