Findley, Calvin Goldscheider, 2019-10-16 Perhaps because I grew up on a farm in Ohio I have long been interested in rural development Although I first became a migrant at the age of 17 when I left the farm to continue my studies in a city college I was not aware of the relation between rural development and migration until many years later when I began studying patterns of urban and rural poverty This research has grown out of my continuing investigation of the ways that migration has been seen as both a response to chronic conditions of rural poverty and a factor potentially exacerbating urban poverty conditions If governments wanted to deal with urban poverty they would want to restrict urban migration yet if they reduced urban migration this would remove one of the important means available to persons seeking to raise themselves out of rural impoverishment This would clearly be a no win situation for the rural poor the only way to deal fairly with both urban and rural poverty would be to foster socio economic development of rural areas Thus I became interested in studying the patterns of rural development which actually have had an effect on the migration decisions of rural families TEXTBOOK OF ANIMAL BEHAVIOUR FATIK BARAN
