**Native Genius in Anonymous Architecture in North America** Sibyl Moholy-Nagy, 1957 *Native Genius in Anonymous Architecture*, by Sibyl Moholy-Nagy Sibyl Moholy-Nagy, 1957 **Native Genius in Anonymous Architecture** Sibyl Moholy-Nagy, 1957 **Pattern in the Material Folk Culture of the Eastern United States** Henry Glassie, 1971-10 Filled with brilliant insights and tantalizing leads *Constructing a Sense of Place* Haim Yacobi, 2017-05-15 While it is widely recognized that architects and their architecture play a key role in constructing a sense of place the inherent nexus between an architectural ideology and the production of national space and place has so far been neglected Focusing on the Zionist ideology this book brings together practising architects and academics to critically examine the role of architects architecture and spatial practices as mediators between national ideology and the politicization of space The book first of all sets out the wider context of theoretical debates concerning the role of architecture in the process of constructing a sense of place then divides into six main sections The book not only provides an innovative new perspective on how the Israeli state had developed but also sheds light on how architecture shapes national identity in any post colonial and settler state **French Encounters with the American Counterculture 1960-1980** Caroline Maniaque-Benton, 2016-12-05 French American interrelationships in the areas of design and creative thinking have been under acknowledged It is normally asserted that French architects looked to North America for technical lessons in the development of modern architecture in the 1960s but that the French cultural environment was generally hostile to American ideas This book includes interviews with French architects who visited the United States in the 1960s 1970s and then assumed influential positions in the press and education in France Some of these architects found in non mainstream America and its radical groups of architectural drop outs a liberating force free of the taint of American capitalism and the high investment technology Often living in alternative student communities they saw highly innovative low cost technical and structural systems placed in the service of collective forms of living which represented a critique not only of professional architectural practice but also of bourgeois forms of living Many of them also studied in American schools of architecture and came in contact with an intellectual and interdisciplinary style of architectural education unavailable in France at that time **Whose Tradition?** Nezar AlSayyad, Mark Gillem, David Moffat, 2017-10-06 In seeking to answer the question Whose Tradition this book pursues four themes Place Whose Nation Whose City People Whose Indigeneity Colonialism Whose Architecture and Time Whose Identity Following Nezar AlSayyad s Prologue contributors addressing the first theme take examples from Indonesia Myanmar and Brazil to explore how traditions rooted in a particular place can be claimed by various groups whose purposes may be at odds with one another With examples from Hong Kong a Santal village in eastern India and the city of Kuala Lumpur contributors investigate the concept of indigeneity the second theme and its changing meaning in an increasingly globalized milieu from colonial to post

colonial times Contributors to the third theme examine the lingering effects of colonial rule in altering present day narratives of architectural identity taking examples from Guam Brazil and Portugal and its former colony Mozambique Addressing the final theme contributors take examples from Africa and the United States to demonstrate how traditions construct identities and in turn how identities inform the interpretation and manipulation of tradition within contexts of socio cultural transformation in which such identities are in flux and even threatened The book ends with two reflective pieces the first drawing a comparison between a sense of home and a sense of tradition the second emphasizing how the very concept of a tradition is an attempt to pin down something that is inherently in flux Beyond Sustainable Ryan Ludwig,2020-12-21

Beyond Sustainable discusses the relationship between human beings and the constructed environments of habitation we create living in the Anthropocene an increasingly volatile and unpredictable landscape of certain change This volume accepts that human beings have reached a moment beyond climatological and ecological crisis It asks not how we resolve the crisis but rather how we can cope with or adapt to the irreversible changes in the earth system by rethinking how we choose to inhabit the world ecology Through an examination of numerous historical and contemporary projects of architecture and art as well as observations in philosophy ecology evolutionary biology genetics neurobiology and psychology this book reimagines architecture capable of influencing and impacting who we are how we live what we feel and even how we evolve Beyond Sustainable provides students and academics with a single comprehensive overview of this architectural reconceptualization which is grounded in an ecologically inclusive and co productive understanding of architecture **The**

**Ten Most Influential Buildings in History** Simon Unwin,2016-07-07 Even the most inventive and revolutionary architects of today owe debts to the past often to the distant past when architecture really was being invented for the first time

Architects depend on their own imaginations for personal insights and originality but their ideas may be stimulated consciously or subliminally by particularly powerful buildings from history The Ten Most Influential Buildings in History Architecture s Archetypes identifies ten architectural archetypes that have been sources of inspiration for architects through the centuries Each archetype is analysed through distinctive examples following the methodology established by the author in his previous books The variety of lines of enquiry each archetype has provoked in latter day architects are then explored by analysing their work to reveal ideas inspired by those earlier buildings Archetypes have a timeless relevance In adopting this approach The Ten Most Influential Buildings in History is as pertinent to contemporary practice as it is to understanding buildings from antiquity and offers insights into the bridges of influence that can operate between the two **Homes in the**

**Seizing Jerusalem** Alona Nitzan-Shifan, 2017-05-30 After seizing Jerusalem s eastern precincts from Jordan at the conclusion of the Six Day War in 1967 Israel unilaterally unified the city and plunged into an ambitious building program eager to transform the very meaning of one of the world s most emotionally charged urban spaces The goal was as simple as it was controversial to both Judaize and modernize Jerusalem Seizing Jerusalem chronicles how numerous disciplines including architecture landscape design and urban planning as well as everyone from municipal politicians to state bureaucrats from Israeli born architects to international luminaries such as

Louis Kahn Buckminster Fuller and Bruno Zevi competed to create Jerusalem's new image. This decade-long competition happened with the Palestinian residents still living in the city even as the new image was inspired by the city's Arab legacy. The politics of space in the Holy City still contested today were shaped in this post-1967 decade not only by the legacy of the war and the politics of dispossession but curiously also by emerging trends in postwar architectural culture. Drawing on previously unexamined archival documents and in-depth interviews with architects, planners and politicians, Alona Nitzan Shifman analyzes the cultural politics of the Israeli state and in particular of Jerusalem's influential mayor Teddy Kollek whose efforts to legitimate Israeli rule over Jerusalem provided architects a unique real-world laboratory to explore the possibilities and limits of modernist design as built form as well as political and social action. *Seizing Jerusalem* reveals architecture as an active agent in the formation of urban and national identity and demonstrates how contemporary debates about Zionism and the crisis within the discipline of architecture over postwar modernism affected Jerusalem's built environment in ways that continue to resonate today.

The SAGE Handbook of Architectural Theory C. Greig Crysler, Stephen Cairns, Hilde Heynen, 2012-01-20

Offers an intense scholarly experience in its comprehensiveness, its variety of voices and its formal organization, the editors took a risk, experimented and have delivered a much-needed resource that upends the status quo. *Architectural Histories*, journal of the European Architectural History Network, architectural theory interweaves interdisciplinary understandings with different practices, intentions and ways of knowing. This handbook provides a lucid and comprehensive introduction to this challenging and shifting terrain and will be of great interest to students, academics and practitioners alike. Professor Iain Borden, UCL Bartlett School of Architecture. In this collection, architectural theory expands outward to interact with adjacent discourses such as sustainability, conservation, spatial practices, virtual technologies and more. We have in *The Handbook of Architectural Theory* an example of the extreme generosity of architectural theory. It is a volume that designers and scholars of many stripes will welcome. K. Michael Hays, Eliot Noyes Professor of Architectural Theory, Harvard University. *The SAGE Handbook of Architectural Theory* documents and builds upon the most innovative developments in architectural theory over the last two decades. Bringing into dialogue a range of geographically, institutionally and historically competing positions, it examines and explores parallel debates in related fields. The book is divided into eight sections: Power, Difference, Embodiment, Aesthetics, Pleasure, Excess, Nation, World, Spectacle, History, Memory, Tradition, Design, Production, Practice, Science, Technology, Virtuality, Nature, Ecology, Sustainability, City, Metropolis, Territory. Creating openings for future lines of inquiry and establishing the basis for new directions for education, research and practice, the book is organized around specific case studies to provide a critical interpretive and speculative enquiry into the relevant debates in architectural theory.

The Earth, the City, and the Hidden Narrative of Race Carl C. Anthony, 2017-10-16

This book by Carl C. Anthony offers a new story about race and place intended to bridge long-standing racial divides. The long-ignored history of African American contributions to American infrastructure and the

modern economic system is placed in the larger context of the birth of the universe and the evolution of humanity in Africa. The author interweaves personal experiences as an architect, planner, environmentalist, and black American with urban history, racial justice, cosmology, and the challenge of healing the environmental and social damage that threatens the future of humankind. Thoughtful writing about race, urban planning, and environmental and social equity is sparked by stories of life as an African American child in post World War II Philadelphia, a student and civil rights activist in 1960s Harlem, a traveling student of West African architecture and culture, and a pioneering environmental justice advocate in Berkeley and New York. This book will appeal to everyone troubled by racism and searching for solutions, including individuals exploring their identity and activists eager to democratize power and advance equitable policies in historically marginalized communities. This is a rich, insightful encounter with an American urbanist with a uniquely expansive perspective on human origins who sets forth what he calls an inclusive vision for a shared planetary future.
