Shifting Grounds Burak Kadercan, 2023 In *Shifting Grounds* Burak Kadercan draws upon a wide variety of cases ranging from the Thirty Years War to ISIS to examine the relationship between territorial ideas and armed conflict He argues that states and societies have adhered to different forms of territoriality across time and space and territory as well as territorial control has meant different things in different time periods and regions Ranging broadly across different eras and world regions the book sheds light on the shifting nature of the relationship between territorial ideas and armed conflict not only in the context of the distant the past but also in present day global politics International Relations Theory Michael Haas, 2016-12-27 While many texts on international relations deal only with ideologies this book goes beyond discussion of ideology to provide an understanding of how global economics politics and society operate The book begins with a history of the International Studies Association which was founded to develop empirically based knowledge and was opposed to ideological isms as biased guides to policy The book focuses on four major paradigms Marxian Mass Society Community Building and Rational Choice with diagrams indicating their empirical predictions over time The Marxian paradigm focuses on scientific claims of Marx and Engels The Mass Society paradigm explains why democracies become dysfunctional The Community Building paradigm explains how communities can be and are built at the local national regional and international levels The Rational Choice paradigm assembles proposed explanations of reason based economic political and social life to demonstrate what they have in common Other candidates for paradigms are reviewed with a focus on why they need further development to become major paradigms at the decision making dyadic societal national and international system levels of analysis Cruising in the Global Economy Christine B.N. Chin, 2016-12-05 The business of cruise tourism in recent years has commanded news media attention especially on issues of environmental pollution passenger safety and worker rights yet consumer interest in cruise vacations has not been adversely affected by negative publicity and it continues to grow at an average of 8 9% per annum This unique mode of business focusing on the production and consumption of pleasure at sea and on land offers us an unprecedented opportunity to analyze the manner in which ongoing economic restructuring processes to

bring about free markets in goods services and labour can and does involve both life on land and at sea This interdisciplinary analysis elicits an examination of states relationship to the maritime regulatory structure governing ship ownership management and operations cruise lines business strategies development of port communities to capture cruise related revenue changing leisure consumption patterns and meanings and the employment of foreign migrant workers as seafarers

Straight Power Concepts in the Middle East Gregory Harms,2010-04-09 How did the US become a world power How did it become involved in the Middle East What is the history and nature of its special relationship with Israel Given the increase in tensions in the Middle East and the United States involvement in them news coverage is in abundance Yet the reportage and discussion of American foreign policy is often narrow in scope offering little background or context And yet the historical record sharply contrasts with reportage Guiding the reader through a panoramic sweep of world and American history we see how the US became a world power how the Middle East became modern and how Israel became an American strategic asset Disavowing the rhetoric commonly used by heads of state press secretaries news media and commentators we see how recent turmoil is closer to business as usual Political Marketing Darren G. Lilleker,Jennifer

Lees-Marshment,2005-08-06 Political marketing has become a global phenomenon as parties try to copy the market oriented approach employed by Tony Blair to win power for New Labour in 1997 It raises fresh perspectives on the more established political marketing practices in the UK and US such as how to incorporate political leadership within the market oriented framework and the democratic implications when faced with the actual business of governing This book also highlights how the market oriented party approach has spread around the world including Europe and the new democracies of Brazil and Peru The collection also introduces the debate on whether such practices enhance or undermine democracy raising important questions on the future of political marketing **War, Armed Force, and the People** Walter C. Opello

Jr.,2016-10-18 Throughout history innovations in military technology have transformed warfare which in turn affected state formation This interplay between warfare military technology and state formation is the focus of this text Theoretically grounded in the bellicist approach to the study of war and state which posits that war is a normal part of human experience the book argues that the threat of war by powerful predatory neighbors has been until relatively recently the prime mover of state formation Using a historical approach it explains how advances in military technology have transformed war and how new modes of war in turn have transformed forms of politico military rule especially with regard to the relationship between the state armed force and the people **Africa and International Relations in the 21st Century** S. Cornelissen,F.

Cheru,T. Shaw,2016-01-26 This book examines key emergent trends related to aspects of power sovereignty conflict peace development and changing social dynamics in the African context It challenges conventional IR precepts of authority politics and society which have proven to be so inadequate in explaining African processes Rather this edited collection analyses the significance of many of the uncharted dimensions of Africa s international relations such as the respatialisation of African

societies through migration and the impacts this process has had on state power the various ways in which both formal and informal authority and economies are practised and the dynamics and impacts of new transnational social movements on African politics Finally attention is paid to Africa's place in a shifting global order and the implications for African international relations of the emergence of new world powers and or alliances This edition includes a new preface by the editors which brings the findings of the book up to date and analyses the changes that are likely to impact upon global governance and human development in policy and practice in Africa and the wider world post 2015 **Political Science**

Revitalized Michael Haas, 2017-07-28 Political science has been described as a jigsaw puzzle with many specializations and subfields that do not talk to one another This book offers a solution that will advance the field from mid level theory to engage in cross fertilization through metatheoretical paradigms The book begins with a history of political science from the nineteenth century to the present followed by a paradigmatic history of political science including 6 metatheories in the pre behavioral era 12 in the behavioral era and the 4 major and several minor paradigms being developed today The book advances the goal of David Easton by proposing a neobehavioral political science including multimethodological innovations cross testing of paradigms and tenets of a new political science that can rise to become a truly theoretical science Each paradigm is diagramed to demonstrate the key concepts and their causal interconnections **Political Science Revitalized**

Filling the Jigsaw Puzzle with Paradigms poses an exciting and provocative argument for the future of the vast field of political science *International Governance and Law* Hanneke Van Schooten, Jonathan Verschuuren, 2008-01-01 Around the world the role of national regulation is often hotly debated This book takes as its starting point the fact that legislatures and regulators are criticized for overregulation and for producing poor quality regulation which ignores input from citizens and stifles private initiative This situation has enhanced the role of non state law in forms such as self regulation and soft law In this book international scholars in various fields of law as well as socio legal studies address the question to what extent non state law currently influences state regulation and what the consequences of non state law are likely to be for state regulation Drawing lessons for the state legislature and state regulators this innovative book will be of great interest to academic researchers and post graduate students in the fields of law regulation legal sociology legal theory law and economics and environmental law It will also be of interest to policy makers and regulators those working at ministries and government departments drafting legislation **Theory of World Security** Ken Booth, 2007-12-20

What is real What can we know How might we act This book sets out to answer these fundamental philosophical questions in a radical and original theory of security for our times Arguing that the concept of security in world politics has long been imprisoned by conservative thinking Ken Booth explores security as a precious instrumental value which gives individuals and groups the opportunity to pursue the invention of humanity rather than live determined and diminished lives Booth suggests that human society globally is facing a set of converging historical crises He looks to critical social theory and radical international theory

to develop a comprehensive framework for understanding the historical challenges facing global business as usual and for planning to reconstruct a more cosmopolitan future Theory of World Security is a challenge both to well established ways of thinking about security and alternative approaches within critical security studies *The Prison as Metaphor* Michael P. Marks, 2004 Whether wittingly or unwittingly scholars of international relations have peppered the field with a wide range of metaphors that serve as vehicles for theorizing about world affairs Yet as pervasive as metaphors are in international relations theory theorists efforts to employ metaphorical imagery to suggest new ways of thinking have been haphazard and sporadic In this book Michael P Marks suggests a new metaphor with which to conceptualize international relations the modern prison Many of the same questions that are asked about the so called anarchy of the international system are also frequently asked of life among prison inmates Marks finds that lessons from inmate relations can be applied to the study of international affairs This comparison between the prison and international relations reveals how the construction of human interaction in both realms is infinitely complex

Speaking the Nation Anandita Bajpai, 2018-07-04 Untangling the logical lexical and semantic patterns of the multiple official speeches of Indian prime ministers *Speaking the Nation* gauges how the Indian state has been projected by different governments in different times in the face of challenges from internal and external actors that put pressure on its leaders to safeguard their status as legitimate elites in power It analyses how Indian nationhood is consistently reshaped and reaffirmed by invoking its secular ethos and practice as well as the experience of market liberalization The book calls for serious engagement with political oratory in India A close reading of speeches since 1991 from Narasimha Rao to Narendra Modi it captures how through these crosscutting topics the prominent authors of the nation and the vanguards of the state speak India into being

ADMINISTRATIVE THEORY PARDEEP SAHNI, ETAKULA VAYUNANDAN, 2009-04-14 This book presents a detailed introduction to the fundamental concepts principles and processes of the field of public administration It provides comprehensive coverage of the major topics of this diverse field Intended primarily for undergraduate and postgraduate students of public administration and political science as well as for civil services aspirants this book will also be a handy reference for professionals in public service and social service The book presents an overview of the field of public administration as well as its fundamental aspects which include the theory of administration and the nature typology and structure of organisations It explains the major theoretical perspectives as well as two major specialised areas of the field public policy and development administration It also provides an extensive presentation of the prominent aspects of the public administration and management process span of control coordination communication authority and responsibility centralisation and decentralisation and accountability and control

Buen Vivir as an Alternative to Sustainable Development Natasha Chassagne, 2020-11-22 Until recently the concept of Buen Vivir has only been loosely articulated by practising communities and in progressive policy in countries like Ecuador What it actually means has been unclear and in the case of policy contradictory As such there has been a lack of understanding about

exactly what Buen Vivir entails its core principles and how to put it into practice This book based on extensive theoretical and field research of Buen Vivir as an alternative to sustainable development fills that gap and offers a concrete way forward It uses an ethnographic study in Cotacachi County in Ecuador s highland communities to explore how communities understand and practice Buen Vivir Combining this with what we already know about the concept theoretically the book then develops a framework for Buen Vivir with 17 principles for practice Exploring Buen Vivir s evolution from its indigenous origins academic interpretations and implications for development policy to its role in endogenous community led change this book will be of interest to policy makers and development professionals It will also be of great value to activists students and scholars of sustainability and development seeking grassroots social and environmental change

Terrorism in Africa

John Davis,2012-07-10 The study Terrorism in Africa The Evolving Front in the War on Terrorism represents a research endeavor aimed at increasing scholarly discourse on the ever expanding threat of terrorism and terrorist related violence in the region It offers the most wide ranging analysis of the sub national and transnational terrorists groups that have made Africa the second most violent region in the world Additionally the study expands the coverage of the multiple dynamics that indicate why terrorist related violence continues to increase in the region and closes with regional solutions to the threat of terrorism This collection of essays offers a comprehensive analysis of the states terrorist groups and critical issues that have increased the specter of terrorism in Africa The study is divided into three themes 1 the diversity of the terrorist threat among states in the region 2 the regional dynamics and the local response to terrorism and 3 regional solutions to the threat of terrorism in Africa

Between Sacred and Secular Knowledge Yanbi Hong,2021-11-10 This book examines how different social forces including state ideology and policies religious culture and ethnic identities and economic market forces affect Muslim parents perceptions and attitudes toward public and religious education Combining ethnographic fieldwork and a cognitive rationality framework this book investigates ethnic minorities educational attainment and its shaping mechanisms Instead of attributing the undereducation of ethnic minorities solely to structural factors such as economic constraints cultural conflicts and state policies this study focuses on the critical role of perceptions and expectations through which many structural factors function The fieldwork in a predominantly Muslim village in northwest China reveals that public education and religious education are complementary in the daily pursuit of well being And the study further argues that the practical oriented logic of rural Muslims sheds light on the research of inequality in educational attainment The book will be of interest to scholars and postgraduate students studying ethnic minority education in China Those who are researching on Islam and Muslims identity especially in a multiethnic society may also find this research insightful and helpful

Escaping the Self-Determination Trap Marc Weller,2009-05-31 There is new movement in the discussion about self determination and statehood The contested declaration of independence by Kosovo and Russia s recognition of the purported independence of Abkhasia and South Ossetia have caused significant controversy These developments may well put an end to the attempt

by governments to keep in place the highly restricted doctrine of self determination that has previously only been made available in the colonial context This monograph argues that classical self determination narrowly conceived in the colonial context cannot contribute to the resolution of the presently ongoing self determination conflicts around the world However this study finds that over the past few years a new practice of addressing self determination conflicts has emerged This practice significantly extends our understanding of the legal right to self determination and of the means that can be brought to bear in terminating secessionist conflicts

The Cosmopolitan State H Patrick Glenn, 2013-05-16 For more than two centuries the idea of the nation state has been widespread The expression is now widely used and is even to be unavoidable The nation state implies that the population of a state should be homogenous in terms of language religion and ethnicity the nation and the state should coincide However history demonstrates that there never has been and there never will be a nation state Human diversity is manifest in states of all sizes locations and origins This wide ranging book argues that there should be no regret in the recognition of this empirical reality since the notion of a nation state has been the justification for some of the worst atrocities in human history Since the nation state is impossible all states are cosmopolitan in character They are cosmopolitan regardless of the language of their constitutions or official teaching and regardless of the extent to which they officially recognize their own diversity The most successful states are those which are most successful in their own forms of cosmopolitanism Cosmopolitan ways are infinitely varied however and must be sought in the intricate workings of individual states The cosmopolitan character of states is necessarily reflected in their law The main instruments of legal cosmopolitanism have been those of common laws constitutionalism and what is best described as institutional cosmopolitanism The relative importance of these legal instruments has changed over time but all three have been constantly operative even in times of attempted national and territorial closure All three remain present in the contemporary cosmopolitan state understood in terms of cosmopolitan citizens cosmopolitan sources and cosmopolitan thought The cosmopolitan state is moreover the only appropriate conceptualization of the state in a time of globalization This book outlines the subtlety of the law of cosmopolitan states law which has survived through periods of nationalism and which provides the working methods for the reconciliation of diverse populations Combining law history political science political philosophy international relations and the new logics it demonstrates that the idea of the nation state has failed and should yield to an understanding of the state as necessarily cosmopolitan in character This will be invaluable reading to all those interested in constitutional law international law and political theory
