National Toxicology Programs Chemical Solubility Compendium:

National Toxicology Program's Chemical Solubility Compendium Lawrence H. Keith, Douglas B. Walters, 2019-11-11 This book is a compilation of experimentally determined solubility ranges of over 1 700 compounds in the National Toxicology Program's Chemical Repository. Each compound's solubility was determined in a consistent manner in one to six solvents. Solvents chosen were those most commonly used for toxicology studies: spill cleanups and chemical synthesis or chemical reaction experiments. These solvents include acetone, 95% ethanol, water, dimethyl sulfoxide, methanol, and toluene. Data for many of the research and industrial chemicals featured in this volume do not exist anywhere else. If you are a toxicologist, safety professional, industrial hygienist, or chemist, this book is a valuable reference tool you'll find yourself using every day.

The National Toxicology Program's Chemical Data Compendium Lawrence H. Keith, Douglas B. Walters, 1991-12-31 This Compendium provides a vast amount of information about potentially toxic chemicals to regulatory and research agencies, consultants, academics, and libraries.

The National Toxicology Program's Chemical Database Lawrence H. Keith, Douglas B. Walters, 1991-12-31 This database provides a vast amount of information about potentially toxic chemicals to regulatory and research agencies, consultants, academics, and libraries. The National Toxicology Program's Chemical Database consists of eight volumes containing 50 fields that present detailed information on 2 270 different chemicals. The data is obtained from the literature or experimentally determined. Each compound is listed in every volume even when there is no information available for it in some volumes. Information in the NTP database was gathered and updated as compounds were used throughout a 12 year period from 1979 to 1991. Throughout the eight volumes, the primary chemical name and the Chemical Abstracts Service Registry Number (CAS No) remain constant, and all 2 270 chemicals are listed alphabetically in each volume. The NTP database can be sold as a set or individually. Each volume consists of one 3 1/2 and two 5 1/4 diskettes, in addition to a 64 page manual that describes how to use the software. Diskettes will run on IBM or IBM compatible equipment with DOS 2.0 and higher, 640K internal memory (RAM), and a hard drive with at least 2 17MB of available disk space. Use the eight volumes together to get the full benefit of the NTP Chemical Repository Database, or select only those volumes that contain the information you need and use them as stand alone databases. Each volume consists of one 3 1/2 and

two 5 1 4 diskettes that will run on IBM or IBM compatible hardware *Agrochemicals Desk Reference* John H. Montgomery, 2020-02-10 The *Agrochemicals Desk Reference* is a revised volume inspired by the growing number of research publications and continued interest in the fate transport and remediation of hazardous substances Much data has been added to this edition reflecting the wealth of literature in the field Featured are environmental and physical chemical data on more than 200 compounds including pesticides herbicides and fungicides All compounds are listed in alphabetical order making it easy to find the data you need The text is fully indexed by CAS number RTECS number empirical number and synonyms

Safety in the Chemistry and Biochemistry Laboratory André Picot, P. Grenouillet, 1996-12-17 Chemical and biochemical Laboratories are full of potentially dangerous chemicals and equipment Safety in the Chemistry and Biochemistry Laboratory provides the necessary information needed for working with these chemicals and apparatus to avoid fires explosions toxic fumes skin burns poisoning and other hazards Both authors Andr Picot and Philippe Grenouillet are recognized authorities in the field of lab safety and their book arrange the information not available in similar publications It is addressed to members of Chemical Health Safety as well as working chemists in labs everywhere Also Lab managers will find the book a useful addition to their bookshelf Fundamentals of Air Pollution Daniel Vallero, 2007-10-01 Fundamentals of Air Pollution is an important and widely used textbook in the environmental science and engineering community Written shortly after the passage of the seminal Clean Air Act Amendments of 1990 the third edition was quite timely Surprisingly the text has remained relevant for university professors engineers scientists policy makers and students up to recent years However in light of the transition in the last five years from predominantly technology based standards maximum achievable control technologies or MACTs to risk based regulations and air quality standards the text must be updated significantly The fourth edition will be updated to include numerous MACTs which were not foreseen during the writing of the third edition such as secondary lead Pb smelting petroleum refining aerospace manufacturing marine vessel loading ship building printing and publishing elastomer production offsite waste operations and polyethylene terephthalate polymer and styrene based thermoplastic polymers production Focuses on the process of risk assessment management and communication the key to the study of air pollution Provides the latest information on the technological breakthroughs in environmental engineering since last edition Updated information on computational and diagnostic and operational tools that have emerged in recent years **Environmental Contaminants** Daniel A. Vallero, 2010-08-05 Environmental Contaminants serves as a tool for environmental professionals to produce technically sound and reproducible scientific evidence It identifies ways to clean up environmental problems in air water soil sediment and living systems Ethical issues environmental management and professionalism and environmental economic problems are illustrated to assist the reader in understanding and applying quantitative analysis of environmental problems Real life solutions for practicing environmental professionals Example problems sidebars and case studies to illustrate ethical issues environmental economic problems and environmental
