Agent-based Supply Network Event Management Roland Zimmermann, 2006-03-16 Supply Chain Event Management SCEM is one of the major topics in application oriented Supply Chain Management. However, many solutions lack conceptual precision and currently available client server SCEM systems are ill suited for complex supply networks in today's business environment. Agent based proactive information logistics promises to overcome existing deficits by providing event related information to all participants in the distributed environment. Hence, follow up costs of disruptive events are significantly reduced for all network participants and performance of a supply network is increased. In this book, a thorough analysis of the event management problem domain is the starting point to develop a generic agent based approach to Supply Network Event Management. The main focus lies on practical issues of event management, e.g. semantic interoperability and economic benefits to be achieved with agent technology in this state of the art problem domain. **Rapport - Unie Van Suid-Afrika,**

Personal Conceptions of Religiosity in the Soutpansberg, South Africa, in the Early 20th Century* Caroline Jeannerat, 2023-01-20 Research into the history of Christian missions in the context of colonialism has focused primarily on missions as institutions and on the ways in which people were integrated into the economic, political and ideological spheres of imperial powers. Reduced to an experience occurring within a person, faith was deemed unapproachable by scientific methods. This has in effect constituted a silence regarding the everyday experience of religiosity among those drawn to Christianity. The Ethnography of Faith is a detailed study of the ways in which people engage with and experience the religious in order to recognise and understand this suppressed voice of religiosity. In her analysis of the Lutheran church in the Soutpansberg of early 20th century South Africa, Caroline Jeannerat listens closely to how people describe their own faith and that of others in the archive in accounts of work done in texts written for mission publications, in songs composed for church services, in letters and newspaper articles and in oral memories. A careful reading of this archive for breaks for misunderstandings and oppositions for sentiments of agreement, praise, compatibility and claims of shared experiences identifies negotiations of meaning which give indications of conceptualisations of faith that stand in distinction to those of the missionaries and their expectations. **Flügel's dictionary of the German and English**
