Diane C Donovan The Midwest Book Review **Reframing women's health** Alice J. Dan,1994 Women's Health and Medicine: Transforming Perspect Alice J. Dan,Sue V. Rosser,2003-06 A vital collection of essays on women s health and women s health studies edited by leaders in the field Representing the Other Sue Wilkinson,Celia Kitzinger,1996-07-16 This innovative collection addresses a challenging issue in contemporary feminist theory and practice whether and how we should represent members of groups to which we do not ourselves belong The discussions identify key concerns related to representation and difference Contributors draw on personal experiences of speaking for and about Others in their research professional practice writing or political activism Problems of representing Others with ethnic or cultural backgrounds different from one s own are highlighted and the discussions extend to representations of children prostitutes infertile women fat women gay men with HIV AIDS and people with disabilities **The Impact of Women in Congress** Debra L. Dodson,2006-05-18 While existing literature provides compelling evidence that women in public office make a difference the relationship between descriptive and substantive representation of women in political institutions long the domain of men is neither simple nor certain Embracing New Institutionalists warnings of the dangers of studying behaviour in an institutional vacuum this book uses two strikingly different yet consecutive congresses the Democratically controlled 103rd Congress elected during the Year of the Woman and the Republican controlled 104th Congress elected during the Year of the Angry White Male as laboratories to explore the complexity of the relationship between women s presence and impact In depth interviews with hundreds of staff lobbyists and women members of Congress along with other quantitative and archival data are the foundation for case studies of three highly visible policy areas reproductive rights women s health and health care policy important to women but with strikingly different outcomes across the two Congresses The inquiry is quickly moved beyond the simple question Do women make a difference Dodson confronts the contested issues surrounding difference which often lurk beneath the surface the probabilistic rather than deterministic relationship between descriptive and substantive representation of women the contested legitimacy of women representing women and the disagreement about what it means to represent women The analysis moves the literature toward a better integrated understanding of how gendered forces at the individual institutional and societal levels combine to reinforce and redefine gendered relationships to power in the public sphere The results can be generalized over time and across settings are meaningful even in periods when the answer to the question of whether women make a difference seems to be more frequently no than yes and point to strategies that may bolster the impact of women s presence for substantive representation of women *Women and Alcohol* Jan Howard,1996 *Medical Sociology: Social structures and health* Graham Scambler,2005 **Comparing Social Policies** Misa Izuhara,2003-02-26 This title provides a background to the development of post war social policy in Britain and Japan It analyses five specific policy areas looking at the development process of policy and practices current issues and future directions **Health Care Ethics** Eileen E. Morrison,Rachel Ellison,2025-01-07 Focused on today s critical issues

from an ethical standpoint Health Care Ethics Critical Issues for the 21st Century Fifth Edition brings together the insights of a diverse panel of leading experts in the fields of bioethics long term care and health administration and more to examine the key issues for individuals organizations and society The early chapters of this thought provoking book offer readers a solid understanding of healthcare ethics They cover the fundamental principles and theories that underpin healthcare ethics Later chapters shift the focus to the pressing issues of our time such as autonomy the patient s right to choose health inequities health inequality COVID 19 and ethical decision making These chapters also introduce the ethical theories their application and the principles that guide them
