Romantic Rocks Aesthetic Geology:

Romantic Rocks, Aesthetic Geology Noah Heringman, 2011-02-23 Why are rocks and landforms so prominent in British Romantic poetry Why for example does Shelley choose a mountain as the locus of a voice to repeal large codes of fraud and woe Why does a cliff in the boat stealing episode of Wordsworth's *Prelude* chastise the young thief Why is petrification or stonifying in Blake's coinage the ultimate figure of dehumanization Noah Heringman maintains that British literary culture was fundamentally shaped by many of the same forces that created geology as a science in the period 1770-1820 He shows that landscape aesthetics the verbal and social idiom of landscape gardening natural history the scenic tour and other forms of outdoor improvement provided a shared vernacular for geology and Romanticism in their formative stages *Romantic Rocks Aesthetic Geology* reexamines a wide range of eighteenth and nineteenth century poetry to discover its relationship to a broad cultural consensus on the nature and value of rocks and landforms Equally interested in the initial surge of curiosity about the earth and the ensuing process of specialization Heringman contributes to a new understanding of literature as a key forum for the modern reorganization of knowledge

Romantic Climates Anne Collett, Olivia Murphy, 2019-06-29 This book seeks to uncover how today's ideas about climate and catastrophe have been formed by the thinking of Romantic poets novelists and scientists and how these same ideas might once more be harnessed to assist us in the new climate challenges facing us in the present The global climate disaster following Mt Tambora's eruption in 1815 the Year without a Summer is a starting point from which to reconsider both how the Romantics responded to the changing climates of their day and to think about how these climatic events shaped the development of Romanticism itself As the contributions to this volume demonstrate climate is an inescapable aspect of Romantic writing and thinking Ideologies and experiences of climate inform everything from scientific writing to lyric poetry and novels The Diodati circle that assembled in Geneva in 1816 Lord Byron Percy and Mary Shelley John Polidori and John Cam Hobhouse and the gothic novelist MG Monk Lewis is synonymous with the literature of that dreary uncanny season Essays in this collection also consider the work of Jane Austen John Keats and William Wordsworth along with less well known figures such as the scientist Luke Howard and later responses to Romantic climates by John Ruskin and Virginia Woolf

contexts of other periods and countries The Handbook builds on previous scholarship in the field considers emerging trends and evolving methodologies and suggests future areas of study Throughout the emphasis is on lucid expression rather than gnomic declaration and on chapters that offer not a dutiful survey but evaluative assessments that keep an eye on the bigger picture yet also dwell meaningfully on specific paradoxes and the most telling examples Taken as a whole the volume demonstrates the energy originality and diversity at the crux of British Romantic nonfiction prose It vigorously challenges the traditional construction of the British Romantic movement as focused too exclusively on the accomplishments of its poets and it reveals the many ways in which scholars of the period are steadily broadening out and opening up delineations of British Romanticism in order to encompass and thoroughly evaluate the achievements of its nonfiction prose writers Romantic Revelations Chris Washington, 2019-08-22 Romantic Revelations shows that the nonhuman is fundamental to Romanticism's political responses to climatic catastrophes Exploring what he calls post apocalyptic Romanticism Chris Washington intervenes in the critical conversation that has long defined Romanticism as an apocalyptic field Apocalypse means the revelation of a perfected world which sees Romanticism's back to nature environmentalism as a return to paradise and peace on earth Romantic Revelations however demonstrates that the destructive climate change events of 1816 the year without a summer changed Romantic thinking about the environment and the end of the world Their post apocalyptic visions correlate to the beginning of the Anthropocene the time when humans initiated the possible extinction of their own species and potentially the earth Rather than constructing paradises where humans are reborn or human existence ends the later Romantics are interested in how to survive in the ashes after great social and climatic global disasters Romantic Revelations argues that Percy Shelley Mary Shelley Lord Byron John Clare and Jane Austen sketch out a post apocalyptic world that in contrast to the sunnier Romantic narratives is paradoxically the vision that offers us hope In thinking through life after disaster Washington contends that these authors craft an optimistic vision of the future that leads to a new politics

Environmentalists Dewey W. Hall, 2016-04-08 In his study of Romantic naturalists and early environmentalists Dewey W Hall asserts that William Wordsworth and Ralph Waldo Emerson were transatlantic literary figures who were both influenced by the English naturalist Gilbert White In Part 1 Hall examines evidence that as Romantic naturalists interested in meteorology Wordsworth and Emerson engaged in proto environmental activity that drew attention to the potential consequences of the locomotive s incursion into Windermere and Concord In Part 2 Hall suggests that Wordsworth and Emerson shaped the early environmental movement through their work as poets turned naturalists arguing that Wordsworth influenced Octavia Hill s contribution to the founding of the United Kingdom s National Trust in 1895 while Emerson inspired John Muir to spearhead the United States National Parks movement in 1890 Hall s book traces the connection from White as a naturalist turned poet to Muir as the quintessential early environmental activist who camped in Yosemite with President Theodore Roosevelt Throughout Hall raises concerns about the growth of industrialization to make a persuasive case for literature s importance to the rise of environmentalism
