Reforming the Reforms in Latin America Ricardo Ffrench-Davis,Universidad de Chile. Centro de Economía Internacional y Desarrollo,1999

Reforming Latin America's Economies Ricardo Ffrench-Davis,2005-09-30 Provides a comprehensive analysis of why reforms in Latin America have failed in achieving growth and equity The book focuses on three strategic areas of reforms of the Washington Consensus Macroeconomics Trade and Finance

The Cambridge Economic History of Latin America: Volume 2, The Long Twentieth Century Victor Bulmer-Thomas,John Coatsworth,Roberto Cortés Conde,2006-01-23 An indispensable reference work for anyone interested in Latin America s economic development

Economic Reforms, Growth and Inequality in Latin America Gustavo Indart,2019-06-04 Originally published in 2004 Growth income distribution and labour markets are issues of pivotal importance in the Latin American context Examining unique theoretical issues and the empirical evidence this book provides a critical analysis of the key elements of income distribution determinants labour market functions trade policies and their interrelations As the advance of globalization becomes seemingly unstoppable this book provides an important reappraisal of the impact of this new phenomenon and in particular the pernicious impact it may have on income growth and distribution The key objective of the volume is to integrate more fully the analysis of trade and labour market economists in order to better understand the labour market and income distribution implications of globalization and international integration Forty years after the early calls to appropriately investigate the micro foundations of macroeconomics the separation of the two at the policy level is more damaging than ever before particularly for developing regions this volume therefore makes an important contribution at the theoretical and policy levels by bringing together macroeconomic and microeconomic analyses

Trajectories of Declining and Destructive Capitalism Rémy Herrera, 2025-04-21 Volume 40 explores themes related to various trajectories of declining and destructive capitalism within the framework of contemporary Marxism Social scientists from ten countries at various stages of their careers work to strengthen Marxism applying methods to the interpretation and above all the transformation of the world

Economic Reforms in Chile Ricardo Ffrench-Davis, 2002 An analysis of the neoliberal reform in Chile during the last thirty years

Critical Issues in International Financial Reform R. Albert Berry, Gustavo Indart Indart, Critical Issues in International Financial Reform addresses weaknesses of the current international financial system and potential beneficial reforms The focus is on the countries of Latin America and the Caribbean but the authors also take into account relevant lessons from the experience of Canada a country highly integrated into world and hemispheric trade and financial markets Critical Issues offers a new perspective on a discussion too often dominated by interest groups that take strong even rigid positions on issues with limited understanding of the technical aspects of the issues and little concern for the interests of the developing world Its chapters have been written by experts in the economic political and social aspects of the international financial integration of developing countries Financial crises and their associated social and economic traumas are the most apparent symptom that something is amiss in the process of world economic integration But there are also broader questions about the nature and magnitude of the benefits and costs of increased international capital flows for different groups of countries in the developing and developed worlds For example even in the absence of turbulence is it optimal for all participants that capital movements be as free as possible Does capital inflow discourage domestic savings to a degree that should cause worry Are some types of flows inherently more beneficial than others for instance direct investment flows versus flows into host stock markets How can the instability of capital movements best be curtailed These questions concern the contributors to this volume This volume demonstrates that the evolution of the world financial system its various problems and what is or is not done about them require an understanding of the links among financial economic and political variables Critical Issues in International Financial Reform is an important contribution to this debate and will be of value to researchers in economic policy history and international politics Albert Berry is professor of economics at the University of Toronto and research director of the Program on Latin America and the Caribbean Gustavo Indart is special lecturer of economics and the coordinator of the Program on Latin America and the Caribbean at the University of Toronto The papers in this conference volume are grounded on solid economic theory and empirical research and take a critical view of the prescriptions of the so called Washington Consensus and of the policies followed in most developing countries under the advice of the international financial institutions IFIs The economics and the political economy of their current financial arrangements in which the IFIs play such an important role are given a thorough treatment This volume is a very valuable contribution to a debate that interests both academics and policymakers The thirteen papers are uniformly of high quality

and are often very innovative Juan Antonio Morales president Central Bank of Bolivia A stimulating and balanced set of analyses drawing insightfully upon comparative experiences of national and international financial systems and their reform both actual and potential It is unusual and welcome in its effective blending of political and economic insights and its use of analyses that are refreshingly skeptical of orthodox presumptions Gerald Helliner University of Toronto
