- The connection between a **nation** and its **territory** is particularly significant. The territory is an important ingredient in national identity and nationalism. However, nationalism can inspire tensions when two or more nations have conflicting aspirations. Often these result from historical memories of territory that overlaps.

## **Nationalism And Territory:**

Nested Identities Guntram Henrik Herb, David H. Kaplan, 1999 This groundbreaking work explores the vital importance of territory and space to any genuine understanding of nationalism and identity Too often the contributors argue national identity is analyzed apart from the lands that are integral to its formation as territory is seen as a commodity to be brokered rather than as central to a group's self definition This volume combines theoretical insights with structured case studies on how national identity manifests itself in space and at different geographical scales

**Nationalism and Territory** George W. White, 2000 Why do nations come into conflict What factors lead to the horrors of ethnic cleansing This timely book offers clear eyed answers to these questions by exploring how national identity is shaped by place focusing especially on Serbia Hungary and Romania Moving beyond studies of nationalism that consider only the economic and geostrategic value of territory George W White shows that the very core of national identity is intimately bound to specific places Indeed nations define themselves in terms of spaces that have historical linguistic and religious meaning as Serbs have clearly demonstrated in Kosovo These territories are concrete expressions of a nation's identity both past and present With his detailed analysis of the places that define national identity in Southeastern Europe White convincingly shows why territorial disputes so often escalate into war

**Territory** David Storey, 2001 Foundations of Comparative Politics Kenneth Newton, Jan W. van Deth, 2009-12-03 This student friendly introduction to the key theories and concepts of comparative politics now provides even broader coverage of the world's democracies with examples drawn from across the globe Foundations of Comparative Politics contains a wealth of information clearly structured and easy to read with clear definition of Key Terms It covers all the important themes in the field including constitutional design and institutions mass and elite politics policy making and implementation and the future of the state and democracy in a globalising world A new chapter on studying comparative politics and new What Have We Learned and Lessons of Comparison summary sections help students pull together the lessons of each chapter Combining facts and theory throughout debate is stimulated through the use of Controversy boxes and Fact Files and Briefings give students interesting data that illustrates the key issues in the text Online resources including MCQs and Powerpoint slides complete the package

**21st Century Geography** Joseph P. Stoltman, 2012 This is a theoretical and practical guide on how to undertake and navigate advanced research in the arts humanities and social sciences

**Nationalism** David H. Kaplan, Kathryn Hannum, 2023-11-20 Nationalism provides a comprehensive exploration of nationalist identity ideology and practice which centers the geographic underpinnings of the phenomenon It unpacks the fundamental principles and the many variations of this global phenomenon as it examines nationalism through a spatial lens Nationalism is the dominant political force in the modern world and no other global ideology is so strongly tied to concepts like territory homeland frontiers and boundaries The authors delve into how nationalism is fundamentally related to territory and place why mapping is critical to the nationalist endeavors the role of performance and personification ethnonationalism

multinationalism nationalist movements and how nationalism is evidenced and experienced in cities and towns throughout the world These provide a solid summary of what makes nationalism so compelling so uniting and so dangerous Nationalism provides a fresh and compelling perspective on a complicated and often controversial subject Written in an accessible and attractive style the book will be especially useful for classes in Geography Global Studies International Relations Political Science Sociology History and Anthropology It provides information and conceptual insights to scholars interested in a concise and sophisticated synthesis of contemporary nationalism For casual readers interested in the phenomenon of nationalism this book provides clear explanations and compelling examples

*Scaling Identities* Guntram H. Herb, David H. Kaplan, 2017-10-04 This comprehensive book examines the crucial connections between national identity territory and scale Providing a powerful theoretical and organizational framework the volume identifies four ways in which scale operates dynamically in the formation and maintenance of national identity Consolidating identities considers the strategies necessary to keep all parts within the fold through educational systems minority policies immigration controls and other forms of traditional state power Magnifying identities examines the consequences of shifting the scale up and unifying territories that have a sense of a larger supranational identity Connecting identities assesses how nations can bridge physical distance water barriers or sovereign boundaries Fragmenting identities looks into the disintegration of national identities and those forces that have the potential to unravel a nation or block its effective formation Nationalism and national identity remain critical flashpoints in the geopolitical order as we have seen in the development of a quasi independent Kurdistan in

Northern Iraq the resurgence of Native American identities in response to the Dakota Access Pipeline and the Chinese crackdown on its minority regions Offering a rich set of case studies from around the world this essential book affirms the global importance of national identity and scale      *Global Legal Pluralism* Paul Schiff Berman,2012-02-27 We live in a world of legal pluralism where a single act or actor is potentially regulated by multiple legal or quasi legal regimes imposed by state substate transnational supranational and nonstate communities Navigating these spheres of complex overlapping legal authority is confusing and we cannot expect territorial borders to solve all these problems At the same time those hoping to create one universal set of legal rules are also likely to be disappointed by the sheer variety of human communities and interests Instead we need an alternative jurisprudence one that seeks to create or preserve spaces for productive interaction among multiple overlapping legal systems by developing procedural mechanisms institutions and practices that aim to manage without eliminating the legal pluralism we see around us *Global Legal Pluralism* provides a broad synthesis across a variety of legal doctrines and academic disciplines and offers a novel conceptualization of law and globalization      **Liberal and Illiberal Nationalisms** R. Taras,2002-07-05 How people construct their idea of home influences the types of nationalisms that emerge in various parts of the world These nationalisms can be inclusive or exclusionary tolerant or intolerant peaceful or violent In this important new book Ray Taras provides a comprehensive analysis of the history and study of nationalism He describes what happens when home is defined as empire Russia and India secessionist state KwaZulu and Quebec uninational Volkstaat Germany and Israel or transnational community Islam and anti Americanism Finally he explores the idea that the mantra of multiculturalism has fuelled conflicts over what home is and generates divisions within and between communities      **Homelands** Nadav G. Shelef,2020-07-15 Why are some territorial partitions accepted as the appropriate borders of a nation s homeland whereas in other places conflict continues despite or even because of division of territory In *Homelands* Nadav G Shelef develops a theory of what homelands are that acknowledges both their importance in domestic and international politics and their change over time These changes he argues driven by domestic political competition and help explain the variation in whether partitions resolve conflict *Homelands* also provides systematic comparable data about the homeland status of lost territory over time that allow it to bridge the persistent gap between constructivist theories of nationalism and positivist empirical analyses of international relations      *The Oxford Handbook of Jurisdiction in International Law* Stephen Allen,Steve Allen,Daniel Costelloe,Malgosia Fitzmaurice,Paul Gragl,Edward Guntrip,2019 This Handbook provides an authoritative and comprehensive analysis of the concept of jurisdiction in international law The authors undertake a thematic analysis of its history its contemporary application and how it needs to adapt to encompass future developments in international law      **Soviet Nation-Building in Central Asia** Grigol Ubiria,2015-09-16 The demise of the Soviet Union in 1991 resulted in new state led nation building projects in Central Asia The emergence of independent republics spawned a renewed Western scholarly interest in the region s nationality

issues Presenting a detailed study this book examines the state led nation building projects in the Soviet republics of Kazakhstan and Uzbekistan Exploring the degree forms and ways of the Soviet state involvement in creating Kazakh and Uzbek nations this book places the discussion within the theoretical literature on nationalism The author argues that both Kazakh and Uzbek nations are artificial constructs of Moscow based Soviet policy makers of the 1920s and 1930s This book challenges existing arguments in current scholarship by bringing some new and alternative insights into the role of indigenous Central Asian and Soviet officials in these nation building projects It goes on to critically examine post Soviet official Kazakh and Uzbek historiographies according to which Kazakh and Uzbek peoples had developed national collective identities and loyalties long before the Soviet era This book will be a useful contribution to Central Asian History and Politics as well as studies of Nationalism and Soviet Politics

**Washed with Sun** Jeremy Foster, 2014-08-15 South Africa is recognized as a site of both political turmoil and natural beauty and yet little work has been done in connecting these defining national characteristics Washed with Sun achieves this conjunction in its multidisciplinary study of South Africa as a space at once natural and constructed Weaving together practical aesthetic and ideological analyses Jeremy Foster examines the role of landscape in forming the cultural iconographies and spatialities that shaped the imaginary geography of emerging nationhood Looking in particular at the years following the British victory in the second Boer War from 1902 to 1930 Foster discusses the influence of painting writing architecture and photography on the construction of a shared romanticized landscape subjectivity that was perceived as inseparable from being South African and thus helped forge the imagined community of white South Africa In its innovative approach to South Africa s history Washed with Sun breaks important new ground combining the persuasive theory of cultural geography with the material specificity of landscape history

Homelands Nadav G. Shelef, 2020-07-15 Why are some territorial partitions accepted as the appropriate borders of a nation s homeland whereas in other places conflict continues despite or even because of division of territory In Homelands Nadav G Shelef develops a theory of what homelands are that acknowledges both their importance in domestic and international politics and their change over time These changes he argues driven by domestic political competition and help explain the variation in whether partitions resolve conflict Homelands also provides systematic comparable data about the homeland status of lost territory over time that allow it to bridge the persistent gap between constructivist theories of nationalism and positivist empirical analyses of international relations

Stachura,2004-06-01

Stachura provides an important original analysis of the Polish community in the United Kingdom adding up to a provocative interpretation of the Pole s position in British society The chapters add to our understanding of the significant Polish military effort alongside the Allies in defeating Nazi Germany while the appalling price the Poles paid at the end of the war at the Yalta Conference is accentuated This crass and wholly unjustified betrayal of the cause of a free Poland by the Allies resulted directly in the formation of a large Polish community in Britain      **Human Geography** Erin Hogan Fouberg,Alexander B.

Murphy,Harm J. De Blij,2015      Sovereignty's Entailments Paul Nadasdy,2017-01-01 Based on over five years of ethnographic research carried out in the southwest Yukon Sovereignty s Entailments is a close ethnographic analysis of everyday practices of state formation in a society whose members do not take for granted the cultural entailments of sovereignty      **Jewish Civilization** Shmuel N. Eisenstadt,2012-02-01 This book explains why the best way to understand

the Jewish historical experience is to look at Jewish people not just as a religious or ethnic group or a nation or people but as bearers of civilization This approach helps to explain the greatest riddle of Jewish civilization namely its continuity despite destruction exile and loss of political independence In the first part of the book Eisenstadt compares Jewish life and religious orientations and practices with Hellenistic and Roman civilizations as well as with Christian and Islamic civilizations In the second part of the book he analyzes the modern period with its different patterns of incorporation of Jewish communities into European and American societies national movements that developed among Jews toward the end of the nineteenth century especially the Zionist movement and specific characteristics of Israeli society The major question Eisenstadt poses is to what extent the characteristics of the Jewish experience are distinctive in comparison to other ethnic and religious minorities incorporated into modern nation states or other revolutionary ideological settler societies He demonstrates through his case studies the continuous creativity of Jewish civilization
