Reforming The Workplace A Study Of Self Regulation In Occupational Safety:

Reforming the Workplace Joseph Rees, 2016-11-11 Government regulatory agencies are too often tangled webs of bureaucracy fraught with internal politics and in conflict with both industries and individuals How to instigate and implement the needed reform is a timely issue that is currently being debated Reforming the Workplace is an account of a successful program that is now a model for nationwide improvements in various regulatory agencies Joseph Rees's focus is the Occupational Safety and Health Administration OSHA which in 1982 announced a major shift in policy from strict government regulation to self regulation by industries with proven safety records In California this resulted in the Cooperative Compliance Program CCP an arrangement among labor unions management and California OSHA that became responsible for overseeing safety regulations at seven large construction sites throughout the state In his detailed study of the CCP Joseph Rees provides important empirical data and assesses the reasons the program succeeded That success is so important he demonstrates because the CCP represents a different approach to reform self regulation that can be extended to and tailored for many troubled agencies Reforming the Workplace is a comprehensive study that will be a valuable resource for scholars and students of law and social policy in general and of federal regulation policies in particular

Reforming the Workplace Joseph Vytutas Rees, 1986 **The Oxford Handbook of Regulation** Robert Baldwin, Martin Cave, Martin Lodge, 2012-07-19 Regulation is often thought of as an activity that restricts behaviour and prevents the occurrence of certain undesirable activities but the influence of regulation can also be enabling or facilitative as when a market could potentially be chaotic if uncontrolled This Handbook provides a clear and authoritative discussion of the major trends and issues in regulation over the last thirty years together with an outline of prospective developments It brings together contributions from leading scholars from a range of disciplines and countries Each chapter offers a broad overview of key current issues and provides an analysis of different perspectives on those issues Experiences in different jurisdictions and insights from various disciplines are drawn upon and particular attention is paid to the challenges that are encountered when specific approaches are applied in practice Contributors develop their own distinctive arguments relating to the central issues in regulation and apply scholarly rigour and clear writing to matters of high policy relevance The essays are original accessible and agenda setting and the Handbook will be essential reading both to students and researchers and to with regulatory and regulated professionals *Regulating Audiovisual Services* Thomas Gibbons, 2023-07-14 In recent years the changing nature of audiovisual services has had a significant impact on regulatory policy and practice The adoption of digital technology means that broadcasting cable satellite the Internet and mobile telephony are converging enabling each of them to deliver the same kinds of content and allowing users to exercise much greater choice over the kind of material that they receive and when they receive it The essays examine the implications for regulatory design asking whether there is still a role for traditional style state controls or whether other techniques such as competition in the market and self regulation are

more appropriate They also explore how in the digital era structural issues of media ownership and control become problems of access and interconnection between services and how content regulation focuses more on problems raised by the interactions between providers and users the relationship between freedom of information and technologies to control it and the international reach of the new media *Legal and Ethical Standards in Corporate Insolvency* Elizabeth

Streten,2024-06-17 Recent financial crisis and the global financial impacts of the COVID 19 pandemic have brought renewed interest to the regulation and practice of corporate insolvency and restructuring Modernisation of the insolvency profession and the regulation of its practitioners is a contemporary concern and recent years have seen significant reforms of insolvency law The success of such reforms can be enhanced through a clear understanding of difficulties faced by the insolvency profession in achieving successful restructuring and insolvency outcomes and through the determination of effective solutions to those difficulties However there is limited empirical data to inform the day to day practice of insolvency nor the difficulties experienced by insolvency practitioners in pursuing insolvency and restructuring solutions This book addresses this absence of data and understanding examining the role and practice of corporate insolvency practitioners and exploring the challenges that they encounter Offering an empirical study together with a comparative analysis of the experiences of practitioners around the world this book facilitates a greater understanding of corporate insolvency practice confronting a misunderstanding of and under confidence in corporate insolvency practitioners making it key reading for academics practitioners and regulators working in the area of corporate insolvency **Explaining Compliance** Christine

Government and Markets Edward J. Balleisen, David A. Moss, 2010 After two generations of emphasis on governmental inefficiency and the need for deregulation we now see growing interest in the possibility of constructive governance alongside public calls for new smarter regulation Yet there is a real danger that regulatory reforms will be rooted in outdated ideas As the financial crisis has shown neither traditional market failure models

nor public choice theory by themselves sufficiently inform or explain our current regulatory challenges Regulatory studies long neglected in an atmosphere focused on deregulatory work is in critical need of new models and theories that can guide effective policy making This interdisciplinary volume points the way toward the modernization of regulatory theory Its essays by leading scholars move past predominant approaches integrating the latest research about the interplay between human behavior societal needs and regulatory institutions The book concludes by setting out a potential research agenda for the social sciences
