languages we speak Western civilization owes a debt to these classical societies Yet the Greeks and Romans did not emerge fully formed their culture grew from an active engagement with a deeper past drawing on ancient myths and figures to shape vibrant civilizations In *The Birth of Classical Europe* the latest entry in the much acclaimed Penguin History of Europe historians Simon Price and Peter Thonemann present a fresh perspective on classical culture in a book full of revelations about civilizations we thought we knew In this impeccably researched and immensely readable history we see the ancient world unfold before us with its grand cast of characters stretching from the great Greeks of myth to the world shaping Caesars A landmark achievement *The Birth of Classical Europe* provides insight into an epoch that is both incredibly foreign and surprisingly familiar *The Religious Worlds of the Laity in Late Antique Gaul* Lisa Kaaren Bailey, 2016-04-07

Christianity in the late antique world was not imposed but embraced and the laity were not passive members of their religion but had a central role in its creation This volume explores the role of the laity in Gaul bringing together the fields of history archaeology and theology First this book follows the ways in which clergy and monks tried to shape and manufacture lay religious experience They had themselves constructed the category of the laity which served as a negative counterpart to their self definition Lay religious experience was thus shaped in part by this need to create difference between categories The book then focuses on how the laity experienced their religion how they interpreted it and how their decisions shaped the nature of the Church and of their faith This part of the study pays careful attention to the diversity of the laity in this period their religious environments ritual engagement behaviours knowledge and beliefs The first volume to examine laity in this period in Gaul a key region for thinking about the transition from Roman rule to post Roman society *The Religious Worlds of the Laity in Late Antique Gaul* fills an important gap in current literature *Cities of the Classical World* Colin

McEvedy, 2011-11-03 From Alexandria to York this unique illustrated guide allows us to see the great centres of classical civilization afresh The key feature of *Cities of the Classical World* is 120 specially drawn maps tracing each city's thoroughfares and defences monuments and places of worship Every map is to the same scale allowing readers for the first time to appreciate visually the relative sizes of Babylon and Paris London and Constantinople There is also a clear incisive commentary on each city's development strategic importance rulers and ordinary inhabitants This compelling and elegant atlas opens a new window on to the ancient world and will transform the way we see it *The Western European Loess Belt* Corrie C. Bakels, 2009-07-29 This book deals with the early history of agriculture in a defined part of Western Europe the loess belt west of the river Rhine It is a well illustrated book that integrates existing and new information starting with the first farmers and ending when food production was no longer the chief source of livelihood for the entire population The loess belt was chosen because it is a region with only one type of soil and climate as these are all important factors where farming is concerned Subjects covered are crops crop cultivation livestock and livestock handling the farm and its yard and the farm in connection with other farms Crop plants and animals are described together with their origin New tools such as the

plough wheen wagon and scythe are introduced Groundplans of farm buildings the history of the outhouse and the presence or absence of hamlets are presented as well and the impact of farming on the landscape is not forgotten The loess belt was not an island and the world beyond its boundaries was important for new ideas new materials and new people Summarising six millennia of agriculture the thinking in terms of the Western European loess belt as one agricultural cultural unit seems justified
