Los Alamos The Ranch School Years 1917 1943:

Los Alamos John D. Wirth, 2003 Wirth and Aldrich examine the Los Alamos Ranch School an elite prep school for boys ages twelve to eighteen In existence between the two World Wars the school's curriculum combined a robust outdoor life with a rigorous academic program mirroring the Progressive Era's quest for perfection *Oppenheimer and the Manhattan Project* Cynthia C. Kelly, 2006 2004 marked the centennial of the birth of J Robert Oppenheimer and brought historians and scholars former students nuclear physicists and politicians together to celebrate this event Oppenheimer's life and work became central to 20th century history as he spearheaded the development of the atomic bomb that ended World War II This book provides a spectrum of interpretations of Oppenheimer's life and scientific achievements It approaches the extraordinary scientist and teacher from many perspectives chronicling the years from his boyhood through his role as director of the Los Alamos National Laboratory and afterwards The book also discusses Oppenheimer's connection to New Mexico which hosted two of the Manhattan Project's most crucial sites and addresses his lasting impact on contemporary science international politics and the postwar age **Southwestern Women Writers and the Vision of Goodness**

Catharine Savage Brosman, 2016-07-25 This literary history focuses on five women writers Mary Austin Willa Cather Laura Adams Armer Peggy Pond Church and Alice Marriott whose work appeared from around 1900 through the 1980s All came from or lived and worked in California Arizona New Mexico or Oklahoma The book situates them in their time and place and examines their interactions with landscapes people art and history Their interest in fine arts and native arts and crafts is stressed as well as their concern for the environment *Elemental Germans* Christoph Laucht, 2012-05-15 Christoph Laucht offers the first investigation into the roles played by two German born emigre atomic scientists Klaus Fuchs and Rudolf Peierls in the development of British nuclear culture especially the practice of nuclear science and the political implications of the atomic scientists work from the start of the Second World War until 1959 *War Beyond the Battlefield* David Grondin, 2013-09-13 In an effort to make sense of war beyond the battlefield in studying the wars that were captured under the rubric of the War on Terror this special issue book seeks to explore the complex spatial relationships between war and the spaces that one is not used to thinking of as the battlefield It focuses on the conflicts that still animate the spaces and places where violence has been launched and that the war has not left untouched In focusing on war beyond the battlefield it is not that the battlefield as the place where war is waged has gone in smoke or has borne out of importance it is rather the case that the battlefield has been displaced redesigned reshaped and rethought through new spatializing practices of warfare These new spaces of war new in the sense that they are not traditionally thought of as spaces where war takes place or is brought to are television screens cellular phones and bandwidth George W Bush's ranch in Crawford Texas videogames popular culture sites news media blogs and so on These spaces of war beyond the battlefield are crucial to understanding what goes on the battlefield in Iraq Afghanistan or in other fronts of the War on Terror such as the homeland to understand

how terror has globally been waged beyond the battlefield This book was originally published as a special issue of Geopolitics

The General and the Genius James Kunetka,2015-07-13 With a blinding flash in the New Mexico desert in the summer of 1945 the world was changed forever The bomb that ushered in the atomic age was the product of one of history s most improbable partnerships The General and the Genius reveals how two extraordinary men pulled off the greatest scientific feat of the twentieth century Leslie Richard Groves of the Army Corps of Engineers who had made his name by building the Pentagon in record time and under budget was made overlord of the impossibly vast scientific enterprise known as the Manhattan Project His mission to beat the Nazis to the atomic bomb So he turned to the nation s preeminent theoretical physicist J Robert Oppenheimer the chain smoking martini quaffing son of wealthy Jewish immigrants whose background was riddled with communist associations Groves s opposite in nearly every respect In their three year collaboration the iron willed general and the visionary scientist led a brilliant team in a secret mountaintop lab and built the fearsome weapons that ended the war but introduced the human race to unimaginable new terrors And at the heart of this most momentous work of World War II is the story of two extraordinary men the general and the genius

New Mexico Richard Melzer,2011 A pictorial celebration of New Mexico s history and landscape In celebration of New Mexico s statehood centennial Richard Melzer focuses on the various social and political elements that have made the Land of Enchantment what it is today Filled with images that document the past hundred years New Mexico is a photographic delight accompanied by brief insightful essays that leave the reader in no doubt of a history that is both imposing and exciting in its scope This book is also an official product of the state s centennial celebration Richard Anthony Melzer is a professor of history at the University of New Mexico Valencia Campus He is a former president of the Historical Society of New Mexico and is the author of many books and articles on twentieth century New Mexico history
