Laboratory USA as a part of the NATO Science Committee's continuous effort to promote the advancement of science through international cooperation. Advanced Research Institutes are sponsored by the NATO Science Committee for the purposes of bringing together senior scientists to seek consensus on an assessment of the present state of knowledge on a specific topic and to make recommendations for future research directions. Meetings are structured to encourage intensive group discussion. Invitees are carefully selected so that the group as a whole will contain the experience and expertise necessary to make the conclusions valid and significant. A final report is published presenting the various viewpoints and conclusions. The NATO Systems Science Panel noted that the systems approach is increasingly being applied to energy policy analysis and planning in both public and private sectors of national economies. Consequently it seemed appropriate at this time to bring together experts to review and evaluate recent experience in order to identify strengths and weaknesses in current practice and to make recommendations for research directions.

Governing Law and Dispute Resolution in the Oil and Gas Industry Pereira, Eduardo G., Timonen, Tuuli, Aleynikova, Elina, 2022-08-23 The oil and gas industry's wide international exposure and constantly changing landscape leave it particularly vulnerable to disputes. As this practical book demonstrates, the risks associated with disputes can be mitigated by parties utilising governing law and dispute resolution clauses in contractual agreements within the sector. Examining a global range of jurisdictions, the book offers clear guidance on the most appropriate choice of law and choice of dispute resolution forum for oil and gas contracts, analysing the key issues and defining the legal contours involved.

Nationalized Industry and Public Ownership William Alexander Robson, 1962

The Price of Coal Michael P. Jackson, 2017-09-05 This book, originally published in 1974, examines the changes that took place in the market position of the coal industry in the twentieth century. It examines in detail the position of the industry during the two World Wars, the problems of the inter-war years, the effects of nationalisation and the coal shortage after the Second World War, the decline of the markets in the 1960s and the consequences of the energy crisis of the early 1970s. The book analyses what problems the changes caused and what measures were taken to try to overcome them. Looking in detail at the industrial disputes of 1971-2 and 1973-4, the book shows how the miners' actions fitted in closely with their past experiences and behaviour patterns.
