Shaping the City Gregory F. Gilmartin, 1996-10 The Municipal Art Society was founded in New York City in the wake of the World's Columbian Exposition when the Great White City in Chicago ushered in a new conception of what American cities could achieve through coordinated planning and the collaboration of the nation's best classical architects and artists In 1890s New York much of the population lived in apartments that had no toilets developers considered it their inalienable right to build a skyscraper on a twenty foot lot and graft not need determined the city government's construction priorities If this situation has changed we owe it less to the councilmen and mayors who enacted legislation than to the citizen activists who persuaded them to do so *Shaping the City* is a stirring account of a century of just such citizen activism not a dry institutional history but the inside story of city government as it affects the physical environment We know of MAS today as the organization that led the fight against overdevelopment at Columbus Circle and the battle to retain the honky tonk character of Times Square but in its

early days MAS was the guiding force behind the City Beautiful movement Its members built the city s great classical ensembles and they ushered in a golden age of municipal architecture with their designs for bridges park pavilions monuments even lamp posts MAS was among the first organizations to demand the introduction of zoning to New York It also pioneered the concept of community planning and undertook the seemingly hopeless task of protecting landmarks persuading Mayor Robert F Wagner to sign the Landmarks Preservation Law a model for the rest of the nation In these pages Gregory F Gilmartin has looked beyond the narrow scope of architectural history and focuses instead on the people policies and politics that shape the cityscape He is frank in his portrayal of politicians and dirty tricks and encouraging in his portraits of citizens and programs that have made a difference Shaping the City is addressed not only to those who are specifically interested in architecture art history parks preservation and urban history but also to the more general reader who loves cities but is disturbed by the destruction of neighborhoods and the overwhelming scale of new developments The book is especially valuable as a demonstration that the political process can be made to work for the public interest The result is not nostalgia but will convince readers that they as the Municipal Art Society has done and continues to do can participate shaping the agenda for the future

Urban Engineering Ariva Sugandi Permana, 2025-09-30 Urban engineers provide a physical definition of the urban habitat by planning designing building and constructing operating and maintaining infrastructure applying the tools of engineering science and good management to address the complex problems associated with infrastructure services buildings

Elkin, 2015-05-14 Stephen L Elkin deftly combines the empirical and

normative strands of political science to make a powerfully original statement about what cities are can and should be. Rejecting the idea that two goals of city politics, equality and efficiency, are opposed to one another, Elkin argues that a commercial republic could achieve both. He then takes the unusual step of addressing how the political institutions of the city can help to form the kind of citizenry such a republic needs. The present workings of American urban political institutions, Elkin maintains, are characterized by a close relationship between politicians and businessmen, a relationship that promotes neither political equality nor effective social problem solving. Elkin pays particular attention to the issue of land use in his analysis of these failures of popular control in traditional city politics. Urban political institutions, however, are not just instruments for the dispensing of valued outcomes or devices for social problem solving; they help to form the citizenry. Our present institutions largely define citizens as interest group adversaries and do little to encourage them to focus on the commercial public interest of the city. Elkin concludes by proposing new institutional arrangements that would be better able to harness the self-interested behavior of individuals for the common good of a commercial republic.

Journal of the Board of Education of the City of New York New York (N.Y.). Board of Education, 1909 **Annual Report** USA Patent Office, 1903 The Largest Art Brent D. Ryan, 2017-11-03. Why urban design is larger than architecture: the foundational qualities of urban design, examples and practitioners. Urban design in practice is incremental, but architects imagine it as scaled-up architecture, large and ready to build pop-up cities. This paradox of urban design is rarely addressed; indeed, urban design as a discipline lacks a theoretical foundation. In *The Largest Art*, Brent Ryan argues that urban design encompasses more than architecture and he provides a foundational theory of urban design beyond the architectural scale. In a declaration of independence for urban design, Ryan describes urban design as the largest of the building arts, with qualities of its own. Ryan distinguishes urban design from its sister arts by its pluralism, plural scale (ranging from an alleyway to a region), plural time (because it is deeply enmeshed in both history and the present), plural property (with many owners), plural agents (with many makers), and plural form (with a distributed quality that allows it to coexist with diverse elements of the city). Ryan looks at three well-known urban design projects through the lens of pluralism: a Brancusi sculptural ensemble in Romania, a Bronx housing project, and a formally and spatially diverse grouping of projects in Ljubljana, Slovenia. He revisits the thought of three plural urbanists working between 1960 and 1980: David Crane, Edmund Bacon, and Kevin Lynch. And he tells three design stories for the future imaginary scenarios of plural urbanism in locations around the world. Ryan concludes his manifesto with three signal considerations: urban designers must acknowledge eternal change, inevitable incompleteness, and flexible fidelity. Cities are ceaselessly active, perpetually changing. It is the urban designer's task to make art with aesthetic qualities that can survive perpetual change.
