National Politics, Second Edition Patricia J. Woods, 2017-02-21 In *Judicial Power and National Politics* Second Edition Patricia J Woods returns to an issue that has only grown in relevance since the first edition's publication in 2008 the religious secular conflict in Israel The first edition focused on the role that courts and justices play in deeply charged political battles In the last quarter of the twentieth century social groups turned to the judicial arm of the state in an effort to force the state to change its laws and policies on religious personal status law or family law Through an extensive case study of the interactions of the women's movement with the High Court of Justice Woods argues that the most important determining factor explaining when why and how national courts enter into the world of divisive politics is found in the intellectual or judicial communities with whom justices live work and think about the law The interaction among members of this community over time culminates in new legal norms This second edition takes into account what has happened in the past decade with public debate over religion and the state moving away from the court and into the realm of popular politics on the Knesset floor in the media in shopping malls and on the streets Included for the first time is the dataset for the author's national survey of women's movement volunteers Discovering the everyday landscape Camilla Casonato, Marco Vedoà, Gloria Cossa, 2022-10-14 Heritage and landscape education is crucial to training young people in active and responsible citizenship protection of the public assets appreciation of the cultural diversity and intergenerational dialogue Therefore it cannot be limited to sporadic experiences and on outstanding heritage and contexts but must be transdisciplinary inclusive and practicable everywhere This book relates the research and action project Scuola Attiva Risorse ScAR winner of the Polisocial Award that recognizes research for social purposes at the Politecnico di Milano The text describes an experimental and innovative action delivered within the fragile context of the urban peripheries This participatory process involved schools universities cultural institutions administrations and private actors in interpreting and enhancing the hidden cultural heritage in Milan's fringe neighbourhoods **Landscape Theory** Rachel DeLue, James Elkins, 2010-10-28 Artistic representations of landscape are studied widely in areas ranging from art history to geography to sociology This book brings together more than fifty scholars from many disciplines to establish new ways of thinking about landscape in art **Carl Sandburg Home National Historic Site (N.H.S.), General Management Plan**, 2003 *Forests and Landscapes* Stephen Richard John Sheppard, Howard W. Harshaw, 2001-01-01 Forests are an important component in the visual appeal of landscapes There is an increasing recognition of the importance of this subject among foresters and environmental scientists Increasingly forest resource managers must consider the aesthetic consequences of timber harvesting operations and management plans This book is the first to address this subject area It consists of 15 chapters and is divided into four parts It brings together not only foresters and ecologists but also landscape architects psychologists and philosophers It should therefore attract a wide readership Contributors are leading research workers in their subjects from Canada the USA and UK **Pleasant Places** Walter S.
