Management Intellectual Capital and also many sectorial perspectives like Trade Economics Logistics Social Policy etc. However today the question about the applicability of all these studies remains unsolved. So it is like many of the words that will save the Knowledge Economy have already been written all we need is to save the Knowledge Economy. Or is it not? The idea behind TAKE Conference was to provide a multidisciplinary forum in which those multiple perspectives will come together. We believe it is a fruitful operation and we intend to continue the exercise in the future. The problem of the relation between theory and practice in the knowledge economy is getting more important and not less important with the development of the BRICS and other nations. TAKE main question will be one of the problems of the 21st century. Following the promising start of TAKE 2016 in Aveiro Portugal TAKE 2017 was organized by the Faculty of Economics of Zagreb University around Prof. Blazenka Knezevic. I would like to thank her and her team for the massive effort in putting TAKE 2017 together. It will be a very nice and memorable conference. I would like also to thank the 5 keynotes, the special sessions and workshop organizers, the authors of the 60 papers and 5 posters, the stream leaders, the reviewers and the sponsors for the efforts. And to the 90 participants from 20 countries: Austria, Bosnia Herzegovina, Canada, Croatia, Germany, Hong Kong, Hungary, Netherlands, Mexico, Portugal, Poland, Romania, Russia, South Africa, Serbia, Slovakia, Spain, Thailand, United Kingdom, United States. A special word to Prof. Gaby Neumann from Wildau who organized the Proceedings. Let us make TAKE 2017 a great occasion and help save the knowledge economy a bit.

Presenting pedagogical materials useful in the design and delivery of the most frequently taught communications courses. Lederman writes in a clear, lucid fashion that assumes no previous knowledge of communication teaching. The structure of this text will be of value to the first-time instructor who is unfamiliar with designing course outlines. While the focus is on the new teacher, all those intrigued by genuine teaching of communications will value this text. Part One investigates the undergraduate communications classroom, including the basic elements of the learning process, generic teaching strategies, and challenges facing instructors in the next century. Part Two provides an expanded course analysis of 13 frequently found courses in undergraduate communications curricula. Each chapter is an instructor's answer to a fundamental question: How Do I Teach Communications? This collection of answers will inform first-time instructors' own teaching models. Of particular value will be the course descriptions, including goals, central concepts, student profiles, assignments, suggested readings, and methods of evaluation.
