Nationbuilding And Development Proceb:

Nation-Building and Citizenship Reinhard Bendix, 2017-07-05 Nation Building and Citizenship examines how states and civil societies interact in their formation of a new political community Reinhard Bendix directs our attention to relations established between individual and state during nation building While the development of citizenship and the interplay between tradition and modernity are important in this process of social and political change his key theme is the examination of authority patterns Bendix explores in depth the possibilities of an alternative approach to the neo evolutionary orientation many social scientists take in their analyses of the underdeveloped areas of the world The subjects he discusses include transformations of Western European societies since medieval times extension of citizenship to the lower classes bureaucratization in the nation state private and public authority in Western Europe and Russia aristocracies and development in Germany and Japan and the development of public authority in India s political community The book concludes with a reconsideration of ideas widely held about tradition modernity and modernization In a new introduction John Bendix writes that what continues to make this book relevant is not only what it can tell us about past and present nation building including the transformations of the 1980s and 1990s but its more general messages about the nature of social and political transformations Nation Building and Citizenship is a necessary addition to the libraries of political scientists sociologists historians and scholars of comparative studies

Nation-Building Jochen Hippler, 2005-06-20 The term nation building has experienced a remarkable renaissance since the early 1990s It has been used to describe and to justify the military interventions in Somalia Afghanistan and Iraq Linked to the idea of failed or failing states the concept is used to hide and legitimise a whole range of diverse policies allowing foreign powers to control and reshape countries in areas of conflict Currently the international debate on nation building is heavily dominated by US actors and authors especially by writers connected to the Bush administration or its policies This book presents academic and political alternatives presenting a critical view from Old Europe The book combines academic research and analysis with policy orientation with contributors from both fields It clarifies the terminology distinguishing developmental peace related imperial and analytical approaches to nation building Highlighting its connections to globalization democracy ethnic and religious minorities the contributors consider case studies such as Somalia the Balkans Afghanistan Iraq and Nigeria

Nation-Building in the Baltic States Gundar J. King, David E. McNabb, 2014-08-26 The product of more than twenty years of research first person observations discussions and policy analyses Nation Building in the Baltic States Transforming Governance Social Welfare and Security in Northern Europe explores the characteristics of the Baltic states as positioned in the northeast corridor in terms of military strife and polity development such as democratization It details governments efforts to abet transparency and trust by way of developing new public and private institutions for advancements like innovation and private wealth creation The book examines the effects of various factors of economic and social adjustments

in Estonia Latvia and Lithuania The authors explore the opportunities and problems that have shaped the region s progress in the process of rebuilding democratic institutions and nation states after regaining their independence They then describe the region s progress in laying the critical internal foundation necessary for maintaining their political independence The book also reviews the progress made in strengthening what the authors believe are key social functions of government in what the EU describes as its social market system the provision of social welfare services that meets the needs of all The book concludes with a realistic picture of future hurdles for this region looking at lingering challenges and regional instabilities policy mistakes not to be made again and recommendations for national planning and resource management Going beyond a massive single explanation of recent Baltic developments the book provides a broad picture of development of social and political trends and insights with separate evaluations of issues in the process of national transformation It provides a foundation examining the forces that will shape the future of the Baltic states

Jenkins, Kate Jenkins, William Plowden, 2008-01-01 a detailed and well argued book They provide an excellent historical narrative that explodes the twin myths that nation building is a new phenomenon and that the post war recovery in Japan and Germany constitutes examples of successful nation building that can be replicated elsewhere this book is essential reading for anyone engaged in this issue Aidan Hehir Political Studies Review Nation Building Good Governance and Democratization are the main slogans guiding efforts to help societies in trouble But nearly all such contemporary endeavors fail This book is invaluable in exposing the causes for disappointing results and thus provides foundations for much improved policies It is obligatory reading for all concerned with improving governance Yehezkel Dror The Hebrew University of Jerusalem and author of The Capacity to Govern A Report to the Club of Rome 2002 Reporting on the failure of international intervention Jenkins and Plowden offer an illuminating analysis of an old but always ignored truth institutions can be imported not exported Luiz Carlos Bresser Pereira Getulio Vargas Foundation S o Paulo Brazil Anyone contemplating giving aid to developing countries for economic development and governmental modernisation should read this wide ranging and sharp analysis of why past programmes have brought disappointment and disillusion and what can be done in the future to ensure more effective use of such aid It goes beyond economics encompassing history culture social factors and above all politics It reflects the accumulated wisdom and scholarship of two experienced practical administrators and consultants who have seen at first hand what can go wrong G W Jones London School of Economics and Political Science UK This study by Jenkins and Plowden breaks new ground in the treatment of these issues They get behind the generalities that often bedevil debates on governance and document in telling detail the myriad ways in which aid donors have systematically attempted to transfer and transplant an idealised and largely Westernised blueprint of governance to societies which were either unable or unwilling to receive them Because their study is rooted not only in a careful survey of a comprehensive literature but also in an informed understanding of the preferences and practices of the main aid donor organisations it adds up to a devastating critique of the
