Langslow, 2000-06-08 Despite the ubiquitous importance of medicine in Roman literature philosophy and social history the language of Latin medical texts has not been properly studied This book presents the first systematic account of a part of this large rich field Concentrating on texts of high medicine written in educated even literary Latin Professor Langslow offers a detailed linguistic profile of the medical terminology of Celsus and Scribonius Largus first century AD and Theodorus Priscianus and Cassius Felix fifth century AD with frequent comparisons with their respective near contemporaries The linguistic focus is on vocabulary and word formation and the book thus addresses the large question of the possible and the preferred means of extending the vocabulary in Latin at the beginning and end of the Empire Some syntactic issues including word order and nominalization are also discussed and sections on the sociolinguistic background and stylistic features consider the question to what extent we may speak of medical Latin in the strong sense as the language of a group and draw comparisons and contrasts between ancient and modern technical languages *The Roman Empire* Matthew Dillon, Christopher Matthew, 2022-05-05 Religion was integral to the conduct of war in the ancient world and the Romans were certainly no exception No campaign was undertaken no battle risked without first making sacrifice to propitiate the appropriate gods such as Mars god of War or consulting oracles and omens to divine their plans Yet the link between war and religion is an area that has been regularly overlooked by modern scholars examining the conflicts of these times This volume addresses that omission by drawing together the work of experts from across the globe The chapters have been carefully structured by the editors so that this wide array of scholarship combines to give a coherent comprehensive study of the role of religion in the wars of the Roman Empire Aspects considered in depth include the Imperial cults and legionary loyalty the army and religious regional disputes Trajan and religion Constantine and Christianity omens and portents funerary cults and practices the cult of Mithras the Imperial sacramentum religion Imperial military medicine *Library of Congress Subject Headings* Library of Congress, 1997
