Reflections Edl Go Series:

Reflections on the Extreme Right in Western Europe, 1990–2008 Christopher Husbands, 2020-05-26 During the last three decades or so there has been a significant growth of extreme right voter support in Europe and elsewhere in the world The chapters in this book look at an earlier period before most of this increase Comprising eight previously published articles or book chapters and two hitherto unpublished studies this book gives extended accounts of the major extreme right political parties or movements in a number of west European countries looking both at their antecedents and also at their support and significance in the 1980s and early 1990s The countries covered in detail are France the Federal Republic of Germany old and new regions the Netherlands Belgium Switzerland and Austria During the last three decades some earlier parties of the extreme right in these west European countries have disappeared into oblivion to be superseded by replacements others have survived and flourished Given the date when most of these chapters were written they are now to be regarded as contributions to a modern history about the status and relevance of the respective parties or movements The book also includes an introductory essay that discusses issues arising from the disputed labelling terminology used to describe such parties and identifies themes that feature in the more recent literature about the subsequent and current state of the extreme right in Europe The book will be of particular interest to researchers on the contemporary politics of the extreme right in Europe as well as being a valuable resource for those teaching courses on this topic or on general political sociology

Faith, Hope and Love Ray Gaston, 2017-09-30 Often Christian interfaith engagement has been viewed through the lense of theology of religions where the primary questions are often about the salvific destiny of people of other faiths Faith Hope and Love offers an alternative approach asking how do Christian interfaith practitioners live out their discipleship in a multi faith world And what theologically is being expressed in their activity Demonstrating a new and innovative approach to interfaith engagement this book argues for theological reflection on the multi faith reality of our society to focus on the practice of Christian interfaith engagement drawing on the methodology of practical theology to explore the impact of encounter on Christian self understanding It suggests that other faith traditions are no longer a theological problem to be solved or people to be saved but a potential means of grace in which the Christian disciple learns more about God and grows in their relationship with Christ
