Teacher Education in the Asia-Pacific Region Paul Morris, John Williamson, 2013-10-08 This book investigates the relationships between education and national development in an area of the world where both have acquired considerable importance. It questions assumptions which view education primarily as a direct investment in human capital and approaches which measure the efficacy of educational provision solely in terms of quantifiable differences between inputs and outputs. Unlike most of the more general works in this field it does not set out either to confirm or to refute a particular theory. Instead the main perspectives which have been adopted to explain the role of education in development are explored. The role of education in the development of eight societies in East Asia including Japan, Hong Kong, Singapore, Taiwan, South Korea, Malaysia, Macau and the People's Republic of China is examined. These societies are compared in order to highlight the diverse and complex role played by education in their development. *The Impact of Technology on Library Instruction*

Linda Shirato, 1972 **Handbook of Teacher Education** Tony Townsend, Richard Bates, 2006-08-09 This book has its origins in conversations that started when the International Council on Education for Teaching (ICET) and the Australian Teacher Education Association (ATEA) jointly agreed to co-sponsor a World Assembly of Teacher Educators in Melbourne in July 2003, hosted by Monash University. The editors of this book were not only intimately involved in the management of the conference but had also been key figures in the Associations involved. Tony Townsend had been secretary and on the national board of the South Pacific Association for Teacher Education (SPATE) which later became ATEA and had previously managed a SPATE conference in Frankston, Australia in the 1980s. He is currently the President of ICET and now works at Florida Atlantic University. Richard Bates has been a long time board member of ATEA and is currently President of that organization. He is also a Board member of ICET. The International Council on Education for Teaching (ICET) was founded in 1953 for the purpose of emphasizing international cooperation in educational development in order to improve the quality of teacher education as well as to expand global educational opportunities for people in teacher education. Since that time ICET has developed into an international association of practitioners of teacher education, policy and decision makers in education, government and business dedicated to global development through education. ICET is a Non Governmental Organization (NGO) and participates in NGO meetings and other UNESCO sponsored conferences around the world. **Sociology of**

Education James Ainsworth, 2013-04-11 The sociology of education is a rich interdisciplinary field that studies schools as their own social world as well as their place within the larger society. The field draws contributions from education, sociology, human development, family studies, economics, politics and public policy. *Sociology of Education: An A to Z Guide* introduces students to the social constructions of our educational systems and their many players including students and their peers, teachers, parents, the broader community, politicians and policy makers. The roles of schools, the social processes governing schooling and impacts on society are all critically explored. Despite an abundance of textbooks and specialized monographs
