Introduction

Energy is an necessary requirement for economic development and an vital pre-requisite to improve quality of life. Within commercial energy, oil and gas have been playing an progressively more important role in developing economies throughout the world and India is no exception. In the last 50 years, the oil and gas sector has taken colossal steps to meet the growing energy needs.

In order to meet the long term needs of the country and address issues such as energy security for strategic and defense purposes, it is imperative to have a long term policy for the hydrocarbon sector. This would not only make the sector globally competitive but will also ensure development of free market in the hydrocarbon sector. Most national governments now realize that a nation's ability to fuel its industries and provide its citizens with a reasonable (and rising) standard of living is a crucial element of political stability and even national survival.
