Confronting Mainstream Economics for Overcoming Capitalism Rémy Herrera, 2022-07-06 This book provides analytical arguments that demonstrate the necessity to go beyond not only mainstream economics but also and especially the capitalist economy itself It provides a radical critique of mainstream economics comparing it to an unscientific form of single thought and applies this criticism to the specific fields of growth development the institutions defense or the environment It targets both neoclassical economics and reformist soft heterodox currents from neoinstitutionalists to neo

Keynesians including Thomas Piketty or Amartya Sen among others In doing so it rejects Keynes theories of money the crisis and the state It then offers a Marxist interpretation of the current crisis of capitalism considering it as a systemic crisis without solutions internal to its own logic and dynamics and emphasizes the links between this capitalist crisis and imperialist wars and the destruction of the environment and natural resources by capital The book concludes by arguing that we must find the necessary theoretical and practical alternatives in a Marxist perspective advocating for socialist transitions away from the capitalist economy to protect humanity and the environment

Confronting the Climate Challenge

Lawrence Goulder, Marc Hafstead, 2017-12-26 Without significant reductions of greenhouse gas emissions climate change will cause substantial damage to the environment and the economy The scope of the threat demands a close look at the policies capable of reducing the harm Confronting the Climate Challenge presents a unique framework for evaluating the impacts of a range of U S climate policy options both for the economy overall and for particular household groups industries and regions Lawrence Goulder and Marc Hafstead focus on four alternative approaches for reducing carbon dioxide emissions a revenue neutral carbon tax a cap and trade program a clean energy standard and an increase in the federal gasoline tax They demonstrate that these policies if designed correctly not only can achieve emissions reductions at low cost but also can avoid placing undesirable burdens on low income household groups or especially vulnerable industries Goulder and Hafstead apply a multiperiod economy wide general equilibrium model that is distinct in its attention to investment dynamics and to interactions between climate policy and the tax system Exploiting the unique features of the model they contrast the shorter and longer term policy impacts and focus on alternative ways of feeding back or recycling policy generated revenues to the private sector Their work shows how careful policy design including the judicious use of policy generated revenues can achieve desired reductions in carbon dioxide emissions at low cost avoid uneven impacts across household income groups and prevent losses of profit in the most vulnerable U S industries The urgency of the climate problem demands comprehensive action and Confronting the Climate Challenge offers important insights that can help elevate policy discussions and spur needed efforts on the climate front

society relationship In contrast to previous literature this volume analyses land and property problems in conflict afflicted areas from a long term perspective of state building and economic development rather than concentrating only on the immediate aftermath of the conflict The long term perspective enables not only an understanding of the root causes of the property problems in conflict affected countries but also elaboration of effective policy measures for peace Contributors are area specialists and the eight case study countries have been carefully selected for comparative study The collection applies a common framework to a diverse group of countries South Sudan Uganda Rwanda Burundi Cambodia Timor Leste Colombia and Bosnia Herzegovina
