Clarke,2008-03-20 This book has two main and connected themes the conception and articulation of time in the Greek world and the creation of history especially in the context of the Greek city Both how time is expressed and how the past is presented have often been seen as reflections of society By looking at the construction of the past through the medium of local historiography where we can view these issues in the relatively restricted world of individual city states we can gain a clearer insight into how different versions of the past and different constructions of time were offered to the community for approval In this way the citizens were able to negotiate time past and indeed their own history and thereby to express their values and aspirations

On Roman Time Michele Renee Salzman,1991-03-25 Because they list all the public holidays and pagan festivals of the age calendars provide unique insights into the culture and everyday life of ancient Rome The Codex Calendar of 354 miraculously survived the Fall of Rome Although it was subsequently lost the copies made in the Renaissance remain invaluable documents of Roman society and religion in the years between Constantine s conversion and the fall of the Western Empire In this richly illustrated book Michele Renee Salzman establishes that the traditions of Roman art and literature were still very much alive in the mid fourth century Going beyond this analysis of precedents and genre Salzman also studies the Calendar of 354 as a reflection of the world that produced and used it Her work reveals the continuing importance of pagan festivals and cults in the Christian era and highlights the rise of a respectable aristocratic Christianity that combined pagan and Christian practices Salzman stresses the key role of the Christian emperors and imperial institutions in supporting pagan rituals Such policies of accomodation and assimilation resulted in a gradual and relatively peaceful transformation of Rome from a pagan to a Christian capital

The Protestant advocate: or, A review of publications relating to the Roman catholic question, and repertory of Protestant intelligence ,1814

Imagined Romes C. David Benson,2019-03-12 This volume explores the conflicting representations of ancient Rome one of the most important European cities in the medieval imagination in late Middle English poetry Once the capital of a great pagan empire whose ruined monuments still inspired awe in the Middle Ages Rome the seat of the pope became a site of Christian pilgrimage owing to the fame of its early martyrs whose relics sanctified the city and whose help was sought by pilgrims to their shrines C David Benson analyzes the variety of ways that Rome and its citizens both pre Christian and Christian are presented in a range of Middle English poems from lesser known anonymous works to the poetry of Gower Chaucer Langland and Lydgate Benson discusses how these poets conceive of ancient Rome and its citizens especially the women of Rome as well as why this matters to their works An insightful and innovative study Imagined Romes addresses a crucial lacuna in the scholarship of Rome in the medieval imaginary and provides fresh perspectives on the work of four of the most prominent Middle English poets

Religion, Space, and the Atlantic World John Corrigan,2017-11-30 An interdisciplinary exploration of the influence of physical space in the study of religion While the concept of an Atlantic world has been central to the work of historians for decades the full implications of that spatial setting for the lives of religious people have received far less attention In Religion

Space and the Atlantic World John Corrigan brings together research from geographers anthropologists literature scholars historians and religious studies specialists to explore some of the possibilities for and benefits of taking physical space more seriously in the study of religion Focusing on four domains that most readily reflect the importance of Atlantic world spaces for the shape and practice of religion texts design distance and civics these essays explore subjects as varied as the siting of churches on the Peruvian Camino Real the evolution of Hispanic cathedrals Methodist identity in nineteenth century Canada and Lutherans in early eighteenth century America Such essays illustrate both how the organization of space was driven by religious interests and how religion adapted to spatial ordering and reordering initiated by other cultural authorities The case studies include the erasure of Native American sacred spaces by missionaries serving as cartographers which contributed to a view of North America as a vast expanse of unmarked territory ripe for settlement Spanish explorers and missionaries reorganized indigenous built space to impress materially on people the surveillance power of Crown and Church The new environment and culture often transformed old institutions as in the reconception of the European cloister into a distinctly American space that offered autonomy and solidarity for religious women and served as a point of reference for social stability as convents assumed larger public roles in the outside community Ultimately even the ocean was reconceptualized as space itself rather than as a connector defined by the land masses that it touched requiring certain kinds of religious orientations to both space and time that differed markedly from those on land Collectively the contributors examine the locations and movement of people ideas texts institutions rituals power and status in and through space They argue that just as the mental organization of our activity in the world and our recall of events have much to do with our experience of space we should take seriously the degree to which that experience more broadly influences how we make sense of our lives

The Contest for Time and Space in the Roman Imperial Cults and 1 Peter Wei Hsien

Wan,2019-10-17 Wei Hsien Wan builds on the work of David Horrell and Travis Williams for his argument that the letter of 1 Peter engages in a subtle calculated form of resistance to Rome that has often gone undetected Whilst previous discussion of the topic has remained largely focused on the letter s stance toward specific Roman institutions such as the emperor household structures and the imperial cults Wan takes the conversation beyond these confines and examines 1 Peter s critique of the Roman Empire in terms of its ideology or worldview Using the work of James Scott to conceptualize ideological resistance against domination Wan considers how the imperial cults of Anatolia and 1 Peter offered distinct constructions of time and space that is how they envisioned reality differently Insofar as these differences led to divergent ways of conceiving the social order they acquired political power and generated potential for conflict Wan thus argues that 1 Peter confronts Rome on a cosmic scale with its alternative construal of time and space and examines the evidence that the Petrine author consciously if cautiously interrogated the imperial imagination at its most foundational levels and set forth in its place a theocentric Christological understanding of the world

Connelly,1957 **Time, History, and Political Thought** John Robertson,2023-06-22 Explores the multiple ways in which different conceptions of time and history have been used to understand politics since late antiquity showing that no conception of politics has dispensed altogether with time and many have explicitly sought legitimacy in association with forms of history **History of Greek and Roman Philosophy and Science** Charles James Blomfield,1853 *Time and the Shape of History* P. J. Corfield,2007-01-01 In this lively comedy of love and money in sixteenth century Venice Bassanio wants to impress the wealthy heiress Portia but lacks the necessary funds He turns to his merchant friend Antonio who is forced to borrow from Shylock a Jewish moneylender When Antonio s business falters repayment becomes impossible and by the terms of the loan agreement Shylock is able to demand a pound of Antonio s flesh Portia cleverly intervenes and all ends well except of course for Shylock Dualism in Roman History V P.F.M. Fontaine,2023-08-14 Time in Ancient Stories of Origin Anke Walter,2020-06-30 Greek and Roman stories of origin or aetia provide a fascinating window onto ancient conceptions of time Aetia pervade ancient literature at all its stages and connect the past with the present by telling us which aspects of the past survive even now or ever since then Yet while the standard aetiological formulae remain surprisingly stable over time the understanding of time that lies behind stories of origin undergoes profound changes By studying a broad range of texts and by closely examining select stories of origin from archaic Greece Hellenistic Greece Augustan Rome and early Christian literature *Time in Ancient Stories of Origin* traces the changing forms of stories of origin and the underlying changing attitudes to time to the interaction of the time of gods and men to historical time to change and continuity as well as to a time beyond the present one Walter provides a model of how to analyse the temporal construction of aetia by combining close attention to detail with a view towards the larger temporal agenda of each work In the process new insights are provided both into some of the best known aetiological works of antiquity e g by Hesiod Callimachus Vergil Ovid and lesser known works e g Ephorus Prudentius Orosius This volume shows that aetia do not merely convey factual information about the continuity of the past but implicate the present in ever new complex messages about time **Time and Uncertainty** Paul Andre Harris,Michael Crawford,2004-01-01 The essays in this volume all originated at the 2001 conference of the International Society for the Study of Time The theme Time and Uncertainty sounds redundant but the contributions try to come to terms with the irreducible openness of time and the impermanence of life The essays from various disciplines have been grouped around fracture and rupture grappling with time and uncertainty as a breach and rapture and structure solving uncertainty into pattern **Philosophy in the Hellenistic and Roman Worlds** Peter Adamson,2015-08-27 Peter Adamson offers an accessible humorous tour through a period of eight hundred years when some of the most influential of all schools of thought were formed from the third century BC to the sixth century AD He introduces us to Cynics and Skeptics Epicureans and Stoics emperors and slaves and traces the development of Christian and Jewish philosophy and of ancient science Chapters are devoted to such major figures as Epicurus Lucretius Cicero Seneca Plotinus

and Augustine But in keeping with the motto of the series the story is told without any gaps providing an in depth look at less familiar topics that remains suitable for the general reader For instance there are chapters on the fascinating but relatively obscure Cyrenaic philosophical school on pagan philosophical figures like Porphyry and Iamblichus and extensive coverage of the Greek and Latin Christian Fathers who are at best peripheral in most surveys of ancient philosophy A major theme of the book is in fact the competition between pagan and Christian philosophy in this period and the Jewish tradition also appears in the shape of Philo of Alexandria Ancient science is also considered with chapters on ancient medicine and the interaction between philosophy and astronomy Considerable attention is paid also to the wider historical context for instance by looking at the ascetic movement in Christianity and how it drew on ideas from Hellenic philosophy From the counter cultural witticisms of Diogenes the Cynic to the subtle skepticism of Sextus Empiricus from the irreverent atheism of the Epicureans to the ambitious metaphysical speculation of Neoplatonism from the ethical teachings of Marcus Aurelius to the political philosophy of Augustine the book gathers together all aspects of later ancient thought in an accessible and entertaining way

Bede and Time Máirín MacCarron, 2019-09-19 Awarded the Irish Historical Research Prize 2021 The Venerable Bede c 673-735 was the leading intellectual figure of the early Anglo Saxon Church and his extensive corpus of writings encompassed themes of exegesis computus dating of Easter and construction of calendars history and hagiography Rather than look at these works in isolation Máirín MacCarron argues that Bede's work in different genres needs to be read together to be properly understood This book provides the first integrated analysis of Bede's thought on time and demonstrates that such a comprehensive examination allows a greater understanding of Bede's writings on time and illuminates the place of time and chronology in his other works Bede was an outstanding intellect whose creativity and ingenuity were apparent in various genres of writing This book argues that in innovatively combining computus theology and history Bede transformed his contemporaries understanding of time and chronology

Sacred Time and the Search for Meaning Gary Eberle, 2002-12-24 In *Sacred Time and the Search for Meaning* author Gary Eberle contemplates how humans view of time has evolved throughout history how we came to measure time and why we feel especially starved for it now Eberle seeks to rediscover a renewed sense of meaning in life through looking for ways to enter the realm of sacred time or sabbath time where we can reconnect with the slower deeper rhythms of life that have traditionally been experienced through worship prayer and the observance of holy days Drawing from the work of Western philosophers from Aristotle to Heidegger and on theorists from Jung to Foucault he presents both an intellectual history of time and a personal account of his own search for sacred time Along the way he formulates an insightful analysis of our culture's obsession with speed and efficiency and he offers guidance for slowing down to savor life outside of schedules and routines showing the way toward finding fulfillment in this increasingly accelerated world
