Natural And Conceptual Design Radical Confusion In Critical Theory:

Natural and Conceptual Design Joseph M. Ditta, 1984 Critical theory if it is ever to rise above interminable controversy must at some point in its self elaboration be concerned with the problems of internal consistency Psychoanalysis structuralism and deconstructionism and Marxism are major critical modes primarily because of their claims to scientific methodological and philosophical validity Yet these critical discourses are beset by logical and programmatic inconsistencies the psychoanalytic approach to literary structure is theoretically committed to the reconstruction of a phantom psyche the structuralist and deconstructionist approaches share an inability to broaden linguistic theory into an account of literary value and Marxist theory is plagued by a political program which takes precedence over its function as critical theory However by reintroducing the critical concept of intentionality the conceptual design of literary structures can be elicited providing a presently lacking focus for most critical approaches

Reading the Fascicles of Emily Dickinson

Eleanor Heginbotham, 2003 Heginbotham's book focuses on Emily Dickinson's work as a deliberate writer and editor The fascicles were forty small portfolios of her poems written between 1856 and 1864 composed on four to seven stationery sheets folded stacked and sewn together with twine What revelations might come from reading her poems in her own context Are they simply scrapbooks as some claim or are they evidence of conscious canny editing Read in their original places each lyric becomes different and more interesting than when read in isolation We cannot know why Dickinson compiled the books or what she thought of them but we can observe what she left in them What she left is visible only by noting the way the poem answers in a dialogue across the pages the way lines spilling onto a second page introduce the next poem the way openings suggest image clusters so that each book has its own network of concerns and language not a story or philosophical preachment but an aesthetic wholeness This book is the first to demonstrate that Dickinson's poetic and philosophical creativity is most startling when the reader observes the individual lyric in the poet's own and only context for them For teacher student scholar and poetry lover Heginbotham creates an important new framework for understanding one of the most complex clever and profound U S poets

From the New Criticism to Deconstruction Art Berman, 1988 From the New Criticism to Deconstruction traces the transitions in American critical theory and practice from the 1950s to the 1980s It focuses on the influence of French structuralism and post structuralism on American deconstruction within a wide ranging context that includes literary criticism philosophy psychology technology and politics

Australian Contemporary

Drama, 1909-1982 Dennis Carroll, 1985 The book is the first to provide in one volume a cogent introduction to contemporary Australian drama from its faltering beginnings in 1909 to the mature achievements of the early 1980s The work of the major playwrights Ray Lawler Douglas Stewart David Williamson Alexander Buzo and Patrick White is analysed as well as the work of other important but lesser known playwrights Matters of structure theme and style in these works are given particular attention and the author outlines the historical and cultural milieu in the 19th century in which Australian

theatre originated and presents its development up through the modern experimental phase This study is aimed at the non Australian reader *The Poetry and Poetics of Jorge Luis Borges* Paul Cheselka,1987 This study traces Borges career as a poet from his earliest poetic endeavors before the 1923 publication of *Fervor de Buenos Aires* through the middle of the 1960 s Paul Cheselka considers Borges better known poetry collections such as *Fervor de Buenos Aires* *Luna de enfrente* and *Cuaderno San Mart n* and he shows the often neglected 1930 1960 period to be an important phase in the evolution of Borges poetry The poems are studied chronologically with particular emphasis on the relation of their themes to the poet s life and ideas Cheselka s contribution is that of providing a clearer delineation of borgesian poetics the poems themselves are shown to be the evidence and very substance of the poet s definitions *Twentieth-century American Cultural Theorists* Paul Hanson,2001 This award winning series systematically presents career biographies of writers from all eras and all genres through volumes dedicated to specific types of literature and time periods **The Publishers' Trade List Annual** ,1985 Small Press Review ,1983 **Literary Criticism Register** ,1985 **Critical Theory** Douglas Tallack,2014-07-15 An anthology of readings and extracts providing a comprehensive introduction to the main schools and positions of critical theory The book is divided into five sections structuralism and poststructuralism psychoanalytical theory Marxism feminism and post foundational ethics and politics It includes a general introduction covering the field of critical theory and identifies founding theorists and movements with a bibliography and notes **The Cumulative Book Index** ,1985 A world list of books in the English language **Chaos and Cosmos** Heidi C. M. Scott,2015-01-14 In *Chaos and Cosmos* Heidi Scott integrates literary readings with contemporary ecological methods to investigate two essential and contrasting paradigms of nature that scientific ecology continues to debate chaos and balance Ecological literature of the Romantic and Victorian eras uses environmental chaos and the figure of the balanced microcosm as tropes essential to understanding natural patterns and these eras were the first to reflect upon the ecological degradations of the Industrial Revolution *Chaos and Cosmos* contends that the seed of imagination that would enable a scientist to study a lake as a microcosmic world at the formal empirical level was sown by Romantic and Victorian poets who consciously drew a sphere around their perceptions in order to make sense of spots of time and place amid the globalizing modern world This study s interest goes beyond likening literary tropes to scientific aesthetics it aims to theorize the interdisciplinary history of the concepts that underlie our scientific understanding of modern nature Paradigmatic ecological ideas such as ecosystems succession dynamics punctuated equilibrium and climate change are shown to have a literary foundation that preceded their status as theories in science This book represents an elevation of the prospects of ecocriticism toward fully developed interdisciplinary potentials of literary ecology *Books in Series, 1876-1949* R.R.
