Re-balancing China Peter Nolan, 2015-03-01. Re-balancing China addresses three key sets of issues in China's political economy. Part One provides an analysis of the profound effect of the global financial crisis upon China's economy as well as the positive impact of the massive rescue package that was implemented in response to the crisis. Part Two focuses on the challenge of globalization for China's industrial policy. After more than two decades of industrial policy, China still has a negligible number of large firms that are competitive in global markets. China's experience presents a fundamental challenge to traditional concepts of industrial policy and development. Part Three examines China's international relations in particular its relationship with the US and the interactions between the two countries in the East and South China Seas.

Cities and Social Governance Reforms Ka Ho Mok, 2022-05-13. This book examines critically how the Chinese government has proactively engaged the nine cities and two special administrative regions in the Greater Bay Area (GBA) in Southern China for deeper collaborations in order to transform the country from the World Factory to become a leading world economy in innovation and entrepreneurialism. While most of the existing research related to China's GBA development offers the economic and technological advancement perspectives, this book focuses on critical reflections upon how the call for megacity development and deeper regional collaborations in the Bay Area will affect people's livelihoods, social integration, and urban governance. The central theme of this book builds around Cities, Social Cohesion, and Governance. Based upon policy and document analysis, first-hand fieldwork, and surveys, and intensive interviews with major stakeholders responsible for pushing the Greater Bay Area development, this book offers not only regional perspectives in analyzing the Greater Bay Area development through comparing and contrasting development experiences within the country's different bay economies like the Shanghai and Zhejiang Bay Area and Beijing and Bohai Bay Area. The present book also draws comparative and

international insights from other well established bay economies like Tokyo Bay Florida Bay and New York Bay Areas when analyzing the development in the GBA in China **Critical Issues in Contemporary China** Czeslaw
