five different species from microscopic plankton to the largest animal to have ever lived on earth the blue whale We originally captured storytellers biographical information by asking them interview questions so their responses best reflect what was relevant to them at that time But forty people is a significant number to keep up with over the course of eight years A number of the stories also reference a specific timeline relevant to when the storytellers were interviewed To help provide context the dates of all interviews are listed on the top left of the story photo that begins each story Wild Monterey Bay is a celebration of wildlife and people Now we have finally turned these illustrated stories into a book for people to enjoy for years to come and we hope you will enjoy it Foreword by Carl Safina Praise for Wild Monterey Bay Connecting with wildlife is such an important way to build empathy for the natural world This is a delightful collection of stories about inspiring encounters with ocean life everything from bioluminescent plankton to great whales I hope it encourages everyone to get outdoors and explore for themselves Julie Packard Executive Director Monterey Bay Aquarium This is a treasure trove Gorgeous compelling photos illustrate pages brimming with stories of close encounters with creatures from white sharks to plankton all told in different voices and from different perspectives From the teacher watching city kids fall in love with the ocean to the biologist wrangling seals for tagging to the photographer documenting an orca teaching her baby to hunt all of these tales some funny some sad some quirky give you an intimate picture of Wild Monterey Bay you ll find nowhere else Whether you already live in this magical place or are only an armchair visitor this book will deepen your appreciation of this unique critical habitat and inspire you to protect what is surely one of the richest marine ecosystems on Earth Sy Montgomery Author of Soul of the Octopus and Secrets of the Octopus An inspiring exploration of the relationship between one of the world s most extraordinary marine environments and the people whose lives are deeply touched by it and who work to protect it LIZ CUNNINGHAM Author of Ocean Country Human encounters with wildlife wake us up to the fact that we live in their world and these stories make that notion so real This is Monterey Bay at its most raw alive and deserving of its rightful protection Enjoy DAN HAIFLEY Retired Executive Director O Neill Sea Odyssey and Save Our Shores **Fishes** Gene Helfman, Bruce Collette, 2011-11-01 One fish two fish red fish nearly thirty thousand species of fish or fishes as they are properly called when speaking of multiple species This is but one of many things the authors of this fascinatingly informative book reveal in answering common and not so common questions about this ubiquitous group of animals Fishes range in size from tiny gobies to the massive Ocean Sunfish which weighs thousands of pounds They live in just about every body of water on the planet Ichthyologists Gene Helfman and Bruce Collette provide accurate entertaining and sometimes surprising answers to over 100 questions about these water dwellers such as How many kinds of fishes are there Can fishes breathe air How smart are fishes and Do fishes feel pain They explain how bony fishes evolved the relationship between them and sharks and why there is so much color variation among species Along the way we also learn about the Devils Hole Pupfish which has the smallest range of any vertebrate in the world Lota lota the only freshwater fish to spawn under ice the Candiru a pencil
