Refugee Manipulation War Politics And The Abuse Of Human Suffering:

Refugee Manipulation Stephen John Stedman, Dr. Fred Tanner, 2004-05-13 Since World War II refugee organizations have faced a recurrent challenge the manipulation of refugees by warring parties to further their own aims Some armies in civil wars facing military defeat use refugees as assets to establish the international legitimacy of their cause treat refugee camps as sanctuaries and recruitment pools and limit access to refugees to ensure that they will not repatriate Focusing on the geopolitical security environment surrounding militarized camps and the response of humanitarian agencies the contributors to this volume examine the ways armed groups manipulate refugees and how and why international actors assist their manipulation They then offer suggestions for reducing the ability of such groups to use the suffering of refugees to their own advantage The contributors examine three cases Cambodian refugees along the Thai border in the 1970s and 1980s Afghan refugees in Pakistan in the 1980s and 1990s and Rwandan refugees in Eastern Zaire from 1994-96 They argue that refugee manipulation occurs because warring parties gain resources in their fight for power and other actors often the host government and regional and major powers encourage and support it Manipulation is allowed to occur because the international refugee regime and major states have not identified a consistent approach to stopping it In the post Cold War era the United Nations and its members have chosen to treat the issue as a humanitarian problem instead of a security problem As the contributors make clear however manipulation of refugees has important ramifications for international security turning some civil wars into larger protracted regional wars They argue that the geopolitics of refugee manipulation leads to sanguine conclusions about stopping it Solutions must change the moral political and strategic calculations of states that are implicated in the manipulation As long as the problem is not deemed a security threat

Refugee Manipulation

Stephen John Stedman, Fred Tanner, 2003 Includes statistics *Anti-Refugee Violence and African Politics* Ato Kwamena Onoma, 2013-10-07 Using comparative cases from Guinea Uganda and the Democratic Republic of Congo this study explains why some refugee hosting communities launch large scale attacks on civilian refugees whereas others refrain from such attacks even when encouraged to do so by state officials Ato Kwamena Onoma argues that such outbreaks only happen when states instigate them because of links between a few refugees and opposition groups Locals embrace these attacks when refugees are settled in areas that privilege residence over indigeneity in the distribution of rights ensuring that they live autonomously of local elites The resulting opacity of their lives leads locals to buy into their demonization by the state Locals do not buy into state denunciation of refugees in areas that privilege indigeneity over residence in the distribution of rights because refugees in such areas are subjugated to locals who come to know them very well Onoma reorients the study of refugees back to a focus on the disempowered civilian refugees that constitute the majority of refugees even in cases of severe refugee militarization *Long Journey to Justice* Molly Todd, 2021-02-23 As bloody wars raged in Central America during the last third of the twentieth century hundreds of North American groups adopted villages in war torn Guatemala

Nicaragua and El Salvador Unlike government based cold war era Sister City programs these pairings were formed by ordinary people often inspired by individuals displaced by US supported counterinsurgency operations Drawing on two decades of work with former refugees from El Salvador as well as unprecedented access to private archives and oral histories Molly Todd s compelling history provides the first in depth look at grassroots sistering This model of citizen diplomacy emerged in the mid 1980s out of relationships between a few repopulated villages in Chalatenango El Salvador and US cities Todd shows how the leadership of Salvadorans and left leaning activists in the US concerned with the expansion of empire as well as the evolution of human rights related discourses and practices created a complex dynamic of cross border activism that continues today

The Future Faces of War Jennifer Dabbs Sciubba,2010-12-07 This comprehensive and clear volume reveals the numerous ways demographic trends such as age structure composition and migration influence national security Population size structure distribution and composition affect security in numerous ways including national power civil conflict and development *The Future Faces of War* Population and National Security offers a comprehensive overview of how demographic trends can function as components indicators and multipliers of a state s national security Each chapter focuses on a particular demographic trend and describes its national security implications in three realms military regime and structural Illustrating the mechanisms by which demography and security are connected the book pushes the conversation forward by challenging common conceptions about demographic trends and national security Key for policymakers and general readers alike it goes on to suggest ways trends can provide opportunities for building partnerships and strengthening states Focusing on multiple scenarios and the theoretical links between population and security the insights gathered here will remain relevant for years to come

No Refuge Robert Muggah,2013-04-04 Africa s refugee and IDP camps are a cause of major concern to the international community Millions of men women and children endure situations of protracted displacement in deplorable conditions In the absence of more durable solutions refugees and IDPs in many situations are exceptionally susceptible to militarization *No Refuge* describes how the phenomenon of refugee militarization threatens to undermine asylum and protection This edited volume is a timely and invaluable resource for governments UNHCR protection officers UN agencies and NGOs It is a must read for all concerned with improving the safety and rights of refugees and IDPs on the ground Ant nio Guterres United Nations High Commissioner for Refugees *No Refuge* provides a timely analysis by a group of Africa experts of the causes and consequences of refugee militarization in Africa It should prove invaluable for practitioners policy makers and academics in their quest to find practical and effective remedies for this growing humanitarian and security problem I highly recommend it Professor Gil Loescher Centre for International Studies University of Oxford The militarization of refugees and internally displaced persons IDPs is a persistent and tragic feature of protracted displacement situations especially in Africa The phenomenon threatens access to asylum and protection core pillars of refugee law and the mandates of aid agencies But while policy debates rage over how best to disarm refugees and

prevent them from destabilizing neighbouring states there is surprisingly little evidence explaining why displaced people arm themselves or precisely how militarization affects hosting communities No Refuge analyses the experience of refugee and IDP militarization in several African countries affected by and emerging from civil war including Guinea Rwanda Uganda and Tanzania It provides a considered overview of the historical political and regional dimensions of refugee and IDP militarization in Africa as well as international and national efforts to contain it

Mobilising the Diaspora Alexander Betts, Will Jones, 2016-11-17 Over half the world lives under authoritarian regimes For these people the opportunity to engage in politics moves outside the state's territory Mobilising across borders diasporas emerge to challenge such governments This book offers an in depth examination of the internal politics of transnational mobilisation Studying Rwandan and Zimbabwean exiles it exposes the power interests and unexpected agendas behind mobilisation revealing the surprising and ambivalent role played by outsiders Far from being passive victims waiting for humanitarian assistance refugees engage actively in political struggle From Rwandans resisting their repatriation to Zimbabweans preventing arms shipments political exiles have diverse aims and tactics Conversely the governments they face also deploy a range of transnational strategies and those that purport to help them often do so with hidden agendas This shifting political landscape reveals the centrality of transnationalism within global politics the historical and political contingency of diasporas and the precarious agency of refugees

Handbook of the Economics of International Migration Barry Chiswick, Paul Miller, 2014-12-08 The economic literature on international migration interests policymakers as well as academics throughout the social sciences These volumes the first of a new subseries in the Handbooks in Economics describe and analyze scholarship created since the inception of serious attention began in the late 1970s This literature appears in the general economics journals in various field journals in economics especially but not exclusively those covering labor market and human resource issues in interdisciplinary immigration journals and in papers by economists published in journals associated with history sociology political science demography and linguistics among others Covers a range of topics from labor market outcomes and fiscal consequences to the effects of international migration on the level and distribution of income and everything in between Encompasses a wide range of topics related to migration and is multidisciplinary in some aspects which is crucial on the topic of migration Appeals to a large community of scholars interested in this topic and for whom no overviews or summaries exist

Biopolitics, Necropolitics, Cosmopolitics C.L. Quinan, Kathrin Thiele, 2021-03-25 The concepts of biopolitics and necropolitics have increasingly gained scholarly attention particularly in light of today's urgent and troubling issues that mark some lives as more or less worthy than others including the migration crisis rise of populism on a global scale homonationalist practices and state sanctioned targeting of gender sexual racial and ethnic others This book aims to nuance this conversation by emphasising feminist and queer investments and interventions and by adding the analytical lens of cosmopolitics to ongoing debates around life living and death dying in the current political climate In this way we move

forward toward envisioning feminist and queer futures that rethink categories such as human and subjectivity based on classical modern premises Informed by feminist queer studies postcolonial theory cultural analysis and critical posthumanism Biopolitics Necropolitics Cosmopolitics engages with longstanding questions of biopolitics and necropolitics in an era of neoliberalism and late capitalism but does so by urging for a more inclusive and less violent cosmopolitical framework Taking account of these global dynamics that are shaped by asymmetrical power relations this fruitful posthumanist and post decolonial approach allows for visions of transformation of the matrix of inclusion and exclusion into feminist queer futures that work towards planetary social justice This book is a significant new contribution to feminist and queer philosophy and politics and will be of interest to academics researchers and advanced students of gender studies postcolonial studies sociology philosophy politics and law The chapters in this book were originally published as a special issue of the Journal of Gender Studies

The Oxford Handbook of Late Colonial Insurgencies and Counter-Insurgencies Martin Thomas, Gareth Curless, 2023-10-10 The lethality of conflicts between insurgent groups and counter insurgent security forces has risen markedly since the Second World War just as those of conventional or inter state wars have declined For several decades conflicts within states rather than between them have been the prevalent form of organised political violence worldwide Recent conflicts in Afghanistan Iraq and Syria have fired interest in colonial experiences of rebellion while current western interventions in sub Saharan Africa have prompted accusations of militarist humanitarianism Yet despite mounting interest in counter insurgency and empire comparative investigation of colonial responses to insurrection and civil disorder is sparse Some scholars have written of a golden age of counter insurgency which began with Britain's declaration of a Malayan Emergency in 1948 and ended with the withdrawal of US ground troops from Vietnam in 1973 It is with this period if not with any presumed golden age that this volume is concerned This Handbook connects ideas about contested decolonization and the insurgencies that inspired it with an analysis of patterns and singularities in the conflicts that precipitated the collapse of overseas empires It attempts a systematic study of the global effects of organized anti colonial violence in Asia and Africa The objective is to reconceptualize late colonial violence in the European overseas empires by exploring its distinctive character and the globalizing processes underpinning it
