

Alan Watts

THE FARMER LOST HIS HORSE

"Once upon a time, there was a Chinese farmer who lost a horse.

All the neighbors came around that evening and said, 'That's too bad.' And, the farmer said, 'Maybe.'

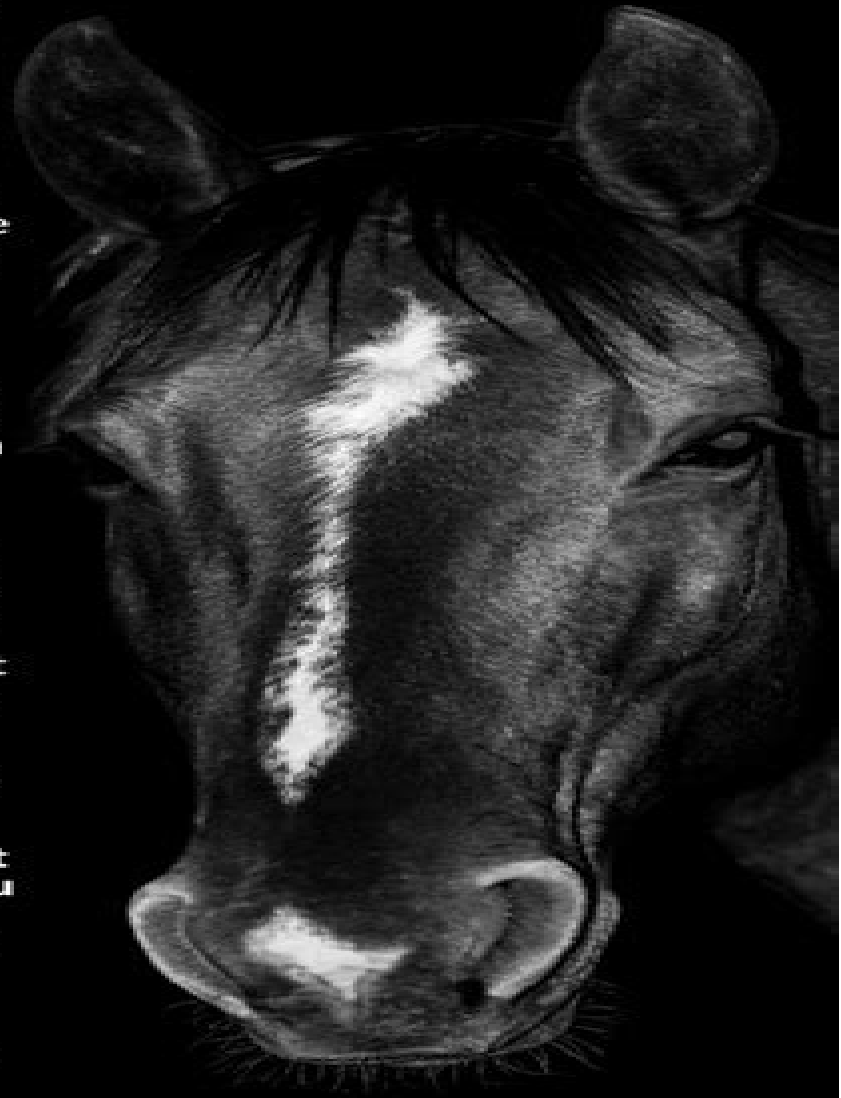

The next day the horse came back and brought seven wild horses with it. All the neighbors came around and said, 'Why, that's great, isn't it?' And, he said, 'Maybe.'

The next day his son, who was attempting to tame one of these horses and was riding it, was thrown and broke his leg. All the neighbors came around in the evening and said, 'Well, that's too bad, isn't it?' And, he said, 'Maybe.'

The next day the conscription officers came around looking for people for the army, and they rejected his son because he had a broken leg. All the neighbors came around that evening and said, 'Isn't that wonderful?' And, he said, 'Maybe.'

This reflects a fundamentally Taoistic attitude which is that the whole process of nature is an integrated process of immense complexity. It is really impossible to tell whether anything that happens in it is good or bad because you never know what will be the consequences of a misfortune, or you never know what will be the consequences of good fortune.

You never know the chain, the pattern, the connection, between events."
