Writing the History of Nationalism Stefan Berger, Eric Storm, 2019-09-19 What is nationalism and how can we study it from a historical perspective *Writing the History of Nationalism* answers this question by examining eleven historical approaches to nationalism studies in theory and practice An impressive cast of contributors cover the history of nationalism from a wide range of thematic approaches from traditional modernist and Marxist perspectives to more recent debates around gender postcolonialism and the global turn in history writing This book is essential reading for undergraduate students of history politics and sociology wanting to understand the complex yet fascinating history of nationalism

Nationalism Paul Lawrence, 2016-09-17 Massive changes have taken place in the way nations and nationalism are thought about From being viewed enthusiastically by historians as a force for beneficial change before the First World War today appeals to national sentiment are viewed as far more complex and problematic This book looks at how historians and others such as sociologists and political theorists have explained the development and enduring importance of national identities from c 1850 to the present day It compares and contrasts a wide range of different theories and will be useful for anyone wanting to equip themselves with a theoretical understanding of why we live in nations and why we invest them with such significance

National History and New Nationalism in the Twenty-First Century Niels F. May, Thomas Maissen, 2021-06-17 National history has once again become a battlefield In internal political conflicts which are fought on the terrain of popular culture museums schoolbooks and memorial politics it has taken on a newly important and contested role Irrespective of national specifics the narratives of new nationalism are quite similar everywhere National history is said to stretch back many centuries expressing the historical continuity of a homogeneous people and its timeless character This people struggles for independence guided by towering leaders and inspired by the sacrifice of martyrs Unlike earlier forms of nationalism the main enemies are no longer neighbouring states but international and supranational institutions To use national history as an integrative tool new nationalists claim that the media and school history curricula should not contest or question the nation and its great historical deeds as doubts threaten to weaken and dishonour the nation This book offers a broad international overview of the rhetoric contents and contexts of the rise of these renewed

national historical narratives and of how professional historians have reacted to these phenomena The contributions focus on a wide range of representative nations from around all over the globe **The Nation in History** Anthony D.

Smith,2014-01-23 In this thought provoking new book Anthony Smith analyses key debates between historians and social scientists on the role of nations and nationalism in history In a wide ranging analysis of the work of historians sociologists political scientists and others he argues that there are three key issues which have shaped debates in this field first the nature and origin of nations and nationalism second the antiquity or modernity of nations and nationalism and third the role of nations and nationalism in historical and especially recent social change Anthony Smith provides an incisive critique of the debate between modernists perennialists and primordialists over the origins development and contemporary significance of nations and nationalism Drawing on a wide range of examples from antiquity and the medieval epoch as well as the modern world he develops a distinctive ethnosymbolic account of nations and nationalism This important book by one of the world s leading authorities on nationalism and ethnicity will be of particular interest to students and scholars in history sociology and politics

Modern Nationalism and the Making of a Professional Historian Shih-chieh Su,2014 This new study re examines the relationship between the beginnings of the modern historical profession and the emergence of the nation state in the nineteenth century The monograph analyses the founding father of modern historiography Leopold von Ranke and his evolution as an historian his self perception and his increasingly dominant perceptions of the historian s craft and role in society and politics Su particularly focuses on the tension between a commitment to an objective representation of the past and the allegiance to a nation The approach suggests an original and important revision of the conventional view of Ranke as an historian and perhaps more importantly of the origins of the modern historical profession This revision also suggests that some of the conventional attacks on the alleged fixation on objectivity of the Rankean school were are misplaced on the one hand and that other hand the historical profession has been from its very beginnings locked in battle with itself over its relationship with a specific nation culture and race its claim of universal meaning and implication and its assertion of truthfully telling the story of the past Su demonstrates that many if not in one way or the other all of the dilemmas and conundrums that confront historians today were already present in the making of the profession and more or less clearly in the minds of such major figures as von Ranke

The Plain and Noble Garb of Truth Eileen K. Cheng,2008 American historians of the early national period argues Eileen Ka May Cheng grappled with objectivity professionalism and other modern issues to a greater degree than their successors in later generations acknowledge Her extensive readings of antebellum historians show that by the 1820s a small but influential group of practitioners had begun to develop many of the doctrines and concerns that undergird contemporary historical practice The Plain and Noble Garb of Truth challenges the entrenched notion that America s first generations of historians were romantics or propagandists for a struggling young nation Cheng engages with the works of well known early national historians like George Bancroft William Prescott and

David Ramsay such lesser known figures as Jared Sparks and Lorenzo Sabine and leading political and intellectual elites of the day including Francis Bowen and Charles Francis Adams She shows that their work which focused on the American Revolution was often nuanced and surprisingly sympathetic in its treatment of American Indians and loyalists She also demonstrates how the rise of the novel contributed to the emergence of history as an autonomous discipline arguing that paradoxically early national historians at once described truth in opposition to the novel and were influenced by the novel in their understanding of truth Modern historians should recognize that the discipline of history is itself a product of history says Cheng By taking seriously a group of too often dismissed historians she challenges contemporary historians to examine some ahistorical aspects of the way they understand their own discipline

Nationhood from Below Maarten Van Ginderachter, M. Beyen, 2011-12-12

Nationalism was ubiquitous in nineteenth century Europe Yet we know little about what the nation meant to ordinary people In this book both renowned historians and younger scholars try to answer this question This book will appeal to specialists in the field but also offers helpful reading for any college and

university course on nationalism **A Global History of Modern Historiography** Georg G Iggers, Q. Edward Wang, Supriya Mukherjee, 2013-09-13 So far histories of historiography have concentrated almost exclusively on the West This is the first book to offer a history of modern historiography from a global perspective Tracing the transformation of historical writings over the past two and half centuries the book portrays the transformation of historical writings under the effect of professionalization which served as a model not only for Western but also for much of non Western historical studies At the same time it critically examines the reactions in post modern and post colonial thought to established conceptions of scientific historiography A main theme of the book is how historians in the non Western world not only adopted or adapted Western ideas but also explored different approaches rooted in their own cultures *A Global History of Modern Historiography* Georg Iggers, Q. Edward Wang, Supriya Mukherjee, 2016-09-01 The first book on historiography to adopt a global and comparative perspective on the topic A Global History of Modern Historiography looks not just at developments in the West but also at the other great historiographical traditions in Asia the Middle East and elsewhere around the world over the course of the past two and a half centuries This second edition contains fully updated sections on Latin American and African historiography discussion of the development of global history environmental history and feminist and gender history in recent years and new coverage of Russian historical practices Beginning in the mid eighteenth century the authors analyse historical currents in a changing political social and cultural context examining both the adaptation and modification of the Western influence on historiography and how societies outside Europe and America found their own ways in the face of modernization and globalization Supported by online resources including a selection of excerpts from key historiographical texts this book offers an up to date account of the status of historical writing in the global era and is essential reading for all students of modern historiography **Nation and Ethnicity** Julia C. Schneider, 2017-03-13 Winner of the Foundation Council Award of the Georg August University of G ttingen Public Law Foundation in the category of Outstanding Publications of Young Scientists 2017 In Nation and Ethnicity Chinese Discourses on History Historiography and Nationalism 1900s 1920s Julia C Schneider give an analysis of nationalist and historiographical discourses among late imperial and early republican Chinese thinkers In particular she researches their approaches towards non Chinese people within the Qing Empire and the question on how to integrate them into a Chinese nation state Non Chinese people mainly Manchus Mongols Tibetans and Turkic Muslims Uyghurs have not been considered as important factors in the history of early Chinese nationalism so far But Chinese nationalist and historiographical discourses tell not only a lot about the Chinese image of the Other but also shed new light on the images of the Chinese Self and its assumed ability to assimilate and integrate other ethnicities **Historiography in Saudi Arabia** Jörg Matthias Determann, 2013-10-25 Saudi Arabia is generally and justifiably viewed as a country with the fewest democratic institutions and the weakest traditions of pluralism in the world It is therefore surprising to learn that at least in one corner of the Saudi world there is a plurality voices J rg Matthias

Determann brings this element to light by analysing an important field of cultural activity in Saudi Arabia historical writing By exploring the emergence of a plurality of historical narratives in the absence of formal political pluralism Determann seeks to paint a more nuanced picture of Saudi Arabia than has previously been drawn Since the 1920s local tribal Shi'i and dynastic histories have contributed to a growing plurality of narratives diverging from and contesting the histories which focus on the royal family Instead they have emphasized the communities historical independence from the House of Saud or asserting the communities importance in Saudi national history In addition to this during the 1970s distinct social and economic histories began to be developed new narratives which have described important historical events evolving from wider social and economic factors rather than resulting from the actions of individual rulers or communities Paradoxically this happened because of the expansion of the Saudi state including state provision of mass education A variety of previously illiterate and relatively poor sections of Saudi society including former Bedouin were thus empowered to produce histories which while conformist for the most part also provided a vehicle for dissenting voices Furthermore Determann argues that this proliferation of alternative histories is also due to globalizing processes such as the spread of the internet It is through this phenomenon that narrative plurality has been facilitated by putting Saudi historians in contact with different ideologies methodologies and source material from abroad In challenging the widely held perception of Saudi Arabia as an irredeemably closed and monolithic society Historiography in Saudi Arabia provides a deeper understanding of modern Arab historiography the Saudi state and education and scholarship in the Middle East

Nationhood and Politicization of History in School Textbooks Gorana Ognjenović, Jasna Jozelić, 2020-02-15 This book explores how school history textbooks are used to perpetuate nationalistic policies within divided regions Exploring the divide and rule politics across ex Yugoslav successor states the editors and contributors draw upon a wide range of case studies from across the region Textbooks and other educational media provide the foundations upon which the new generation build understanding about their own context and the events that are creating their present By promoting nationalistic politics in such media textbooks themselves can be used as tools to further promote and preserve ongoing hostility between ethnic groups following periods of conflict This edited collection will appeal to scholars of educational media history education and post conflict societies

Writing a Small Nation's Past Neil Evans, 2016-02-17 This is the first volume to examine how the history of Wales was written in a period that saw the emergence of professional historiography largely focused on the nation across Europe and in the United States It thus sets Wales in the context of recent work on national history writing in the nineteenth and twentieth centuries and more particularly offers a Welsh perspective on the ways in which history was written in small mainly stateless nations The comparative dimension is fundamental to the volume's aim highlighting what was distinctive about Welsh historical writing and showing how the Welsh experience mirrors and illuminates broader historiographical developments The book begins with an introduction that uses the concept of historical culture as a way of exploring the different strands of historiography

covered in the collection providing orientation to the chapters that follow These are divided into four sections Contexts and Backgrounds Amateurs and Popularizers Creating Academic Disciplines and Comparative Perspectives All these themes are then drawn together in the conclusion to examine how far Welsh historians exemplify widespread trends in the writing of national history and thereby point up common themes that emerge from the volume and clarify its broader significance for students of historiography

Robinson, 2003 How did Muslims of the classical Islamic period understand their past What value did they attach to history How did they write history How did historiography fare relative to other kinds of Arabic literature These and other questions are answered in Chase F Robinson's *Islamic Historiography* an introduction to the principal genres issues and problems of Islamic historical writing in Arabic that stresses the social and political functions of historical writing in the Islamic world Beginning with the origins of the tradition in the eighth and ninth centuries and covering its development until the beginning of the sixteenth century this is an authoritative and yet accessible guide through a complex and forbidding field which is intended for readers with little or no background in Islamic history or Arabic

Encyclopedia of the Age of Imperialism, 1800-1914 Carl C. Hodge, 2007-11-30 In 1800

Europeans governed about one third of the world's land surface by the start of World War I in 1914. Europeans had imposed some form of political or economic ascendancy on over 80 percent of the globe. The basic structure of global and European politics in the twentieth century was fashioned in the previous century out of the clash of competing imperial interests and the effects both beneficial and harmful of the imperial powers on the societies they dominated. This encyclopedia offers current detailed information on the major world powers and their global empires as well as on the people, events, ideas, and movements both European and non-European that shaped the Age of Imperialism.
