possibilities of access to computing meet the realities of structural inequality Crooks shows how data intensive edtech delivers value to privileged individuals and commercial organizations but never to the communities that hope to share in the benefits He persuasively argues that data drivenness ultimately enjoins the public to participate in a racial project marked by the extraction of capital from minoritized communities to enrich the tech sector Consular Notification and Access ,2003 This booklet contains instructions and guidance relating to the arrest and detention of foreign nationals deaths of foreign nationals the appointment of guardians for minors or incompetent adults who are foreign nationals and related issues pertaining to the provision of consular services to foreign nationals in the United States This booklet is designed to help ensure that foreign governments can extend appropriate consular services to their nationals in the United States and that the United States complies with its legal obligations to such governments The instructions and guidance herein should be followed by all federal state and local government officials whether law enforcement judicial or other insofar as they pertain to foreign nationals subject to such officials authority or to matters within such officials competence *Public Control of Highway Access and Roadside Development* United States.
