The Broken Olive Branch: Nationalism, Ethnic Conflict, and the Quest for Peace in Cyprus Harry Anastasiou, 2008-12-05
In the first of two volumes Anastasiou offers a detailed portrait of Cyprus's dual nationalisms identifying the ways in which nationalist ideologies have undermined the relations between Greek and Turkish Cypriots. In the context of regional and global conflicts he demonstrates how the ethnic rivalry was largely engineered by the leaders of each community and consolidated by the nationalist configuration of political culture. Taking a multilevel approach he maps out the impasse and changes in ethnonationalism over time.

Nationalism and Ethnic Conflict, revised edition Michael E. Brown, Owen R. Cote, Jr., Sean M. Lynn-Jones, Steven E. Miller, 2001-09-14
Understanding the roots and causes of ethnic animosity analyses of recent events in Bosnia Kosovo Rwanda Somalia and the former Soviet Union. Most recent wars have been complex and bloody internal conflicts driven to a significant degree by nationalism and ethnic animosity. Since the end of the Cold War dozens of wars in Bosnia Kosovo Rwanda Somalia the former Soviet Union and elsewhere have killed or displaced millions of people. Understanding and controlling these wars has become one of the most important and frustrating tasks for scholars and political leaders. This revised and expanded edition of *Nationalism and Ethnic Conflict* contains essays from some of the world's leading analysts of nationalism ethnic conflict and internal war. The essays from the first edition have been updated and supplemented by analyses of recent conflicts and new research on the resolution of ethnic and civil wars. The first part of the book addresses the roots of nationalistic and ethnic wars focusing in particular on the former Yugoslavia. The second part assesses options for international action including the use of force and the deployment of peacekeeping troops. The third part examines political challenges that often complicate attempts to prevent or end internal conflicts including refugee flows and the special difficulties of resolving civil wars.

Nationalism and Ethnic Conflict Berch Berberoglu, 2005-12-13
This book examines the origins and development of nationalism and national movements in the twentieth century and provides an analysis of the nature and dynamics of nationalism and ethnic conflict in a variety of national settings. Examining the intricate relationship between class state and nation the book attempts to develop a critical approach to the study of nationalism and ethnonational conflict within the broader context of class relations and class struggles in the age of globalization. The book consists of three parts made up of seven chapters. Part I examines classical and contemporary conventional and Marxist theories of nationalism. Part II provides a series of empirical comparisons of nationalism and ethnic conflict on a world scale focusing on the Third World the advanced capitalist countries and Eastern Europe and the former Soviet Union. A highlight of this section of the book is a detailed comparative case study of the Palestinian and Kurdish nationalism and national movements. Part III provides a political analysis of the relationship between class state and nation and lays out the class nature of nationalism and the role of the state in ethnonational conflicts that are the political manifestations of deeper class struggles that have been the driving force of nationalism and ethnic conflict in the era of globalization. Berberoglu contends

that future studies of nationalism and ethnonational conflict must pay closer attention to the dynamics of class forces that are behind the ideology of nationalism by examining national movements in class terms For only through a careful class analysis of these forces and their ideological edicts will we be able to clearly understand the nature of nationalism and ethnonational conflicts around the world **The Palgrave Handbook of Social Movements, Revolution, and Social Transformation**

Berch Berberoglu,2018-09-26 This handbook on social movements revolution and social transformation analyzes people s struggles to bring about social change in the age of globalization It examines the origins nature dynamics and challenges of such movements as they aim to change dominant social economic and political institutions and structures across the globe Departing from a theoretical introduction that explores major classical and contemporary theories of social movements and transformation the contributions collected here use a class based approach to examine key cases of social movements rebellions and revolutions worldwide from the turn of the twentieth to the early twenty first centuries Against this wide ranging background the handbook concludes by charting the varied and competing future developments and trajectories of social movements revolutions and social transformations Ethnic Conflict Neal G. Jesse,Kristen P. Williams,2010-02-09 As

ethnic groups clash the international community faces the challenge of understanding the multiple causes of violence and formulating solutions that will bring about peace Allowing for greater insight Jesse and Williams bridge two sub fields of political science in Ethnic Conflict international relations and comparative politics They systematically apply a levels of analysis framework looking at the individual domestic and international contexts to better explore and understand its complexity Five case study chapters apply the book s framework to disputes around the world and include coverage of Bosnia the Israeli Palestinian conflict Northern Ireland Sri Lanka and Sudan Never losing sight of their analytical framework the authors provide richly detailed case studies that help students understand both the unique and shared causes of each conflict Students will appreciate the book s logical presentation and excellent pedagogical features including detailed maps that show political demographic and cultural data **The Moral Economies of Ethnic and Nationalist Claims** Bruce J.

Berman,André Laliberté,Stephen J. Larin,2016-09-15 At a time when states armed insurgent movements and ethnic and nationalist political parties make claims based on the defence of communal interests and political and religious ideologies with often deadly consequences it is important to understand the discourses and actions that are used to legitimize these claims This book argues that competing moral economies the beliefs and practices that normatively regulate and legitimize the distribution of wealth power and status in a society play an important role in ethnic and nationalist conflict Bringing together international experts on the politics of ethnicity and nationalism this final volume in the prestigious EDG series investigates how moral economies have been challenged in identity based communities in ways that precipitate or exacerbate conflicts The combination of theoretical chapters and case studies ranging from Africa and Asia to North America provides compelling evidence for the value of moral economy analysis in understanding problems associated with ethnic and

History Of Revolution: The Rise And Fall Of Empires Nicky Huys, 2024-04-16

History of Revolution The Rise and Fall of Empires offers a sweeping narrative that delves into the tumultuous and transformative nature of revolutions and the cycles of empire building throughout history From the ancient world to the modern era this book explores the forces that drive societies to rise rebel and ultimately decline Through vivid storytelling and insightful analysis it uncovers the complex interplay of power ideology and societal change shedding light on the pivotal moments that have shaped human civilization With a keen focus on the struggles triumphs and failures of empires this compelling work provides a comprehensive understanding of the enduring impact of revolution on the course of history

The Decline of Regionalism in Putin's Russia J. Paul Goode, 2011-05-11 This book reassesses Putin's attempt to reverse the decentralization of power that characterised centre regional relations in the 1990s focusing on regional responses to Putin's federal reforms It explains the decline of regionalism after 2000 in terms of the dynamics of regional boundaries understood as the juridical boundaries which demarcate a region's territorial extent and its resources institutional boundaries that sustain regional differences and cultural boundaries that define the ethnic or technocratic principles on which a region could claim legitimate existence The book questions the conventional wisdom regarding the success of Putin's regime It shows how regional governors responded not by attempting to deflect the reforms with outright resistance but by mimicking Putin's centralisation of power at the regional level In turn this facilitated the homogenisation of regional political regimes and regional mergers The book demonstrates how the reordering of regions advanced sporadically how pockets of resistance persist and how the potential for the revival of regionalism continues

Democracy, Federalism, the European Revolution, and Global Governance Andrea Bosco, 2020-06-10 The European Union is facing today the greatest crisis since its creation Brexit could mean not only the reversal of its steady enlargement from 6 to 28 member states but also the beginning of an inexorable decline leading to its disintegration However few today seem to recollect that it was precisely the British who were the first to promulgate the political culture which inspired the European Union's construction democracy and federalism and the first who tried to realise in June 1940 a European federation on the basis of an Anglo French union This volume traces the fundamental stages of the European unification process placing it in relation to the wider process of world economic and political integration In particular it analyses the historical significance of the European Revolution which is identified in the overcoming of the nation state namely the modern political formula which institutionalised the political division of mankind and the birth of the first truly international state The universal historical significance of the European Revolution lies in its exportability as for the other great European revolutions and therefore its potential as progressively extensible to all the states of the planet Europe was indeed the first region of the world where the barriers between national states fell and a post national political identity emerged complementary to national political identities It is in fact in the context of the European Union that democracy beyond the borders of the nation state has first been realized constituting a

guiding principle for global governance *Nationalism, Ethnicity and the State* John Coakley, 2012-11-12 This exciting new book is the first to offer a truly comprehensive account of the vibrant topic of nationalism Packed with a series of rich illustrative examples the book examines this powerful and remarkable political force by exploring Definitions of nationalism Language and nationalism Religion and Nationalism Nationalist history The social roots of ideologies and the significance of race gender and class Nationalist movements from dominant majorities to peripheral minorities socio economic and sociological perspectives State responses to nationalism Supported by a number of helpful illustrations tables and diagrams the text is both engaging and highly informative Nationalism Ethnicity and the State Making and Breaking Nations will prove an insightful read for both undergraduate and postgraduate students and researchers in the area of Politics and International Relations *The Revolution Falters* Patricio Abinales, 2018-05-31 A detailed investigation of the contemporary Philippine Left focusing on the political challenges and dilemmas that confronted activists following the disintegration of the Marcos regime and the reestablishment of electoral democracy under Corazon Aquino The authors focus on such varied topics as peasant politics urban social movements purges and executions and Marxist theory *Georgia from National Awakening to Rose Revolution* Jonathan Wheatley, 2017-05-15 Jonathan Wheatley examines the tortuous process of regime change in Georgia from the first pro independence protests of 1988 to the aftermath of the so called Rose Revolution in 2004 It is set within a comparative framework that includes other transition countries particularly those in the former Soviet Union The book provides two important theoretical innovations the notion of a regime which is an under theorized concept in the field of transition literature and O Donnell Schmitter and Karl s notion of a dynamic actor driven transition The volume turns to the structural constraints that framed the transition in Georgia and in other republics of the former Soviet Union by looking at the state and society in the USSR at the close of the Soviet period It examines the evolution and nature of the Georgian regime and ultimately addresses the theoretical and empirical problems posed by Georgia s so called Rose Revolution following the falsification of parliamentary elections by the incumbent authorities *War, Revolution, and Nation-Making in Lithuania, 1914-1923* Tomas Balkelis, 2018-03-02 In this book Tomas Balkelis explores how the Lithuanian state was created and shaped by the Great War from its onset in 1914 to the last waves of violence in 1923 As the very notion of independent Lithuania was constructed during the war violence is seen as an essential part of the formation of Lithuanian state nation and identity War was much more than simply the historical context in which the tectonic shift from empire to nation state took place It transformed people policies institutions and modes of thought in ways that would continue to shape the nation for decades after the conflict subsided In telling the story of the post WWI conflict in Lithuania War Revolution and Nation Making in Lithuania 1914 1923 focuses on the soldiers and civilians involved in the conflict rather than the strategies and acts of politicians generals or diplomats The volume s two main themes are the impact of military social and cultural mobilizations on the local population and different types of violence that were so characteristic of the region throughout the

period The actors in this story are people displaced by war and mobilized for war refugees veterans volunteers peasant conscripts POWs paramilitary fighters and others who took to guns not diplomacy to assert their power This is the story of how their lives were changed by war and how they shaped the society that emerged after war **Democracy, Ethnic Diversity, and Security in Post-Communist Europe** Anita I. Singh, 2001-06-30 Inder Singh examines why international organizations including the UN OSCE and Council of Europe advocated democratic governance based on the rule of law and respect for human and minority rights as the method by which states should try to accommodate their ethnically mixed populations She discusses how realistic this advice has been given the tension between the principle of the sovereignty of states and their international obligations and the extent to which democratization had made for ethnic and political stability in post communist Europe Inder Singh demonstrates that this advocacy of democracy to handle ethnic diversity questions the perception of nationalism as a cause of war and disorder This pathbreaking study will be of appeal to academics and policy makers interested in how the management of ethnic diversity through democracy can enhance domestic and international security **The American Bibliography of Slavic and East European Studies for 1994** Patt Leonard, Rebecca Routh, 1997-05-31 This text provides a source of citations to North American scholarships relating specifically to the area of Eastern Europe and the former Soviet Union It indexes fields of scholarship such as the humanities arts technology and life sciences and all kinds of scholarship such as PhDs **Coping with Terrorism** Rafael Reuveny, William R. Thompson, 2010-11-05 Terrorism is imprinted on Western society's consciousness Nearly every week a terrorist attack occurs in the world The academic world in attempting to understand terrorism has often been limited to descriptive work rather than analysis and has produced surprisingly few mainstream collections on the subject Coping with Terrorism offers a collection of essays that ask who are terrorists what are their goals who supports them and how can we combat their tactics The essays are scholarly rather than journalistic or ideological in their approach As such they scrutinize a much discussed and prevalent subject and bring it into the mainstream for international relations This book is freely available in an open access edition thanks to Knowledge Unlatched an initiative that provides libraries and institutions with a centralized platform to support OA collections and from leading publishing houses and OA initiatives Learn more at the Knowledge Unlatched website at <https://www.knowledgeunlatched.org> and access the book online at the SUNY Open Access Repository at <http://hdl.handle.net/20.500.12648/7125> *Revival: Ethnicity and Governance in the Third World (2001)* Pita Ogaba Agbese, 2017-07-12 This title was first published in 2001 Written by an outstanding international group of researchers focusing on ethnic conflict this refreshing analysis provides practical and effective policy options for the people of the Third World **The Geography of Ethnic Violence** Monica Duffy Toft, 2010-01-01 The Geography of Ethnic Violence is the first among numerous distinguished books on ethnic violence to clarify the vital role of territory in explaining such conflict Monica Toft introduces and tests a theory of ethnic violence one that provides a compelling general explanation of not only most

ethnic violence civil wars and terrorism but many interstate wars as well This understanding can foster new policy initiatives with real potential to make ethnic violence either less likely or less destructive It can also guide policymakers to solutions that endure The book offers a distinctively powerful synthesis of comparative politics and international relations theories as well as a striking blend of statistical and historical case study methodologies By skillfully combining a statistical analysis of a large number of ethnic conflicts with a focused comparison of historical cases of ethnic violence and nonviolence including four major conflicts in the former Soviet Union it achieves a rare balance of general applicability and deep insight Toft concludes that only by understanding how legitimacy and power interact can we hope to learn why some ethnic conflicts turn violent while others do not Concentrated groups defending a self defined homeland often fight to the death while dispersed or urbanized groups almost never risk violence to redress their grievances Clearly written and rigorously documented this book represents a major contribution to an ongoing debate that spans a range of disciplines including international relations comparative politics sociology and history
