

# Debt Refunding

---

- Means that existing debt is replaced with new issue of debt – hopefully at a lower interest rate
  - Bonds traded on the open market can be repurchased at the going market rate
    - Example in text (p. 245-248) shows there is no real economic gain or loss from refunding debt
    - However, there may be a “book” gain or loss: difference between book value and price paid to retire old bonds
  - Existing debt may have a “call feature” that lets the government repay face value early (but several years after original issue date)
    - Bonds without a call feature that are not actively traded are more challenging – this is the situation that leads to use of “in-substance defeasance”
