Reflected In Water A Crisis In Social Responsibility:

Reflected in Water Colin Ward, 1997 Water the primary need for human existence is a common good belonging to all Yet it has been appropriated as a commodity by the powerful This book re asserts the claim for local community control of access of water

The Human Right to Water and its Application in the Occupied Palestinian Territories Amanda Cahill Ripley, 2011-04-11 The Human Right to Water and Its Application in the Occupied Palestinian Territories provides an overview and examination of the human right to water as determined under international human rights law This is a highly topical issue with the UN General Assembly having passed a resolution which declares access to clean water and sanitation a human right New York Jul 28 2010 the recent appointment of the UN Independent Expert on the issue of human rights obligations related to access to safe drinking water and sanitation and movement within the NGO community for an international water treaty Amanda Cahill Ripley analyses the current legal status substantive content and obligations correlative to the right and examines the relationship between other economic social and cultural rights related to the right to water The book goes on to look more specifically at the application of the human right to water in the Occupied Palestinian Territories Using innovative methodology Cahill Ripley combines legal analysis with a qualitative social science empirical case study to explore the enjoyment of the right on the ground The wider implications of the case study findings are then considered looking at what can be done to strengthen the right legally in terms of its status and codification and what remedy can be found for violations of the right both specifically in the Occupied Palestinian Territories and in a more general context The book will be of interest to students academics and practitioners within the fields of international human rights law and international humanitarian law as well as those concerned with international relations and conflict resolution within Israel Palestine and the wider Middle East region

Hydropolitics in the Developing World Anthony Turton, Roland Henwood, 2002 Bringing contributions by a variety of authors together in one volume is part of an attempt to show that hydropolitics is a growing discipline in its own right The prevailing definition of hydropolitics is widened to include the elements of scale and range This is illustrated through a focus on theoretical and legal issues case studies from Southern Africa and a proposed research agenda The book is an important addition to the literature on hydropolitics

Water and Sanitation Services Jose Esteban Castro, 2012 I am most impressed by the range and profile of the topics and contributors There is a growing awareness that solving water and sanitation problems involves more than pipes and valves human behaviour and institutions are important components of the package Sandy Cairncross London School of Hygiene and Tropical Medicine UK This book will be very timely The emphasis of the book is absolutely correct linking the technologies to the sociocultural political economic and planning aspects of water and sanitation services Duncan Mara University of Leeds UK Substantially reducing the number

What is Water? Jamie Linton, 2010 We all know what water is and we often take it for granted Because it seems so natural we seldom question how we see water But the spectre of a worldwide water crisis

suggests that there might be something fundamentally wrong with the way we think about water Jamie Linton dives into the history of the modern concept of water that water can be stripped of its wider environmental social and cultural contexts and reduced to a scientific abstraction to mere H₂O This abstraction has given modern society licence to dam divert and manipulate water with impunity giving rise to a growing suite of problems Linton argues that part of the solution to the water crisis involves deliberately reinvesting water with social content Water Law, Poverty, and Development Philippe Cullet, 2009-07-16 This monograph comprehensively examines water law regulations and reform in the present decade going beyond a simple analysis of existing water law and regulations to encompass environmental social economic and human rights aspects of water as a natural resource Using the specific case of India and on the related international law and policy framework that directly influences water regulatory developments in India this book offers what will be the first and only analysis of water law reforms taking place at the national level in many developing countries in their domestic and international context On the one hand international freshwater law remains under developed and existing legal instruments such as the 1997 UN Convention only address a limited set of relevant issues Yet the international law and policy framework concerning freshwater is increasingly important in shaping up law reforms taking place at the national level in particular in developing countries Indeed non binding resolutions such as the Dublin Statement on Water and Sustainable Development 1992 have had an immense influence on water law reforms in most developing countries This book seeks to conceive of and analyse freshwater regulation in a broader context and go beyond a literature that either lauds or criticises ongoing water sector reforms to provide an analytical basis for the reforms which all countries will have to adopt in the near or medium term future **A British Anarchist Tradition** Carissa Honeywell, 2011-05-12 A British Anarchist Tradition focuses on three contemporary British theorists and practitioners Herbert Read Colin Ward and Alex Comfort and looks at their interrelation commonality and collective influence on British radical thought The book aims to foster a greater understanding of anarchism as an intellectual response to 20th century developments and its impact on political thought and movements For the first time the work of these three writers is presented as a tradition highlighting the consistency of their themes and concerns To do so the book shows how they addressed the problems faced by modern British society with clear lines of political literary and intellectual traditions linking them It also focuses on their contribution to the development of anarchist conceptions of freedom in the twentieth century A British Anarchist Tradition identifies an area of anarchism that deserves greater critical scholarly attention Its unique and thorough research will make it a valuable resource for anyone interested in contemporary anarchist thought political theory and political movements *Managing Europe's Water Resources* Dr Chad Staddon, 2012-11-28 Illustrated with case studies which explain key concepts and provide practical examples this book provides a detailed and comprehensive introduction to water management issues from a European perspective The book begins with a brief history of water management followed by a consideration of the major frameworks used for managing

water in its qualitative and quantitative aspects Several chapters treat key water management issues including dams privatization hydropolitics climate change and finally provides a synoptic treatment of major water management issues across Europe s geographical regions **Just Water** Zenner, Christiana,2018-11-15 Just Water explores the necessity and availability of a supply of fresh water from the perspective of Christian ethics This revised edition includes new data and updates on social developments related to water crises as well as insights from Pope Francis s encyclical Laudato Si and a discussion of water justice from the perspective of the events at Standing Rock Encyclopedia of Consumer Culture Dale Southerton,2011-09-15 The Encyclopedia of Consumer Culture is the first reference work to outline the parameters of consumer culture and provide a critical scholarly resource on consumption and consumerism
