What Room for Manoeuvre? Jean Daudelin,Daniel Schwanen,2008-03-26 Canada's thirty four million people and trillion dollar GDP don't occupy much space on a planet of seven billion whose economy is now worth forty trillion dollars The country is not a lightweight yet but certainly its position as a power is shrinking What does that mean for the country's foreign policy and its various players What room is left and for whom

Being-in-the-World Hubert L. Dreyfus,1990-12-14 Being in the World is a guide to one of the most influential philosophical works of this century Division I of Part One of Being and Time where Martin Heidegger works out an original and powerful account of being in the world which he then uses to ground a profound critique of traditional ontology and epistemology Hubert Dreyfus's commentary opens the way for a new appreciation of this difficult philosopher revealing a rigorous and illuminating vocabulary that is indispensable for talking about the phenomenon of world The publication of Being and Time in 1927 turned the academic world on its head Since then it has become a touchstone for philosophers as diverse as Marcuse Sartre Foucault and Derrida who seek an alternative to the rationalist Cartesian tradition of western philosophy But Heidegger's text is notoriously dense and his language seems to consist of unnecessarily barbaric neologisms to the neophyte and even to those schooled in Heidegger thought the result is often incomprehensible Dreyfus's approach to this daunting book is straightforward and pragmatic He explains the text by frequent examples drawn from everyday life and he skillfully relates Heidegger's ideas to the questions about being and mind that have preoccupied a generation of cognitive scientists and philosophers of mind

Political Decisions and Agency Performance R. Torenvlied,2012-12-06 All over the world many people who live in urban areas find themselves in an arduous social situation In the third world people in overcrowded metropolitan areas have a problem in maintaining even the slightest standards of living But also richer parts of the world the United States Europe and the far East show growing social inequalities in their cities And social problems are not confined to the large metropolitan areas impoverishment long term unemployment social isolation and the dependency on welfare programs pops up in medium sized cities and even in smaller communities At the same time these cities are confronted with a growing bureaucratic conglomerate which is increasingly inapt to fight social degeneration The catastrophe seems to be total how to deal at once with declining social conditions and bureaucratic inadequacy Two American authors Osborne and Plastrik 1997 claim to have found the answer just banish bureaucracy The liberating accomplishments of the free market will elevate ordinary citizens and force lazy incompetent bureaucrats to do their work properly If they succeed they survive Otherwise these agencies will vanish They illustrate their arguments with the American city of Uphill Battle which stopped its decline by reinventing government Strict performance measures allotting financial controls and incentives to the citizens and improving accountability have saved the city We

should however be very careful in taking such measures so far that they banish bureaucracy It is far from obvious that simply banishing bureaucracy indeed will help people in poor social situations Models of Reading Martha J. Koehler, 2005 Models of Reading will be of interest to Richardson Burney and Laclos scholars as well as specialists in the history of the novel the culture of sensibility epistolary fiction gender and theories of reading Koehler's arguments incorporate much recent criticism of eighteenth century fiction making this study a useful compendium even beyond the value of its own findings Jacket The Populist Challenge Jens Rydgren, 2004 During the last decade and a half a new political party family the extreme Right wing populist ERP parties has established itself in a variety of West European democracies These parties represent a monist politics based on ethnic nationalism and xenophobia as well as an opposition against the political establishment Being the prototypic ERP party the French Front National FN has been a model for ERP parties emerging elsewhere in Western Europe This study presents a theoretically based explanation that combines the macro and the micro level as well as the political supply and the demand side More specifically this study shows that it is necessary to consider both opportunity structures created by demand and supply side factors as well as the ability of the FN to take advantage of the available opportunities Of particular interest is the author's analysis of the sociology and attitudes of the FN voters

Bridging Occupational, Organizational and Public Health Georg F. Bauer, Oliver Hämmig, 2013-10-11 In our complex fast changing society health is strongly influenced by the continuously changing interactions between organisations and their employees Three major fields contribute to health oriented improvements of these interactions occupational health organizational health and public health As currently only partial links exist amongst these fields the book aims to explore potential synergies more systematically Considering the high mental and social demands in a service and knowledge sector economy the first part of the book focuses on work related psychosocial factors As a large proportion of inequalities in health in developed countries can be explained by inequalities in working conditions those psychosocial factors with a particularly high public health impact are highlighted As addressing these psychosocial factors requires to involve the organization as the key change agent the second part covers approaches to improve public health through organizational level health interventions The last section takes a look into the future of occupational organizational and public health what are the future challenges regarding occupational health and how can they be tackled within and beyond the organizational level Overall this integrating book will help to broaden the evidence base legitimacy and efficacy of occupational and organizational level health interventions and thus increase their public health impact Enaction Domenico Masciotra, Wolff-Michael Roth, Denise Morel, 2007-01-01 This book is addressed to all those in the field of education or related fields including teachers teacher trainers consultants and researchers who are interested in exploring the question What does it mean to know to learn and to teach Contrary to popular conceptions an enactive perspective assumes that knowing and learning are not disembodied operations that take place solely in a person's head Rather they are a function of the whole

person who is firmly situated in the world and who acts in the world to transform it just as she is transformed by it The dynamic and transformational nature of knowing and learning are reflected in the relationship between the person and her world a relationship that evolves through acting in and with the world rather than abstracting oneself from it Knowing develops as a function of the person's availability that is her full involvement and presence in the here and now The aim of education is thus to foster the development of this relationship in a never ending quest for deep interiority with the world Drawing on their experiences as teachers curriculum developers students Zen practitioners karateka bicyclists hobby mathematicians and gardeners the authors provide many concrete examples of what it means to think about knowing and learning in terms of enaction and how teachers and curriculum developers who take enactivism seriously might go about designing and implementing lessons
