The Bombing Of Brittany: Solving The Wrong Problem Major Jeremiah S. Heathman,2014-08-15 As a result of the Allied bombing campaign against Nazi submarine bases during the Second World War the cities of Brest Lorient and Saint Nazaire were nearly completely destroyed Despite thousands of bombing missions all three submarine bunkers still stand today This monograph examines the effectiveness of the Allied bombing campaign against German submarine bases in Brittany by analyzing the campaign through the use of a design methodology Research is broken down into three frames the operational approach the operational environment and the problem frame The first frame provides an account of the bombing missions and effects Next an overview of the operational environment is conducted by exploring the historical context of Brittany German

construction efforts and Allied institutional barriers The study concludes by examining the problem frame which entails how the Allies perceived their operational problem and developed an approach based on their understanding Ultimately the Allies failed to accurately identify their problem and developed an ineffective approach towards defeating the threat Had the Allies incorporated design thinking into their planning and execution they may have developed an effective campaign towards defeating the Nazi U boat threat rather than solving the wrong problem *Building State Capability* Matt Andrews, Lant Pritchett, Michael Woolcock, 2017-01-19 This is an open access title available under the terms of a CC BY NC ND 4.0 licence It is free to read at Oxford Scholarship Online and offered as a free PDF download from OUP and selected open access locations Governments play a major role in the development process and constantly introduce reforms and policies to achieve developmental objectives Many of these interventions have limited impact however schools get built but children don't learn IT systems are introduced but not used plans are written but not implemented These achievement deficiencies reveal gaps in capabilities and weaknesses in the process of building state capability This book addresses these weaknesses and gaps It starts by providing evidence of the capability shortfalls that currently exist in many countries showing that many governments lack basic capacities even after decades of reforms and capacity building efforts The book then analyses this evidence identifying capability traps that hold many governments back particularly related to isomorphic mimicry where governments copy best practice solutions from other countries that make them look more capable even if they are not more capable and premature load bearing where governments adopt new mechanisms that they cannot actually make work given weak extant capacities The book then describes a process that governments can use to escape these capability traps Called PDIA problem driven iterative adaptation this process empowers people working in governments to find and fit solutions to the problems they face The discussion about this process is structured in a practical manner so that readers can actually apply tools and ideas to the capability challenges they face in their own contexts These applications will help readers devise policies and reforms that have more impact than those of the past *Where to from Here?* Stephen Duckett, 2012-02-09 Universal healthcare perhaps the most distinguishing feature of Canada's public policy is under fire criticized for its heavy expense and questionable sustainability In *Where to From Here* Keeping Medicare Sustainable Stephen Duckett defends Canadian Medicare addressing key concerns and refuting criticism while also acknowledging flaws in the system and room for improvement Duckett argues that while the fundamentals of Medicare are sound a great deal of change is necessary to keep it sustainable This book envisions a Medicare that is not static and simply responsive to problems but an active shifting system that keeps up with the evolving needs of a rapidly changing time Duckett systematically lays out proposals for incremental change across a range of areas including primary care hospitals and the health workforce *Where to From Here* Presents an unflinching defense of one of Canada's iconic policies while keeping a clear eye on the future of the nation's health **Treating Health Care** Raisa Deber, 2018-01-18 Canada has been among the world leaders in recognizing the
