Redesigning The World:

Redesigning The World Sam Pitroda, 2021-04-26 The world was last designed seventy five years ago about the same time that Sam Pitroda was born This design has outlived its utility Hyperconnectivity and the COVID 19 pandemic offer a unique opportunity to redesign the world to take humanity to the next level Redesigning the world is not about looking at it from the point of view of liberal or conservative left or right capitalism or socialism public or private democracy dictatorship or monarchy open or closed systems rich or poor urban or rural east or west white brown black or yellow This proposed redesign of the world has the planet and its people at the centre it is built on the foundations of sustainability inclusion equality equity and justice so that everyone on earth can enjoy peace and prosperity It is not an idealist or utopian vision but one with humanity at its core This book is about reshaping the world to meet the future challenges of our planet and our people

Disruptive Technologies, Innovation and Global Redesign: Emerging Implications Ekekwe, Ndubuisi, Islam, Nazrul, 2012-02-29 This book provides case studies as well as practical and theoretical chapters on the issues surrounding disruptive technologies innovation and global redesign Provided by publisher

Redesign the World - A Global Call to Action Sam Pitroda, 2021-05-04 The world was last designed seventy five years ago about the same time that Sam Pitroda was born This design has outlived its utility Hyperconnectivity and the COVID 19 pandemic offer a unique opportunity to redesign the world to take humanity to the next level Redesigning the world is not about looking at it from the point of view of liberal or conservative left or right capitalism or socialism public or private democracy dictatorship or monarchy open or closed systems rich or poor urban or rural east or west white brown black or yellow This proposed redesign of the world has the planet and its people at the centre it is built on the foundations of sustainability inclusion equality equity and justice so that everyone on earth can enjoy peace and prosperity It is not an idealist or utopian vision but one with humanity at its core This book is about reshaping the world to meet the future challenges of our planet and our people The three dimensions In the third vision he calls for nations networking ideas interests resources and talent all designed to save our planet and uplift all our people This vision will be based on a novel organizational architecture focussed on global consultations collaboration co operation and enhanced communication He lays out what he sees as the three dimensions of the information age connectivity content and context There is also reference to three unique dimensions of information technology democratisation decentralisation and demonetisation Then there are five new pillars for the world s redesign inclusion human needs new economy sustainability conservation and non violence There are multiple valid points such as the need to discard the use of over simplistic and inadequate tools such as GDP to measure economic growth and well being The book stresses on the need to keep environmental concerns central to any new policy making pointing out that the planet can survive without people but people cannot survive without a healthy planet Our priority during the world s redesign has to be to improve our planet s health and make it more clean diverse prosperous and sustainable a place where

each plant and form of life can flourish and live to its fullest potential Perhaps the most heartfelt section of the book is one at the end entitled Who Am I to Write This Book in which he delves into his motives for penning this book The book offers a much needed manifesto that can guide the world to better healthier sustainable human life However in a bitterly divided world with governments turning towards populism nationalism and brutality to crush change political will at the highest level one the crucial elements that would make the manifesto possible seems to be unachievable at the moment He urges us to recognise how Covid has underscored how interconnected we are but few seem to be able to recognise this not the least India currently facing unprecedented challenges to save lives As a manifesto a wish list for the next 75 years this is a wonderful even inspiring read The challenge is to make the powers that be accept this vision

Making Global Trade Governance Work for Development Carolyn Deere Birkbeck, 2011-08-18 Discussion of the governance of global trade and the multilateral trading system is too often dominated by developed country scholars and opinion makers with inadequate attention given to developing country perspectives Making Global Trade Governance Work for Development gathers a diversity of developing country views on how to improve the governance of global trade and the WTO to better advance sustainable development and respond to the needs of developing countries With contributions by senior scholars commentators and practitioners the essays combine new empirically grounded research with practical insights about the trade policy making process They consider the specific governance issues of interest to developing countries and acknowledge the changing dynamics in the global economy and in trade decision making

Handbook on Trade and the Environment Kevin

Gallagher, 2010-01-01 Handbook on Trade and the Environment is a good source for those looking for a better understanding of political issues of legal debates and of the state of discussion between government industry NGO and private sector groups on topics that are not often treated elsewhere Judith M Dean World Trade Review I would recommend the book to anyone concerned with the interaction of trade and the environment John Goodier Reference Reviews In this comprehensive reference work Kevin Gallagher has compiled a fresh and broad ranging collection of expert voices commenting on the interdisciplinary field of trade and the environment For over two decades policymakers and scholars have been struggling to understand the relationship between international trade in a globalizing world and its effects on the natural environment The authors in this Handbook provide the tools to do just that The editor's well worked introduction synthesizes the emerging themes of the collection which is divided into three sections trade and environmental quality trade and environmental politics and trade and environmental policy Topics include the extent to which trade liberalization creates pollution havens where dirty industries flock to poorer countries with lax environmental standards and conversely how multinational corporations bring cleaner environmental technologies to developing countries when they choose to move abroad The volume also

addresses the extent to which national environmental policy and or global environmental agreements clash with the emerging rules of the World Trade Organization and whether such environmental policies hinder export competitiveness Finally numerous political economy analyses of the complex political coalitions that arise to adapt to and mitigate changes in trade and environmental policy are provided In addition to broader overviews of the field in depth case studies of nations and regions are offered including the United States the European Union China India and Mexico as well East Asia Latin America and Africa The volume will serve as a guide for scholars new to the field as well as students and policy makers needing a quick reference to the research on the interface between trade and the environment **Redesigning Pedagogy**

,2006-01-01 This book brings together selected papers from a conference focusing on Redesigning Pedagogy organized by the Centre for Research in Pedagogy and Practice National Institute of Education Singapore The papers are organised around seven key themes Literacy Education Relations of Power Reflection Meaning Making Evaluation and Mathematics and Science There are two distinctive features in this title First is its international focus In addition to providing readers with an introduction to pedagogy in Singapore it contains discussions on the environments in Australia Canada Hong Kong South Africa and the United States A second focus is a strong commitment to transnational research Although influenced by the theoretical perspectives of Bourdieu Luke and others the authors are primarily focused on classroom practices This title will be of interest to students researchers and practitioners who are interested in broad thematic and comparative issues With a number of chapters on Literacy Education Mathematics and Science it will also be of appeal to those more interested in content specific areas **Earth Pilgrim** Satish Kumar,2009 In Earth Pilgrim Satish Kumar draws on his personal

experience as well as his understanding of the spiritual traditions of both East and West The book takes the form of conversations between Satish and others about the inner and outer aspects of pilgrimage to be a pilgrim is to be on a path of adventure to move out of our comfort zones to let go of our prejudices and preconditioning and to make strides toward the unknown Satish Kumar has been a pilgrim ever since at the age of eight he joined the brotherhood of wandering Jain monks in his native India Later he walked the length and breadth of India with Gandhi s successor Vinoba Bhave persuading landowners to donate a portion of their lands to the poor In the 1960s he made an 8 000 mile pilgrimage for peace which included walking from India over the Himalayas to Paris via Moscow Satish believes that at this stage of human history we now need a new kind of pilgrim unattached to any form of dogma Earth pilgrims who are concerned with this world not the next and who are seeking a deep commitment to life in the here and now upon this Earth in this world **How to Run the**

World Parag Khanna,2011-01-11 Here is a stunning and provocative guide to the future of international relations a system for managing global problems beyond the stalemates of business versus government East versus West rich versus poor democracy versus authoritarianism free markets versus state capitalism Written by the most esteemed and innovative adventurer scholar of his generation Parag Khanna s How to Run the World posits a chaotic modern era that resembles the

Middle Ages with Asian empires Western militaries Middle Eastern sheikhdoms magnetic city states wealthy multinational corporations elite clans religious zealots tribal hordes and potent media seething in an ever more unpredictable and dangerous storm But just as that initial dark age ended with the Renaissance Khanna believes that our time can become a great and enlightened age as well only though if we harness our technology and connectedness to forge new networks among governments businesses and civic interest groups to tackle the crises of today and avert those of tomorrow With his trademark energy intellect and wit Khanna reveals how a new mega diplomacy consisting of coalitions among motivated technocrats influential executives super philanthropists cause mopolitan activists and everyday churchgoers can assemble the talent pool the money and deploy the resources to make the global economy fairer rebuild failed states combat terrorism promote good governance deliver food water health care and education to those in need and prevent environmental collapse With examples taken from the smartest capital cities most progressive boardrooms and frontline NGOs Khanna shows how mega diplomacy is more than an ad hoc approach to running a world where no one is in charge it is the playbook for creating a stable and self correcting world for future generations How to Run the World is the cutting edge manifesto for diplomacy in a borderless world

Next Generation Course Redesign Philip M. Turner, Ronald S. Carriveau, 2010 There is widespread recognition that large enrollment introductory classes are a significant problem Lack of engagement incongruous learning styles and teaching methods and high failure dropout rates are some of the symptonms The University of North Texas has developed and promulgated a process for resdesigning these classes that brings to bear the creativity of the faculty resulting in higher level student learning without increasing instructional costs This groundbreaking book provides the reader with a theoretical foundation for course redesign that employs assessment driven experiential learning and tools and examples to bring all or part of the process to their campus Back cover
