Constitutional Ratification without Reason Jeffrey A. Lenowitz, 2022-03-10 This volume focuses on constitutional ratification the procedure in which a draft constitution is submitted by its creators to the people or their representatives in an up or down vote determining implementation Ratification is increasingly common and routinely recommended by experts Nonetheless it is neither neutral nor inevitable Constitutions can be made without it and when it is used it has significant effects This raises the central question of the book should ratification be recommended Put another way is there a reason for treating the procedure as a default for the constitution making process Surprisingly

these questions are rarely asked The procedure's worth is assumed not demonstrated while ratification is generally overlooked in the literature In fact this is the first sustained study of ratification To address these oversights this book defines ratification and its types explains the procedure's effects conceptual origins and history and then concentrates on finding reasons for its use Specifically it builds up and analyzes the three most likely normative justifications These urge the implementation of ratification because the procedure enables the constituent power to make its constitution fosters representation during constitution making or helps create a legitimate constitution Ultimately these justifications are found wanting leading to the conclusion that ratification lacks a convincing context independent justification Thus until new arguments are developed experts should not give recommendations for ratification as a matter of course practitioners should not reach for it uncritically and more generally one should avoid the blanket application of concepts from democratic theory to extraordinary contexts such as constitution making

Zimmerman offers a balanced presentation of the institutions and political processes of the Empire State He begins with an overview of the state and offers chapters on federal state and interstate relations state local relations the constitution political parties elections and interest groups the state legislature the governor the fourth branch the departments and agencies of the executive branch the judiciary and state finance including state local fiscal relations Zimmerman emphasizes the legal foundations of the state as they influence greatly the behavior of leading public officers and interest groups Most importantly constitutional restrictions on the state legislature and local governments are examined as well as the ingenious ways by which several restrictions upon the state legislature have been circumvented

The Initiative, Second Edition Joseph F. Zimmerman, 2014-10-08 Examines the origins spread and effectiveness of the initiative The initiative is the product of the populist movement which in the late nineteenth century sought to increase voter control of what were viewed as unrepresentative state and local governments Today twenty four states allow registered voters to place proposed state laws on the referendum ballot and eighteen states authorize voters to place proposed state constitutional amendments on the referendum ballot by collecting a specified number of valid voter signatures Numerous local governments have a charter provision or a state law provision allowing voters to employ the popular lawmaking device In *The Initiative Second Edition* Joseph F Zimmerman traces the origin and spread of the initiative in the United States The initiative has been a controversial device since first being introduced in South Dakota in 1898 with arguments both in support and in opposition Zimmerman examines and evaluates both the legal foundation of the initiative and the arguments against its use He then concludes with a chapter that develops model constitutional statutory and local government charter provisions to assist jurisdictions and their voters contemplating adoption of the initiative or amendment of already existing constitutional statutory and charter initiative provisions

Towards Consensus?
