National Identity and Great-Power Status in Russia and Japan Tadashi Anno, 2018-09-03 Having suffered military defeat at the hands of advanced Western powers in the 1850s Russia and Japan embarked upon a program of catch up and modernization in the late 19th Century While the two states sought in the main to replicate the successes of the advanced great powers of the West the discourse on national identity among Russian and Japanese elite in this period evinced a considerable degree of ambivalence about Western dominance With the onset of the crisis of power and legitimacy in the international order ushered in by the First World War this ambivalence shifted towards more open revolt against Western dominance The rise of communism in Russia and militarism in Japan were significantly shaped by their search for national distinctiveness and international status This book is a comparative historical study of how the two non Western great powers emerged as challengers to the prevailing international order in the interwar period each seeking to establish an alternative order Specifically Anno examines the parallels and contrasts in the ways in which the Russian and Japanese elites sought to define the two countries national identities and how those definitions influenced the two countries attitudes toward the prevailing order At the intersection of international relations theory comparative politics and of historical sociology this book offers an integrated perspective on the rise of challengers to the liberal international order in the early twentieth century

The formation of Croatian national identity Alex Bellamy, 2013-07-19 This electronic version has been made available under a Creative Commons BY NC ND open access license This book assesses the formation of Croatian national identity in the 1990s It develops a novel framework calling into question both primordial and modernist approaches to nationalism and national identity before applying that framework to Croatia In doing so the book provides a new way of thinking about how national

identity is formed and why it is so important An explanation is given of how Croatian national identity was formed in the abstract via a historical narrative that traces centuries of yearning for a national state The book shows how the government opposition parties dissident intellectuals and diaspora groups offered alternative accounts of this narrative in order to legitimise contemporary political programmes based on different versions of national identity It then looks at how these debates were manifested in social activities as diverse as football religion economics and language This book attempts to make an important contribution to both the way we study nationalism and national identity and our understanding of post Yugoslav politics and society

National Identity and State Formation in Africa Manuel Castells, Bernard Lategan, 2021-03-17 This book examines how the interplay between globalization and the assertion of local identities is reshaping the political landscape of Africa While defending their values against external forces people simultaneously and paradoxically use the interconnectivity of global networks to maximize their particular interests Focusing on the relation between national identity and state formation the authors explore the far reaching consequences of these contradictory dynamics Although Africa shares many common trends with other parts of the world it also displays distinctive features A region characterized by the increased mobility of people goods and ideas challenges some conventional assumptions of statecraft and also highlights the advantages of federalism not merely as a constitutional option but as a pragmatic device for managing diversity and holding fragile states together The book further explores emerging types of state formation in the same political space as exemplified by the combination of elements of a kingdom an independent state and a national power base in the province of KwaZulu Natal and the careful crafting of an alternative state within a state by the Solidarity Movement in South Africa Informed by examples and case studies drawn from different parts of Africa this book will be of great interest to students and scholars of Africa politics sociology media studies and the social sciences more generally

British Foreign Policy, National Identity, and Neoclassical Realism Amelia Hadfield-Amkhan,2010-10-16 This groundbreaking study offers a genuinely multidisciplinary exploration of cultural influences on foreign policy Through an innovative blend of historical analysis neoclassical realist theory and cultural studies Amelia Hadfield Amkhan shows how national identity has been a catalyst for British foreign policy decisions helping the state to both define and defend itself Representing key points of crisis from the past two centuries her case studies include the 1882 attempt to construct a channel tunnel to France the frantic 1909 Dreadnought race with Germany the 1982 Falklands War with Argentina and the 2003 decision to remain outside the Eurozone The author argues that these events marking the decline of a great power have forced Britain s society and government into periods of deep self reflection that are carved into its culture and etched into its policy stances on central issues of sovereignty territorial integrity international recognition and even monetary policy

Culture, Communication and National Identity Richard Collins,1990-10-01 There can be no political sovereignty without culture sovereignty So argued the CBC in 1985 in its evidence to the Caplan Sauvageau Task Force on Broadcasting Policy Richard Collins challenges this assumption He argues in this study of nationalism and Canadian television policy that Canada s political sovereignty depends much less on Canadian content in television than has generally been accepted His analysis focuses on television drama at the centre of television policy in the 1980s Collins questions the conventional image of Canada as a weak national entity undermined by its population s predilection for foreign television Rather he argues Canada is held together not by a shared repertoire of symbols a national culture but by other social forces notably political institutions Collins maintains that important advantages actually and potentially flow from Canada s wear national symbolic culture Rethinking the relationships between television and society in Canada may yield a more successful broadcasting policy more popular television programming and a better understanding of the links between culture and the body politic As the European Community moves closer to political unity the Canadian case may become more relevant to Europe which Collins suggests already fears the Canadianization of its television He maintains that a European multilingual society without a shared culture or common European audio visual sphere and with viewers watching foreign television can survive successfully as a political entity just as Canada has

been recurring since the nation's 1960 independence. Although many scholars have analyzed the violence through different perspectives and several solutions applied, violence has continued to prevail within the region. The ability to manage a conflict depends to a larger extent on the in-depthness of its analysis. This book is not like any other written about this issue. It is a research study conducted under the guidance of USA Review Board and highly experienced academic scholars of Conflict Analysis and Resolution. It was categorized as the most comprehensive report on the conflict. Extensive literature review related conflict theories and concepts were applied for proper analysis. The goal for this publication is to shed limelight to this perspective for possible solution to a conflict that has lingered for more than 40 years with genocidal deaths and massive loss of properties.

Democratization, National Identity and Foreign Policy in Asia Gilbert Rozman, 2021-04-20 How can democratization move forward in an era of populist nationalist backlash? Many countries in Asia and elsewhere face the challenge of navigating between China and the United States in a period of intensifying polarization in their policies tied to democracy. East Asia has shown the way to democratization in Asia with Japan, South Korea and Taiwan linking national identity to democratization. In other parts of Asia, especially Southeast Asia, nationalist governments have tended to move away from democratization as happened in Hong Kong at China's insistence. This book investigates how national identity can both help and hinder democratization, illustrated by a series of examples from across Asia. A valuable guide for students and scholars both of democratization and of Asian politics.

The Australian Constitution and National Identity Anna Olijnyk, Alexander Reilly, 2023-05-11 What does Australia's Constitution say about national identity? A conventional answer might be not much. Yet recent constitutional controversies raise issues about the recognition of First Peoples, the place of migrants and dual citizens, the right to free speech, the nature of our democracy and our continuing connection to the British monarchy. These are constitutional questions, but they are also questions about who we are as a nation. This edited collection brings together legal, historical and political science scholarship. These diverse perspectives reveal a wealth of connections between the Australian Constitution and Australia's national identity.

Postcolonial Education and National Identity Rowena Azada-Palacios, 2024-10-31 Recognizing the strategic role that national identities play in post-colonial struggles for justice, this book conceptualizes a new approach to teaching national identity that following Hannah Arendt emphasizes children's ability to renew culture. The book uses the Philippine colonial experience as a case study and includes a genealogy of Hannah Arendt's concept of the social, including an analysis of how she used this idea to explore the role that schools play within the political community. Azada-Palacios problematizes the way that national identity is valued as an educational goal in Philippine schools and the way that Philippine citizenship education continues to aspire towards a homogeneity of culture. Through an examination of colonial era documents, she traces this characteristic of colonial history and identifies this aspiration as an unreflective perpetuation of American colonial educational policy that has not been sufficiently criticized.

Migration and the Construction of National Identity in Spain Désirée Kleiner-Liebau, 2009 Public debate about immigrant

integration has often led to a heightened awareness or even a collective redefinition of identity. Such processes are studied through the unique example of Spain. **Struggling for Recognition** Martin Sökefeld, 2008. As a religious and cultural minority in Turkey, the Alevis have suffered a long history of persecution and discrimination. In the late 1980s they started a movement for the recognition of Alevi identity in both Germany and Turkey. Today they constitute a significant segment of Germany's Turkish immigrant population. In a departure from the current debate on identity and diaspora, Sökefeld offers a rich account of the emergence and institutionalization of the Alevi movement in Germany, giving particular attention to its politics of recognition within Germany and in a transnational context. The book deftly combines empirical findings with innovative theoretical arguments and addresses current questions of migration, diaspora, transnationalism, and identity.

Flamenco Music and National Identity in Spain Professor William Washabaugh, 2013-01-28. Flamenco Music and National Identity in Spain explores the efforts of the current government in southern Spain to establish flamenco music as a significant patrimonial symbol and marker of cultural identity. Further, it aims to demonstrate that these Andalusian efforts form part of the ambitious project of rethinking the nation-state of Spain and of reconsidering the nature of national identity. A salient theme in this book is that the development of notions of style and identity are mediated by social institutions. Specifically, the book documents the development of flamenco's musical style by tracing the genre's development between 1880 and 1980 and demonstrating the manner in which the now conventional characterization of the flamenco style was mediated by krausist, modernist, and journalist institutions. Just as importantly, it identifies two recent institutional forces that of audio recording and cinema that promote a concept of musical style that sharply contrasts with the conventional notion. By emphasizing the importance of forward-looking notions of style and identity, Flamenco Music and National Identity in Spain makes a strong case for advancing the Spanish experiment in nation-building but also for rethinking nationalism and cultural identity on a global scale.

Music, National Identity and the Politics of Location Vanessa Knights, 2016-04-29. How are national identities constructed and articulated through music? Popular music has long been associated with political dissent, and the nation-state has consistently demonstrated a determination to seek out and procure for itself a stake in the management of its popular musics. Similarly, popular musics have been used from the ground up as sites for both populist and popular critiques of nationalist sentiment from the position of both a globalizing and a local vernacular culture. The contributions in this book arrive at a critical moment in the development of the study of national cultures and musicology. The book ranges from considerations of the ideological focus of cultural nationalism through to analyses of musical hybridity and musical articulations of other kinds of identities at odds with national identity. The processes of global homogenization are thereby shown to have brought about a transitional crisis for national cultural identities; the evolution of these identities, particularly with reference to the concept of authenticity in music, is situated within broader debates on power, political economy, and constructions of the self. Theorizations of practice are employed after the manner of Bourdieu, Gramsci, Goffman.

Gadamer Habermas Bhabha Lacan and Zizek Each contribution acts as a case study to characterize the strategies through which differing modes of musical discourse engage critique or obscure discourses on national identity The studies include discussions of musical representations of Irishness the relationship between Afropop and World Music Norwegian club music the revival of traditional music in Serbia resistance to cultural homogeneity in Brazil contemporary Uyghur song in Northwest China rap and race in French society technobanda from the barrios of Los Angeles and Spanish Moroccan ra In this way the book seeks to characterize the ideological configurations that help to activate and sustain hegemonic amb
