**Resilience in Papal Rome, 1656-1870** Marina Formica,Donatella Strangio,2023-09-23 This book analyses the evolution of the city of Rome in particular papal Rome from the plague of 1656 until 1870 when it became the capital of the Kingdom of Italy The authors explore papal Rome as a resilient city that had to cope with numerous crises during this period By focusing on a selection of different crises in Rome the book combines cultural political and economic history to examine key turning points in the city s history The book is split into chapters exploring themes such as diplomacy and international relations disease environmental disasters famine public debt and unravels the political economic and social consequences of these transformative events All the chapters are based on untapped original sources chiefly from the State Archive in Rome the Vatican Archives the Rome Municipal Archives the cole Fran aise Library the National Library and the Capitoline Library

**Rethinking the Work Ethic in Premodern Europe** Gábor Almásy, Giorgio Lizzul,2023-11-14 This book investigates how work ethics in Europe were conceptualised from the Middle Ages to the nineteenth century Through analysis of a range of discourses it focuses on the roles played by intellectuals in formulating communicating and contesting ideas about work and its ethical value The book moves away from the idea of a singular Weberian work ethic as fundamental to modern notions of work and instead emphasises how different languages of work were harnessed for a variety of social intellectual religious economic political and ideological objectives Rather than a singular work ethic that left a decisive mark on the development of Western culture and economy the volume stresses plurality The essays draw on approaches from intellectual social and cultural history They explore how why and in what contexts labour became an important and openly promoted value who promoted or opposed hard work and for what reasons and whether there was an early modern break with ancient and medieval discourses on work These historicized visions of work ethics help enrich our understanding of present day changing attitudes to work    **Nexus Network Journal 11,2** Kim Williams,2009-12-05 The title of this issue of the Nexus Network Journal Architecture Mathematics and Structure is deliberately ambiguous At first glance it might seem to indicate the relationship between what buildings look like and how they stand up This is indeed one aspect of what we are concerned with

here But on a deeper level the fundamental concept of structure is what connects architecture to mathematics Both architecture and mathematics are highly structured formal systems expressed through a symbolic language For architecture the generating structure might be geometrical musical modular or fractal Once we understand the nature of the structure underlying the design we are able to read the meaning inherent in the architectural forms The papers in this issue all explore themes of structure in different ways
