Nations And Citizenship In The Global Age From National To Transnational Ties And Identities:

Nation and Citizenship in the Global Age R. Münch, 2001-08-08 This book is about the formation of nationhood and citizenship and their transformation in the global age The different collective identities which evolved affected particularly by immigration in Britain France the United States and Germany are outlined in a historical genetic and comparative perspective with special emphasis on the case of Germany It looks at the question of transnational civil ties and the identities which emerge during the process of European integration and how they relate to national and sub national identities The SAGE Handbook of Research in International Education Mary Hayden, Jeff Thompson, Jack Levy, 2007-01-03 The editors of the SAGE Handbook of Research in International Education have brought together an impressive array of scholars whose cutting edge research addresses the growing field of international education from the experiences of K 12 schools around the world to the field of teacher education This book raises important questions and should be read by a broad audience Kenneth Cushner Executive Director of International Affairs and Professor of Education Kent State University The editors of this admirable handbook have set out to produce a report on international education Their consummate success in doing so gives those of us working in the field a new and invaluable resource The editors may be academics but this is a book largely written by about and for those whose job it is to teach internationally No one working in international education will fail to be provoked challenged or inspired by the compelling arguments advanced within this authoritative volume Peter MacKenzie Principal Hiroshima International School The book is well organized in carefully integrated sections and chapters and the references alone are a valuable bibliographical tool An indispensable work highly recommended for education reference collections and the libraries of individual researchers J B Thomas Emeritus Professor of Educational Studies Loughborough University Interest in the field of international education has never been more intense than at present There are a rapidly increasing number of schools worldwide set up specifically to meet the demands of those parents who through their own professional activities wish to have their sons and daughters educated in schools that offer programmes based on international values Such schools have embraced the promotion of international education as one of their major goals and consequently an increasing number of organisations currently offer curricula that claim to be international in nature Such global movements have created a parallel increase in the incorporation of forms of international education within national school systems throughout the world This has resulted in wider forms of collaboration between schools in the public and private sectors nationally and internationally generating a much more substantial base of professional experience in the implementation of schemes for international education than had previously existed This book analyses the origins contributions and interpretations of international education The authors identify approaches to research that will progress our knowledge and understanding of the field and extend and even redraw it on the basis of the research evidence presented Content includes A historical overview of the ways in which the term international education has been interpreted The

theoretical interpretation of international education in its current context International education in practice exploration of the issues in terms of students curricula pedagogies and organising formal institutions Conceptual challenges for international education in the future This handbook is an essential resource for those who are involved in the practice and academic study of international education It will be of particular interest to researchers and teachers in universities governmental and private curriculum development agencies examination authorities administrators and teachers in schools This volume is another valuable SAGE contribution to the expanding literature on international education Not all handbooks are described as essential reading but this one will be and will become an indispensable work of reference highly recommended for education libraries both academic and governmental and for the bookshelves of individual researchers and all involved in international education the three editors and their fellow authors can take a collective pride in having given us an excellent volume which very successfully completes a chronological and theoretical journey through the issues practices and future questions presented by international research and practice in international education Journal of Research in International Education

Democracy's Promise Janelle Wong, 2008-12-18 Given the massive demographic changes in the United States during the past few decades understanding the place of immigrants in the public sphere has never been more critical Democracy's Promise examines both the challenges and opportunities posed to American civic institutions by the presence of increasing numbers of immigrants Author Janelle Wong argues that the low levels of political participation among contemporary immigrants are not due to apathy or preoccupation with their homeland but to the inability of American political parties and advocacy organizations to mobilize immigrant voters Wong's rich study of Chinese and Mexican immigrants in New York and Los Angeles complements traditional studies of political behavior and civic institutions while offering a nuanced examination of immigrants political activity Democracy's Promise will appeal to a broad spectrum of social scientists and ethnic studies scholars who study or teach immigration racial and ethnic politics political participation civic engagement and American political institutions In addition it will appeal to community organizers and party activists who are interested in issues of race and ethnicity immigration political participation and political mobilization Janelle Wong is Assistant Professor of Political Science and American Studies and Ethnicity at the University of Southern California As political parties perhaps decline in the United States as civic organizations perhaps move away from direct participatory politics and as the number of immigrants certainly increases what will link new Americans to the political realm Janelle Wong answers this important question clearly with elegance nuance rich description and galvanizing provocativeness Her evidence is compelling and her sense of urgency about the need for parties to look beyond short term interests even more so Jennifer L. Hochschild Harvard University Wong draws on the Latino and Asian immigrant experience with specific examples from the Chinese and Mexican communities of New York and Los Angeles to show how the political parties have largely failed to organize these groups and why labor unions and immigrant advocacy organizations have stepped in to take their place Far

from disuniting America she clearly shows that bringing these groups into the political fray is central to the project of renewing American democracy John Mollenkopf CUNY Graduate Center A scathing critique of the role of parties in the mobilization of new immigrants and an invaluable analysis of alternative pathways of mobilization through community organizations Michael Jones Correa Cornell University By employing multiple empirical methods including in depth interviews and sophisticated survey analyses Janelle Wong provides a compelling account of the political activities and allegiances of America's Asian and Latino immigrants that challenges much conventional wisdom Often the political parties are failing to reach out to these groups and often immigrants remain concerned about their home countries but they are nonetheless increasingly active in American politics in ways that may do much to shape the course of American political development in the 21st century Democracy's Promise is a major contribution to our understanding of this crucial dimension of American politics Rogers M Smith University of Pennsylvania Democracy's Promise challenges political parties to reexamine their priorities for mobilizing new voters and identifies the critical role civic institutions play in invigorating participation among immigrant citizens Wong's analysis is at once precise and expansive illuminating the contours of Latino and Asian American political incorporation and provoking thoughtful debate on inclusion in democratic theory Jane Junn Rutgers University *Democratic Theorists in Conversation* J. Gagnon, 2015-12-11 Democracy has changed considerably in recent years to the extent that our contemporary understanding differs greatly from long held democratic values In this collection renowned democratic theorists from Noam Chomsky to Francis Fukuyama give their thoughts on new democratic theory and its implications for the study and practice of democracy *The SAGE Handbook of Nations and Nationalism* Gerard Delanty, Krishan Kumar, 2006-06-14 With its list of distinguished contributors and its wide range of topics the handbook is surely destined to become an invaluable resource for all serious students of nationalism Michael Billig Professor of Social Sciences at Loughborough University and author of Banal Nationalism SAGE 1995 The persistence some would say revival of nationalism across the recent history of modernity in particular the past two decades has taken many scholars in the social sciences by surprise In response interest in the analysis of nationalism has increased and given rise to a great variety of new angles under which to study the phenomenon What was missing in the cacophony of voices addressing nationalism was a volume that brought them together and confronted them with each other This handbook does just that It deserves particular praise for the wide range of approaches and topic included and for the systematic attempt at studying nationalism as a phenomenon of our time not a remnant from the past Peter Wagner Professor of Social and Political Theory European University Institute and Professor of Sociology University of Warwick For students concerned with the contemporary study of nationalism this will be an invaluable publication The three fold division into approaches themes and cases is a very solid and sensible one The editors have commissioned essays from leading scholars in the field and this handbook provides the best single volume overview of contemporary nationalism John Breuilly Professor of Nationalism and

Ethnicity London School of Economics Nationalism has long excited debate in political social and cultural theory and remains a key field of enquiry among historians anthropologists sociologists as well as political scientists It is also one of the critical media issues of our time There are however surprisingly few volumes that bring together the best of this intellectual diversity into one collection This Handbook gives readers a critical survey of the latest theories and debates and provides a glimpse of the issues that will shape their future Its three sections guide the reader through the theoretical approaches to this field of study its major themes from modernity to memory migration and genocide and the diversity of nationalisms found around the globe The overall aim of this Handbook is to relate theories and debates within and across a range of disciplines illuminate themes and issues of central importance in both historical and contemporary contexts and show how nationalism has impacted upon and interacted with other political and social forms and forces This book provides a much needed resource for scholars in international relations political science social theory and sociology

Citizenship and Identity

John Schwarzmantel, 2003-08-29 Citizenship and Identity offers an analysis of contemporary politics and of the scepticism and apathy which characterise the political life of modern democracies Starting from exploration of liberal democracy and a critique of the fragmentation of contemporary politics this book develops a republican perspective as an alternative framework for political institutions and civic participation

The Sociology of Islam

Bryan S. Turner, Kamaludeen Mohamed Nasir, 2016-03-03 Taking a thematic approach Bryan S Turner draws together his writings which explore the relationship between Islam and the ideas of Western social thinkers Turner engages with the broad categories of capitalism orientalism modernity gender and citizenship among others as he examines how Muslims adapt to changing times and how Islam has come to be managed by those in power

Governing the School under Three Decades of Neoliberal Reform

Richard Münch, 2020-03-23 This book provides a critical analysis of the neoliberal reform agenda of the economic governance of schools Focusing on the role of the United States in this process it explores the transformation of schools in this agenda from educational establishments to enterprises in a competitive education market The study uses Bourdieu to apply a field theoretical framework to a detailed empirical analysis of the current changes of school government Chapters explore education bureaucracy reform and the effect of outside organizations on pedagogy and testing The book reveals how far the promises of corporate education reform are from reality and concludes with a plea for a realistic view of school's capabilities It goes beyond the state of the art with its focus on how the governance of education school and instruction is changing with the replacement of educracy by an education industrial complex The book will be of great interest for academics postgraduate students administrators and politicians in the field of education policy the governance of school systems and schools The book also has an international appeal as it studies a global transformation of the field of education

Inclusion and Exclusion in the Liberal Competition State

Richard Münch, 2012-07-26 This book examines the increasingly international division of labour which promotes transnational integration It analyses the change in worker solidarity as it moves from

collective national welfare to a transnational inclusion of workers from various links in the production chain Examining three types of welfare regimes within the USA Germany Denmark and Sweden the author addresses how and why globalization is furthering the change from the welfare state to the competition state The book considers in particular the change to solidarity taking place because of the internationalization of labour division a change away from the segmented and differentiated system of nation states with strong internal national solidarity to broader more inclusive and cross border labour identity and inclusion Analysing the deeper moral consequences of a globalised labour society such as the paradigms of inclusion and justice this book considers the implications of transnational labour on national welfare politics and looks at the increasing significance of the transnational and national politics of inclusion in social policy education minority rights immigration and gender equality Inclusion and Exclusion in the Liberal Competition State will be of interest to scholars and students of political science sociology and social policy studying welfare state change

Crossing the Neoliberal Line Katharyne Mitchell, 2004 As wealthy immigrants from Hong Kong began to settle in Vancouver British Columbia their presence undid a longstanding liberal consensus that defined politics and spatial inequality there Riding the currents of a neoliberal wave these immigrants became the center of vigorous public controversies around planning home building multiculturalism and the future of Vancouver Because of their class status and their financial capacity to remake space in their own ways they became the key to a reshaping of Vancouver through struggles that are necessarily both global and local in context involving global real estate enterprises the Canadian state city residents and others In her examination of the story of the integration of transnational migrants from Hong Kong Katharyne Mitchell draws out the myriad ways in which liberalism is profoundly spatial varying greatly depending on the geographical context In doing so Mitchell shows why understanding the historically and geographically contingent nature of liberal thought and practice is crucial particularly as we strive to understand the ongoing societies transition to neoliberalism Author note Katharyne Mitchell is Professor of Geography and the Simpson Professor of the Public Humanities at the University of Washington

European Identities in Discourse Franco Zappettini, 2019-05-02 Based on empirical research this book closely analyses how European identities are discursively produced It focuses on discourse from members of a civic association active in promoting democracy and attempting participation in the transnational public sphere Unlike previous books that have addressed the question of European identity from top down stances or through methodological nationalism this book engages with the multifaceted concept of transnationalism as a key to the negotiation of glocal identities Applying a discourse historical approach DHA through a transnational reading it shows how grassroots actors speakers construct their different cultural and political affiliations as both world and European citizens They negotiate institutional identities and historical discourses of nationhood through new forms of mobility cultural diversity and the imagination of Europe as a proxy for a cosmopolitan civil society These discourses are ever more important in a fractured and polarised Europe falling prey to contrary discourses of

nationhood and ethnic solidarity Highlighting how transnational narratives of solidarity and the de territorialisation of civic participation can impact on the re imagination of the European community beyond tropes like Fortress Europe or intragovernmental politics this important book shows how identification processes must be read through historical and global as well as localised contexts

Social Theory in the Twentieth Century and Beyond Patrick Baert, Filipe Carreira da Silva, 2025-09-04 This revised edition of Patrick Baert's widely acclaimed *Social Theory in the Twentieth Century* now benefitting from the collaboration of Filipe Carreira da Silva has been brought right up to date with cutting edge developments in social theory today It offers an easy to read but provocative account of the development of social theory covering a range of key figures and classic schools of thought The authors bridge the gap between philosophy and social theory locating the theoretical views of individuals such as Michel Foucault Anthony Giddens and Jürgen Habermas within wider historical traditions The revised edition includes new material on French pragmatist sociology and cultural sociology and on contemporary social thinkers such as Zygmunt Bauman Ulrich Beck Manuel Castells Randall Collins Michael Mann Saskia Sassen and Theda Skocpol The authors conclude with a bold new pragmatist agenda for social theory and the social sciences Written in a lively style and avoiding jargon *Social Theory in the Twentieth Century and Beyond* is aimed at students who wish to gain an understanding of the main debates and dilemmas driving social theory Like its predecessor it will be a standard introduction to modern social theory for students in sociology politics and anthropology

Multilevel Citizenship Willem Maas, 2013-05-30 *Multilevel Citizenship* challenges the dominant conception of citizenship as legal and political equality within a sovereign state demonstrates how citizenship is constructed by political and legal practices and explores alternative forms of membership in substate suprastate and nonstate political communities

Women, Migration and Citizenship Alexandra Dobrowolsky, 2016-02-17 Given the recent and rapid changes to migration patterns and citizenship processes this volume provides a timely compelling empirical and theoretical study of the gendered implications of such developments More specifically it draws out the multiple connections between migration and citizenship concerns and practices for women The collection features original research that examines women's diverse immigrant and refugee experiences and exposes how gender ideologies and practices organize migrant citizenship in its various dimensions at the local national and transnational levels The volume contributes to theoretical debates on gender migration and citizenship and provides new insights into their interrelation It includes rich case studies that range from the Philippines and Somalia to the Caribbean and from Australasia to Canada and Britain Designed to have a multidisciplinary appeal it is suitable for courses on migration diversity gender race ethnicity law and public policy comparative politics and international relations

urban centers concentrate organizational service and communication infrastructures amplifying both the influence of networks and the importance of global flows the urban policy and theorization emphasis has to shift towards the performative contingent and material aspects of cities The theoretical effort of M nch reinforces the explanatory power of both theoretical research and practical problem solving by laying the foundations of a theory of modernity systems of accumulation and action M nch s sociology allows for the analytical and historical description of individual and collective action Post traditional connections among anthropology philosophy political economy and history make possible interdisciplinary arenas of inquiry defined more by subject than by discipline guiding the process of clarification of links among multiple sites where researcher can pursue his or her subject matter using the methodology of multi sited anthropology M nch s theorization of interpenetration systems and action allows for the reconstruction of the relations between economy and culture as analytical ideal types that allow for variation and change M nch s development of Parsons Weber s and Durkheim s sociology theorizes modern development in terms that connect systems of economic cultural social and political accumulation into a dynamic structure of related contradictions showing historical and geographical variations In temporally spatially and socially specific ways urban spaces actively contribute to the formation of economies cultures societies and politics Cities serve as sites of strategic centrality interrelated diversity and mobile interconnection for individual and collective actors entering into spat

Crossing Boundaries Brian D. Behnken, Simon Wendt, 2013-06-27

Crossing Boundaries Ethnicity Race and National Belonging in a Transnational World explores ethnic and racial nationalism within a transnational and transcultural framework in the long twentieth century late nineteenth to early twenty first century The contributors to this volume examine how national solidarity and identity with their vast array of ideological political intellectual social and ethno racial qualities crossed juridical territorial and cultural boundaries to become transnational how they altered the ethnic and racial visions of nation states throughout the twentieth century and how they ultimately influenced conceptions of national belonging across the globe Human beings live in an increasingly interconnected transnational global world National economies are linked worldwide information can be transmitted around the world in seconds and borders are more transparent and fluid In this process of transnational expansion the very definition of what constitutes a nation and nationalism in many parts of the world has been expanded to include individuals from different countries and more importantly members of ethno racial communities But crossing boundaries is not a new phenomenon In fact transnationalism has a long and sordid history that has not been fully appreciated Scholars and laypeople interested in national development ethnic nationalism as well as world history will find Crossing Boundaries indispensable From
Empire to Community Amitai Etzioni, 2015-01-06 Whether one favors the U S global projection of force or is horrified by it the question stands where do we go from here What ought to be the new global architecture Amitai Etzioni follows a third way drawing on both neoconservative and liberal ideas in this bold new look at international relations He argues that a clash of

civilizations can be avoided and that the new world order need not look like America Eastern values including spirituality and moderate Islam have a legitimate place in the evolving global public philosophy Nation states Etzioni argues can no longer attend to rising transnational problems from SARS to trade in sex slaves to cybercrime Global civil society does help but without some kind of global authority transnational problems will overwhelm us The building blocks of this new order can be found in the war against terrorism multilateral attempts at deproliferation humanitarian interventions and new supranational institutions e g the governance of the Internet Basic safety human rights and global social issues such as environmental protection are best solved cooperatively and Etzioni explores ways of creating global authorities robust enough to handle these issues as he outlines the journey from empire to community Religion and National Identities in an Enlarged Europe

Turkey and the European Union Selcen Öner, 2011-02-16 European identity has always been in a state of construction With the creation of the European Union however this construction now takes place within an institutional framework introducing a number of new variables Selcen Öner's Turkey and the European Union The Question of European Identity is an in depth analysis of the influence of these two entities on each others identity as Europeans in a society of increasing social political and cultural connectedness The mutual influence between Turks and Europeans gained significant momentum in 1999 when the European Union granted official candidate status to Turkey at that year's Helsinki Summit Turkey's Europeanness is still being debated despite the official stance that fulfilling the Copenhagen criteria and adopting the EU

acquis are enough for being a full member of the EU. These debates have even led to arguments between political elites of the European Union about their privileged partnership with Turkey. When comparing the attitudes of the European Union towards Turkey versus those towards Central and Eastern Europe, one could argue that that return to Europe discourse has accelerated the membership of the latter but not the former. Currently, Turkey is neither considered an other nor a member of the family. Rather, Turkey is commonly relegated to the role of crucial neighbor or strategic partner by the political elites of the EU. *ner's* study analyzes a series of interviews conducted with several members of the European Parliament and sheds serious light on the fact that discussions on Turkey's membership in terms of her Europeanness reveal countless ambiguities in defining European identity. It is clear that there is no common understanding or definition of European identity even amongst political leaders in the EU who challenge Turkey's authenticity as a member of European society. Thus, *Selcen ner's* *Turkey and the European Union: The Question of European Identity* argues that the position of Turkey vis vi
