**Natural Hazards and Disasters in Papua New Guinea** Sue Lauer,2004      Natural Hazards and Disaster Risk Reduction Carina Fearnley,Emily Wilkinson,Catherine J. Tillyard,Stephen J. Edwards,2016-04-08 Building upon presentations given during the conference on Disaster Risk Reduction for Natural Hazards Putting Research into Practice held at University College London in November 2009 the articles collected in this book examine how natural hazards research is accessed and used by practitioners and decision makers and conversely how policy and practice inform research As with the conference this book successfully brings together views from humanitarian and development agencies academia business government and funding bodies It is rare to engage such a wide range of sectors in a discussion relating to the issues of disaster risk reduction from a natural hazards perspective and the book captures this interaction and the resultant exchange of ideas thus providing an insight into how stakeholders respectively undertake or engage with natural hazards research Collectively the articles highlight the need for greater dialogue understanding and collaboration between all these sectors if research is to be made relevant and generate significant impact on risk reduction policy and practice There is an urgent requirement to better understand the respective needs ways of working project timescales and funding mechanisms for disaster risk reduction as well as the challenges posed by institutional and organizational structures and functions These issues must be overcome to ensure that ultimately and most significantly discussions turn into positive practical actions so that research on natural hazards is relevant and applicable The book represents a step in that journey This book was published as a special issue of Environmental Hazards

**Disaster!** Hugh Lucius Davies,2006      *Food Systems Profile - Papua New Guinea* Food and Agriculture Organization of the United Nations,European Union,CIRAD,2023-08-03 Food systems are intimately linked to our lives through the food we eat our nutrition and health our livelihoods jobs and the environment and natural resources of the planet The main challenge for food systems is to produce nutritious food for all while preserving our biodiversity and environment and ensuring equitable distribution of wealth This Food Systems Profile provides a summary of the main food system issues in Papua New Guinea and highlights potential solutions for their sustainable and inclusive transformation It is the result of a systemic analysis and stakeholders consultation that was part of a global assessment of food systems in over 50 countries following a joint initiative by the European Union FAO and CIRAD which aims at catalysing the sustainable and inclusive transformation of food systems
