Roman Art in the Private Sphere Elaine K. Gazda, Anne E. Haackl, 1991 This is a stimulating book and should be compulsory reading for all students of Roman art Classical Review For all the authors attention to the ensemble a sense of the relation between the formal and the iconographic and the desire to historicize their material contribute to making this anthology unusual in its rigorous and creative attention to the way that art and architecture participate in the construction of the image of the Roman elite Art Bulletin Roman Art in the Private Sphere presents an impressive case for the social and art historical importance of the paintings mosaics and sculptures that filled the private houses of the Roman elite The six essays in this volume range from the first century B C E to the fourth century C E and from the Italian peninsula to the Eastern Empire and North African provinces The essays treat works of art that belonged to every major Roman housing type the single family atrium houses and the insula apartment blocks in Italian cities the dramatically sited villas of the Campanian coast and countryside and the palatial mansions of late antique provincial aristocrats In a complementary fashion the essays consider domestic art in relation to questions of decorum status wealth social privilege and obligation Patrons emerge as actively interested in the character of their surroundings artists appear as responsive to the desire of their patrons The evidence in private art of homosexual conduct in high society is also set forth Originality of subject matter sophisticated appreciation of stylistic and compositional nuance and philosophical perceptions of the relationship of humanity and nature are among the themes that the essays explore Together they demonstrate that Roman domestic art must be viewed on its own terms Elaine K Gazda is Professor of the History of Art and Curator of Hellenistic and Roman Antiquities at the Kelsey Museum of Archaeology University of Michigan

Roman Architecture Janet DeLaine,2024-05-09 Roman Architecture casts new light not only on many familiar monuments of the city of Rome but also on less well known examples from across the Roman empire Rome and its empire were fundamental to the development of western architecture and its forms and motifs remain significant elements of our own built environments Roman Architecture places the varied architecture of ancient Rome from its humble apartment blocks to its grand public structures within the broader context of Roman society It takes as its starting point the writings of the Roman architect Vitruvius as one voice in a broader contemporary debate about the nature and value of architecture What did the Romans themselves think architecture was for What was built by whom and why How was architecture represented in

Hackworth Petersen, 2011-09-19 From monumental tombs and domestic decoration to acts of benefaction and portraits of ancestors Roman freed slaves or freedmen were prodigious patrons of art and architecture Traditionally however the history of Roman art has been told primarily through the monumental remains of the emperors and ancient writers who worked in their circles In this study Lauren Petersen critically investigates the notion of freedman art in scholarship dependent as it is on elite authored texts that are filled with hyperbole and stereotypes of freedmen such as the memorable fictional character Trimalchio a boorish ex slave in Petronius Satyricon She emphasizes integrated visual ensembles within defined historical and social contexts and aims to show how material culture can reflect preoccupations that were prevalent throughout Roman society Interdisciplinary in scope this book explores the many ways that monuments and artistic commissions by freedmen spoke to a much more complex reality than that presented in literature *Cyclopedia of Drawing: Freehand, perspective,*

Representation of Space in Graeco-Roman Art Michael Koortbojian, 2023-11-06 This book assesses the role of relief in the representation of space in Graeco Roman artistic practice and its study from Winckelmann to the mid twentieth century when Classical art developed as a theoretical discipline The role of relief in the history of ancient sculpture has long been acknowledged yet the problems posed by an engagement with the representation of space have not been a subject of specific and sustained inquiry Neither a conventional history nor a comprehensive historiography this book traces the study of relief of its formal character its artistic purpose its aesthetic significance and its historical treatment The contribution to scholarship is three fold 1 By means of a wide array of examples the book demonstrates that the visual strategies employed to represent space during the Graeco Roman period were a continuously evolving repertory tied to the refinement of techniques and the transformation of styles that those techniques brought into being 2 It examines ideas now commonplace based on scholarship now long neglected if not completely forgotten And 3 it reveals how competing interpretations of the

The Roman orders, 1909 **Nature and Imagination in Ancient and Early Modern Roman Art** Gabriel Pihás, 2022-07-27 This volume uses the art of Rome to help us understand the radical historical break between the fundamental ancient presupposition that there is a natural world or cosmos situating human life and the equally fundamental modern emphasis on human imagination and its creative power Rome's unique art history reveals a different side of the battle between ancients and moderns than that usually raised as an issue in the history of science and philosophy The book traces the idea of a cosmos in pre modern art in Rome from the reception of Greek art in the Roman republic to the construction of the Pantheon to early Christian art and architecture It then sketches the disappearance of the presupposition of a cosmos in the High Renaissance and Baroque periods as creativity became a new ideal Through discussions of the art and architecture that defines proto modern Rome from Michelangelo's *terribilità* in the Sistine Chapel Caravaggio's realism Baroque illusionism the infinities of Borromini's architecture to the Grand Tour's representations of ruins through an interpretation of such major issues and works this book shows how modern art liberates us while leaving us feeling estranged from our grounding in the natural world The book will be of interest to scholars working in art history architectural history classics philosophy and early modern history and culture
