North American Landscape Trees Arthur Lee Jacobson, 1996 A comprehensive guide to over 5 000 ornamental cold hardy North American trees

Trees of the California Landscape Charles R. Hatch, 2007 A valuable resource for both student and practitioner The text and photos are clear concise and informative A valuable addition to any library the general public as well Kenneth S Nakaba FASLA Professor California State Polytechnic University Pomona This is the treed landscape knowledge source and the design and management tool we have all been hoping to see for decades Bridging horticulture and design it spans without judgment native specifics introduced near native and not so near native trees It provides the much asked for design settings as well as the species characteristics in all their delight and imagery This exhaustive treatise on California trees even sets the context for the big issues of climate geomorphic topographic and hydrologic effects and how we design with trees so as to be true partners in the best future for California

Joe Brown Principal EDAW Inc I find the concept for Chuck s book quite exciting and envision it will be used both by those involved with urban landscapes as well as those involved with restoration of native habitats It is a well researched compendium that will aid anyone who is interested in trees and their use in a wide variety of situations The photographs in the book are an excellent aid in tree identifications and the single volume will reduce the need carry around multiple references for identification of both native as well as non native trees It is my hope that Chuck s book will stimulate greater use of California s drought tolerant native trees in landscape plantings because of their reduced water requirements and ecological compatibility with other native plants and animals

Monty Knudsen Assistant Project Leader USDI Fish Wildlife Service Trees of the California Landscape is a masterful combination of those native and non Californian species that have importance in wildlands or the designed landscape or both Each of the 468 plus pages is devoted to a single species with photographs of the tree the bark and leafy branches accompanied by an amazingly efficient text that summarizes the natural distribution key identification traits tree architecture longevity and suitable habitats for planting all in a very readable style

Charles Hatch has created an excellent reference for forest ecologists landscape designers horticulturalists and restoration specialists not only in California but throughout the United States Michael G Barbour Professor of Plant Ecology University of California Davis This richly illustrated book provides a much needed resource for students educators and practitioners Margarita M Hill Head Landscape Architecture Department California Polytechnic State University San Luis Obispo
