Making Of Southeast Asian Nations, The: State, Ethnicity, Indigenism And Citizenship Leo Suryadinata, 2014-11-21 The idea of the nation is a Western concept which has been applied to Southeast Asia It is a project which has been in progress since the last century but is still incomplete Various theoretical frameworks which are associated with nation and nation building in the Southeast Asian region have been briefly dealt with The book aims to examine the making of the nations in Southeast Asia using both historical and political science approaches Concepts related to nation such as ethnicity state indigenism and citizenship have also been analysed in the Southeast Asian context Specific examples of nation building in five major Southeast Asian countries are presented Problems and prospects of Southeast Asia s nation building and citizenship building in the era of globalisation are also discussed

**International Relations in Southeast Asia** Donald E. Weatherbee, 2014-11-25 This fully revised and updated edition of Donald E Weatherbee's widely praised text offers a clear and comprehensive introduction to international relations in contemporary Southeast Asia The author analyzes the efforts of the Southeast Asian states to adapt collectively through the ASEAN Community building process to the challenges of traditional intraregional security issues the requirements of the international economy and the political demands of nontraditional issues such as democracy human rights and environmental degradation Weatherbee warns that autonomy expressed in the claim to the ASEAN Community's centrality to Asia could be threatened by the strategic impact of China's rise and America's recommitment to regional strategic balance An invaluable guide to the region this thoughtful and lucid work will be an essential text for courses on Southeast Asia and on the international relations of the Asia Pacific

**Southeast Asia in Search of an ASEAN Community** C. Rodolfo Severino, 2006 Talking about ASEAN this volume reappraises the organization from the inside through controversial or perplexing issues such as the ASEAN Way the accession of the new members including Myanmar the principle of non interference regional security regional economic integration the haze and SARS and ASEAN's future

**Political Legitimacy in Southeast Asia** Muthiah Alagappa, 1995 Despite the end of the Cold War security continues to be a critical concern of Asian states Allocations of state revenues to the security sector continue to be substantial and have in fact increased in several countries As Asian nations construct a new security architecture for the Asia Pacific region Asian security has received increased attention by the scholarly community But most of that scholarship has focused on specific issues or selected countries This book aims to lay the groundwork for a comprehensive in depth understanding of Asian security by investigating conceptions of security in sixteen Asian countries The book undertakes an ethnographic country by country study of how Asian states conceive of their security For each country it identifies and explains the security concerns and behavior of central decision makers asking who or what is to be protected against what potential threats and how security policies have changed over time This inside out or bottom up approach facilitates both identification of similarities and differences in the security thinking and practice of Asian countries and exploration of their consequences The crucial insights into the dynamics of international security in the region provided by this approach can form the basis for further inquiry including debates about the future of the region

**U.S. Alliances and Emerging Partnerships in Southeast Asia**, 2009-07-17 The United States in the end finds itself in an excellent indeed advantageous position in Southeast Asia A reservoir of good will toward

the United States remains extant in the region Indeed when a region desires more U S engagement particularly a region as strategically important to U S interests as Southeast Asia it would be foolhardy to ignore that circumstance or take it for granted It requires that U S elites although consumed by several other compelling immediate challenges take a look again at a region largely neglected over the last generation or more in order to consider longer term strategic benefits *Southeast Asia* Sree Kumar, Sharon Siddique, 2008

**Nation-State Cyber Offensive Capabilities** Eduardo Izycki, 2022-01-31 One of the most striking features of the 21st century is the widespread adoption of information technology in every aspect of the modern life of individuals society or nation states When compared to land sea air and space cyberspace has unique features Its geography is easily modified oceans and mountains are hard to be changed but entire cyberspace regions can be turned on or off with a button click Moreover anonymity the low cost of acquiring or developing offensive capabilities and the plausible deniability of actions have turned this dimension into a theater of operations for nation states This book does not focus on the worst case scenario where cyber offensive actions will revolutionize war Instead it intends to provide empirical analysis regarding the current state of cyber conflict This book presents evidence of 29 countries engaging in state sponsored actions and 85 nations acquiring cyber offensive technologies from private vendors The numbers challenge the average perception of concentration of cyber capabilities in a few traditional actors Cyberspace provides alternatives for the bargaining and interactions to nation states below the threshold of the use of force As a result actors can achieve strategic outcomes and influence the balance of power without resorting to an armed attack and minimizing the risk of a military or nuclear response from their targets Secularism, Religion, and Democracy in Southeast Asia Vidhu Verma, 2019-08-24

Until the 1990s secularism was understood largely as exclusion of religion from the public domain However in the last two decades the world has witnessed the return of religion as a medium and subject of national regional and global politics With such a shift the previously unquestioned Western values of modernity and secularism find themselves at loggerheads with the increasing assertion of religious identity which results in difference based conflicts This antagonism also gives rise to a vibrant religiously pluralistic civil society and speaks of a post secular turn in modern Southeast Asian democracies

*Secularism Religion and Democracy in Southeast Asia* tries to understand the rise of religion in modern democracies and how everyday economic social and political conditions aid this post secular phenomenon in Southeast Asia Setting itself apart from most studies of religion in Southeast Asia through its regional focus this volume explores the ideas practices state responses and anxieties related to the religious secular divide in this geopolitical region

Nazeer-Ikeda, 2020-10-29 The relationship between teacher education and internationalization is often regarded as one that has just begun sparked by globalization and its knowledge economy This book questions such an assumption by arguing that although contemporary demands on teacher education have intensified the need for internationalization teacher education and internationalization have a deep and complex relationship

which is context dependent and has developed differently over time This book urges its readers to question and rethink overly nationalistic approaches to teacher education It shows how the internationalization of teacher education could be used as a strategic tool to support sustainable educational development and meet labor market demands for twenty first century competencies It puts the spotlight on the imperatives for internationalizing teacher education and its present forms and considers this current phenomenon in the context of Singapore This nation state has a history of internationalization albeit with differing rationales dimensions and strategies Internationalization has been a key driver of the Singapore education system s sustained growth from its humble beginnings to its present state as one of the best performing education systems in the world This book will be of great interest to policy makers academics researchers and graduate students in the fields of international and comparative education teacher education and South East Asian studies

Eades, Joseph Bosco, 2004-01-01 CHOICE OUTSTANDING BOOK OF THE YEAR 2005 Despite the growth of interest in the history of anthropology as a over the last two decades surprisingly little has been published in English on the development of anthropology in East and Southeast Asia and its relationship to the rest of the academic world system The anthropological experience in this region has been varied Japanese anthropology developed early and ranks second only to that of the United States in terms of size Anthropology in China has finally recovered from the experience of invasion war and revolution and now flourishes both on the mainland and in Taiwan Scholars in Korea Malaysia and the Philippines have also attempted to break with the legacy of colonialism and develop research relevant to their own national needs This book includes accounts of these developments by some of the most distinguished scholars in the region Also discussed are issues of language authorship and audience and the effects these have on writing by anthropologists whether native or foreign The book will be invaluable to anyone with an interest in the anthropology of East and Southeast Asia or the development of anthropology as a global discipline      *A New History of Southeast Asia* M.C.
