Urban Life in Contemporary China Martin King Whyte, William L. Parish, 1985-11-15 Through

interviews with city residents Martin King Whyte and William L Parish provide a unique survey of urban life in the last decade of Mao Zedong's rule. They conclude that changes in society produced under communism were truly revolutionary and that in the decade under scrutiny the Chinese avoided ostensibly universal evils of urbanism with considerable success. At the same time however they find that this successful effort spawned new and equally serious urban problems: bureaucratic rigidity, low production and more.

Women's Struggle for Higher Education in Russia, 1855-1900 Christine Johanson, 1987-01-01. Unlike contemporary Soviet and Western accounts which emphasize the involvement of educated women in the revolutionary movement, Christine Johanson investigates the relationship between developments in women's education and domestic politics of the post-Crimean War era. The author shows how the particular nature of autocratic rule under Alexander II facilitated the establishment of university-level courses for women and demonstrates that Russian women who cooperated with the government in order to increase their educational opportunities far outnumbered the female revolutionists who sought to overthrow it. And while acknowledging that Russian radicalism gave enormous encouragement to women's pursuit of university study, this book shows that it was the support of progressive statesmen and academics which allowed the creation of higher educational facilities for women. The attitudes, aspirations and frustrations of women who enrolled in these educational facilities are also examined. Considerable attention is given to the training and practice of female physicians and to the testing of their skills and commitment to social service in tradition-bound peasant villages and the field hospitals of the Russo-Turkish war. The concluding chapter explored the conservative reaction following the assassination of Alexander II and the subsequent closure of women's advanced educational facilities.

Russian Modernity D. Hoffmann, Y. Kotsonis, 2000-07-05. Russian Modernity places Imperial and Soviet Russia in a European context. Russia shared in a larger European modernity marked by increased overlap and sometimes merger of realms that had previously been treated as discrete entities: the social and the political state and society, government and economy, and private and public. These were attributes of Soviet dictatorship but their origins can be located in a larger European context and in the emergence of modern forms of government in Imperial Russia.

Culture and Literature Alexei Lalo, 2011-09-09 Much of the previous scholarship on Russia's literary discourses of sexuality and eroticism in the Silver Age was built on applying European theoretical models from psychoanalysis to feminist theory to Russia's modernization. This book argues that at the turn into the twentieth century Russian popular culture for the first time found itself in direct confrontation with the traditional high cultures of the upper classes and intelligentsia producing modernized representations of sexuality. This Russian tradition of conflicted representations heretofore misassessed by literary history emerges as what Foucault would call a full blown bio history of Russian culture a history of indigenous representations of sexuality and the eroticized body capable of innovation on its own terms not just those derivative from Europe.

Men in Contemporary Russia Rebecca Kay, 2016-12-05 Rebecca Kay assesses how men in post Soviet Russia are represented through media and popular discourses. Using case studies she explores the challenges which have arisen for men since 1991 and the ways in which their responses are shaped by and viewed through the prism of widely accepted attitudes towards gender. The lives and concerns of men in provincial Russia are examined through ethnographic fieldwork combining extensive participant observation with in depth interviews. The book reveals how individual men strive to maintain a sense of equilibrium between the activities in which they are engaged and the ways in which they are perceived both by others and by themselves. The findings of the research have produced significant areas of contrast and comparison with the author's earlier work on women. This is drawn out throughout the book placing the study of Russian men in a broader gendered context. The issues raised by the men mirror concerns discussed in men's studies literature and popular discourse beyond Russia. The book is therefore of interest to a wider international audience as well as contributing to ongoing interdisciplinary debates in Russian Studies, Anthropology, Sociology and Human Geography addressing the need for new approaches to understanding post Socialist change.

Waking the Tempests Eleanor Randolph, 1996 This book by veteran journalist Eleanor Randolph offers a startling picture of life in Russia in the wake of the Soviet collapse where the chaos that followed engulfed everything and everybody.
